

Commercial Products

Wire Management and Electrical Products

Quality, reliability, labor savings and lower installed cost.

CROUSE-HINDS SERIES

The Commercial Products portfolio of Eaton's Crouse-Hinds series delivers the quality and breadth of offering in styles and materials to meet customer requirements and preferences. With industry-leading innovation, our products deliver real customer value.

Product solutions are designed and certified to meet a wide range of customer applications and our best-in-class, global sales

and customer service teams provide local support.

Crouse-Hinds series solutions round out a complete Eaton portfolio that brings you reliable, efficient and safe electrical power management solutions.

**Expanding our products.
Expanding our thinking.
Energizing your business.**

The product information published in our catalogs and literature is not guaranteed. It has been compiled with care and is sufficiently accurate for most purposes. It is subject to change without notice. Occasionally, it may be necessary to modify the materials, finishes or other components of the product. These changes will in no way reduce the performance or function for which the product is intended.

All statements, technical information and recommendations contained herein are based on information and tests we believe to be reliable. The accuracy or completeness thereof are not guaranteed. In accordance with Eaton's Crouse-Hinds Division Terms and Conditions of Sale, and since conditions of use are outside our control, the purchaser should determine the suitability of the product for his/her intended use and assumes all risk and liability whatsoever in connection therewith.

All sales of Eaton's Crouse-Hinds series products are specifically subject to the Terms and Conditions of Sale as shown on Eaton's Crouse-Hinds Division distributor price sheets.

Commercial Products

Focus Products

PRE-formance™ Pre-fabricated Assemblies

- Improve job site efficiency and safety, and properly align skilled resources to meet tight commercial construction project deadlines
- PRE-formance™ products are a three-tiered pre-fabricated solution which allows contractors to better control their labor allocation and reduce total installation and construction costs
- Designed by contractors for contractors to meet pre-fabricated requirements
- Basic - standard pre-fab assemblies
- Custom - assembled to order
- Complete - engineered solution

Quick-Lok™ Pro Connectors

- **Now available in steel!**
- For the quickest, easiest and most secure way to terminate AC/MC cable to a box or enclosure!
- Provides significant labor savings when installing metal-clad or armored cable to a steel box or enclosure
- No tools are needed for installation
- Simply insert cable or conduit into the connector and install into knockout
- Can be easily removed

Available in:

- Single connectors
- Duplex connectors
- 90 degree connectors
- Old work connectors

Liquidtight Fittings

- This broad line of Liquidtight Fittings delivers high quality and are designed to the toughest standards. Not only is this versatile line of liquidtight fittings designed for a wide range of applications, but they reduce installation time and cost.

Available in:

- Liquidator™
- Stainless steel
- Zinc die cast
- Non-metallic connectors
- Non-metallic conduit and whips
- Tubular steel
- Low profile
- Space-Saver
- LiQuik™ no disassembly
- Product of the USA

Series 5 and Form 5 Conduit Bodies

- The broadest, most complete offering of copper-free aluminum and malleable iron conduit outlet bodies on the market! The only offering rated NEMA 4 (rigid body with integral gasketed cover)!

Available in:

- Covers with integral gaskets
- X and TB configurations
- SnapPack™ with rigid bodies and integral gasketed covers

Solar Combiner & Harness Solutions

- Broadest offering of third party listed solar combiner boxes, compact combiner boxes, recombiners, pass through boxes, fuse boxes and disconnect boxes
- Solar combiner boxes, recombiners, fuse boxes and disconnect boxes are rated for 600V, 1000V and 1500V*
- Available with a number of options, including: factory supplied fuses, integral disconnect switches up to 600A, surge protection, DC string monitoring, pre-wired connectors and whips to match customer needs and provide the highest material and labor savings
- Complete offering of fully engineered wiring harnesses. Available in customizable shipping configurations.

Also available is a full range of high quality, durable and secure solar accessories:

- Solar cable ties
- Solar clips
- Solar cord grips
- Solar lay-in grounding lugs
- Solar cable assemblies

*Consult factory on 1500V version.

Myers™ Hubs

- Myers is the industry leader and is unparalleled in selection, capability and dependability. In addition to being the most recognized brand of hub on the market, Myers offers larger stainless hub trade sizes, aluminum hubs, ATEX approved hubs, cap-offs, drains and more!

New Products & Tools

New Products

Eaton is committed to a continual flow of new products that deliver real value to end customers. With global reach, our offering continues to grow, focusing on the products needed to meet local requirements.

We've introduced hundreds of new products over the last several years and have another roster full in process!

Engineering & Specifier Tools

At Eaton's Crouse-Hinds Division, our goal is to be the leading provider of information and resources to our customers. That's why we offer customers our **CoSPEC online 3D Drawing Catalog**, which offers the ability to select and view Crouse-Hinds series products in 2D and 3D.

With a couple of clicks, you can download design content in one of nearly 100 different CAD, BIM, PDMS and graphics formats. File format outputs are native to the chosen software, which eliminates translation errors and speeds the integration of the content into your project. For specification and design support, visit www.crouse-hinds.com/cospec.

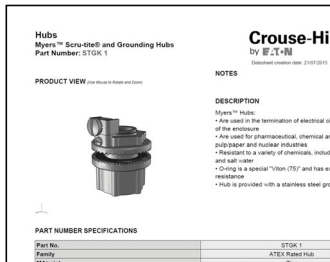

Solar Combiner Configuration

Configurators and catalog number generators dramatically reduce quote and order lead times through the engineering design process. The Solar Combiner Configurator enables the specification of available product options to build an Eaton's Crouse-Hinds series catalog number for quotes and orders. For specification and design support, visit www.crouse-hinds.com/cospec.

SKU-level Submittal Sheets

Dynamic PDFs with both SKU-level specification data and key family specs. Features a custom text area for unique info such as project name, fixture type and an embedded, rotatable 3D drawing. For specification and design support, visit www.crouse-hinds.com/cospec.

Specification Guide Forms

If it has been a while since your customers have last updated their spec library, we can help optimize the safety, reliability and efficiency of their design requirements with our specification guide forms (written to CSI guidelines). For specification and design support, visit www.crouse-hinds.com/cospec.

Catalog Page Locator

Need to download catalog pages fast? Our catalog page locator tool allows you to select multiple catalog pages and download in one zipped file, simplifying the creation of submittal packages. For specification and design support, visit www.crouse-hinds.com/cospec.

Mobile Training Experience

Eaton's Crouse-Hinds Division's fully interactive trailer is on a nationwide tour to meet increasing demand for electrical safety training. The trailer, which is filled with a comprehensive array of end-to-end electrical systems, will provide training for electrical contractors. Visit us at www.crouse-hinds.com/mobiletraining

Technical Information

Compliances & Third Party Certifications

Compliances & Third Party Certifications:

The products described in this catalog are of the highest possible quality. Eaton's Crouse-Hinds series products have been tested and field proven in a wide variety of applications. Products are designed and manufactured to meet or exceed (in numerous products), multiple worldwide standards.

- The designs of Eaton's Crouse-Hinds series products are original and proprietary. Some are patented.
- The product information in this catalog, though current at the catalog printing, is subject to improvements and modifications. Due to the breadth of our product offering with regard to the design, materials, components and the variations of these products available to our customers, it is impractical to adequately identify third party certification of all items in this publication.
- Product improvements and other developments may, at times, affect third party approval of testing laboratories such as Underwriters Laboratories, the Canadian Standards Association, Factory Mutual and others. The purchaser should determine the suitability of the product for his or her application, including third party certifications.
- Eaton's Crouse-Hinds series products are designed to meet or exceed the performance requirements of applicable standards. Where the term "compliances" is used in this catalog in conjunction with a UL/CSA standard number, it identifies the criteria which have governed the design and company testing of the products listed on that page.
- The term "compliances" is not to be construed to mean that the products have been listed by UL or CSA. Such listing is a matter of independent record signified by product marking, carton marking or other approved means.
- The individual product offerings in this catalog comply with the national and third party standards identified under the "Certifications and Compliances" sections. To obtain specific third party approval information for these products, contact Eaton's Crouse-Hinds Division customer service department or the applicable agency.

Worldwide Testing Authorities

Country	Testing Authority
USA	Underwriters Laboratories
USA	Factory Mutual
USA	ETL
Canada	Underwriters Laboratories
Canada	CSA
Mexico	ANCE
Denmark	DEMKO
Russia	TREV-R
Kazakhstan	TREV-K

NEMA Standard FB1 Compliance:

NEMA Standard FB1 covers fittings that are part of electrical raceway and cable system designed for use as intended by the requirements of NFPA70. Specifically it covers fittings for use with non-flexible tubular raceways - Rigid and Intermediate Metal Conduit (IMC) and EMT. FB1 also covers fittings for use with flexible raceways and cable.

Eaton's Crouse-Hinds series conduit and cable fittings falling within the scope of NEMA FB1 satisfy the requirements of that standard.

Statement of Accuracy:

The information published in this catalog and other literature has been compiled with great care and is sufficiently accurate for most purposes, but is not guaranteed. All statements, technical information and recommendations contained herein are based on information and tests we believe to be reliable. This catalog and the products contained within is subject to change without notice. The purchaser should determine the suitability of the product for his or her application and assumes all risk and liability whatsoever in connection therewith.

Technical Information

NEC & IEC Ratings

Enclosure Type:

NEMA, CEC and NEC Types

A North American system of rating standard levels of protection provided to electrical apparatus by enclosures for (1) the protection of persons against contact with live or moving parts inside the enclosure; (2) the protection provided by enclosure against ingress of solids and/or liquids; (3) the protection provided by the enclosure against the deleterious effects of corrosion; and (4) the protection provided by the enclosure against damage due to the formation of external ice.

Typical NEMA, CEC and NEC types of enclosures are listed below:

NEMA Classification	User Benefits
Type 3 Enclosures	are intended for outdoor use primarily to provide a degree of protection against dust, rain, sleet and external formation.
Type 3R Enclosures	are intended for outdoor use primarily to provide a degree of protection against falling rain and external ice formation (these enclosures may be ventilated).
Type 4 Enclosures	are intended for indoor or outdoor use primarily to provide a degree of protection against windblown dust and rain, splashing water, hose-directed water and external ice formation.
Type 4X Enclosures	are intended for indoor or outdoor use primarily to provide a degree of protection against corrosion, windblown dust and rain, splashing water, hose-directed water and external ice formation.
Type 6P Enclosures	are intended for indoor or outdoor use primarily to provide a degree of protection against the entry of water during prolonged submersion at a limited depth.
Type 12 Enclosures	are intended for indoor use primarily to provide a degree of protection against dust falling dirt, and dripping non-corrosive liquids.

Degree of Protection (IP):

The Ingress Protection (IP) System of Enclosure Protection originated under the IEC system. However, it is now widely accepted and used in North America.

It is a system of rating standard levels of protection provided by apparatus for the protection of persons against contact with live or moving parts inside the apparatus, as well as the protection provided by apparatus against ingress of solids and/or liquids.

The chart below shows ingress protection codes:

First Numeral Protection Against Solid Bodies	Second Numeral Protection Against Liquid
0 – No Protection	0 – No Protection
1 – Objects Equal to or Greater than 50mm	1 – Vertically Dripping Water
2 – Objects Equal to or Greater than 12.5mm	2 – 75 to 105° Angled Dripping Water
3 – Objects Equal to or Greater than 2.5mm	3 – Spraying Water
4 – Objects Equal to or Greater than 1.0mm	4 – Splashing Water
5 – Dust-protected	5 – Water Jets
6 – Dusttight	6 – Heavy Seas, Powerful Water Jets
	7 – Effects of Immersion
	8 – Indefinite Immersion

i.e. An enclosure rated IP68 is rated to exclude dust (dusttight) and rated for indefinite immersion.

Technical Information

Materials and Finishes

Materials and Finishes:

Eaton's Crouse-Hinds Division offers products of numerous types of materials with numerous finishes to have an offering to meet virtually all preferences and applications. The information below summarizes some of the most commonly used materials and finishes. The information below is provided for convenience and reference. For information relating to materials and finishes for a particular product or product family, consult the specific catalog page.

Material Selection Chart

Match the material to the description to find the material most suited to your application.

Material							
Characteristics	Iron	Zinc Alloy	Aluminum Alloy	Stainless Steel	Mild Steel	Non-Metallic	Copper Alloy
Strength	Medium	Medium	Medium	High	Medium	Low	Low
Corrosion Resistance	Medium	High	High	High	Medium	High	Medium
Weight	Medium	Medium	Low	Medium	Medium	Low	High
Heat Resistance	High	Low	Medium	High	High	Low	High

Performance Range

Product Family	Low Range	Medium Range	High Range
Strength*	<25,000	25,000 - 65,000	>65,000
Corrosion Resistance	N/A	Coating meets UL requirements if applicable	No protective coating needed
Weight†	<.100	.100 - .300	>.300
Heat Resistance**	<800°	800 - 2000°	>2000°

*Raw material strength (PSI).

†Raw material density (lb/cubic inch).

**Raw material melting temp. (F)

Standard Finishes:

Zinc Electroplate:

- Electrolytically deposited zinc plating

Electrogalvanized and Zinc Mechanical Plating:

- Applied to steel parts
- Finished with aluminum acrylic paint on all cast Feraloy® iron alloy products unless otherwise specified

Zinc Chromate Primer and Aluminum Acrylic Paint:

- Applied to certain ferrous castings and steel parts

Hot Dip Galvanize:

- Zinc plate by dipping in molten zinc

Natural Finish:

- Unplated, unpainted (non-ferrous metals only)

Epoxy Powder Coat:

- Powdered epoxy finish is applied electrostatically, resulting in a tough, durable coating. Powder epoxy finish has many advantages over enamel, lacquer, aluminum paint or epoxy paint. Powder epoxy finish has superior adhesion. Coating over the entire casting is uniform, even in hidden crevices. Electrostatic application reduces galvanic action.

Thin Wall Conduit Fittings (for EMT Conduit)

Set Screw Type Fittings – Steel

EMT Fittings

SET SCREW TYPE FITTINGS

Features:

- Tri-head screws may be installed using a slotted, Phillips or Robertson head screwdriver
- Male hub threads – NPSM
- Steel locknuts
- Heavy steel walls
- Standard material: steel
- Standard finish: zinc plated
- Concrete tight when taped

Straight Connectors – Insulated

Available in 7 Colors

Crouse-Hinds series painted EMT fittings consists of set screw, compression, insulated and non-insulated EMT fittings. Although red is the most commonly used, other colors offered include white, blue, green, yellow, black, and orange. These can also be used in architectural design, to better match look and feel to suit architectural specification and preference.

Thin Wall Conduit Fittings (for EMT Conduit)

Set Screw Type Fittings – Space-Saver

SPACE-SAVER EMT SET SCREW CONNECTORS – STEEL

Applications:

- Used to join EMT conduit to box or enclosure

Features:

- Male threads on locknut allow for more room inside the box
- Smooth pulling surface won't strip cable – no bushing or insulated throat required
- Angled teeth on locknut bite into enclosure, preventing loosening from vibration and creating positive ground continuity
- Knurled wrenching surface for easy tightening
- Zinc electroplated for corrosion resistance

SET SCREW CONNECTOR

- Tri-head set screw may be installed using a slotted, Phillips or Robertson head screwdriver

Certifications and Compliances:

- UL and cUL Listed, File No. E-22132
- UL Standard 514B
- Certified by UL to CSA Standard C22.2 No. 18
- Concrete tight when taped

UL File No. E22132

Cat. #	Size	Unit Qty.	Wt. Lbs. Per 100	A	B
SSBC50	1/2"	100	8	1.17	1.14
SSBC75	3/4"	50	12	1.47	1.36
SSBC100	1"	25	12	1.57	1.76

Standard Material:

- Body and nut – steel

Standard Finish:

- Steel – zinc electroplate

A **Male threads** on locknuts thread into the body for a low profile, secure fit – consuming minimal space on the inside of the box or enclosure

B **Smooth pulling surface** on locknuts eliminates the need for plastic bushings and ensures the integrity of wiring during pulling

C **Angled teeth on locknuts** bite into the enclosure, preventing loosening from vibration and creating positive ground continuity

Thin Wall Conduit Fittings (for EMT Conduit)

Set Screw Type Fittings – Zinc Die Cast

EMT Fittings

SET SCREW TYPE FITTINGS – ZINC DIE CAST

Features:

- Tri-head set screw may be installed using a slotted, Phillips or Robertson head screwdriver
- Concrete tight when taped
- Threadless

Standard Material:

- Zinc

Standard Finish:

- Natural

Straight Connectors – Insulated

Thin Wall Conduit Fittings (for EMT Conduit)

Compression Type Fittings – Steel

COMPRESSION TYPE FITTINGS – STEEL

Applications:

Thin wall conduit fittings are used:

- To join EMT to a box or enclosure
- To couple two ends of EMT conduit

Features:

- Compression type
- Threadless
- Male hub threads – NPSM
- Steel locknuts
- Heavy steel walls
- Standard material: steel
- Standard finish: zinc plated

Thin Wall Conduit Fittings (for EMT Conduit)

Compression Type Fittings – Space-Saver

EMT Fittings

SPACE-SAVER EMT COMPRESSION CONNECTORS – STEEL

Applications:

- Used to join EMT conduit to box or enclosure

Features:

- Male threads on locknut allow for more room inside the box
- Smooth pulling surface won't strip cable – no bushing or insulated throat required
- Angled teeth on locknut bite into enclosure, preventing loosening from vibration and creating positive ground continuity
- Knurled wrenching surface for easy tightening
- Zinc electroplated for corrosion resistance

COMPRESSION CONNECTOR

- The split compression ring assures solid attachment to the conduit and positive ground continuity
- The hex surface on the compression nut provides easy wrenching to quickly and easily tighten the nut

Certifications and Compliances:

- UL and cUL Listed, File No. E-22132
- UL Standard 514B
- Certified by UL to CSA Standard C22.2 No. 18
- Concrete tight when taped

Standard Material:

- Body and nut – steel

Standard Finish:

- Steel – zinc electroplate

The Space-Saver EMT Connector provides maximum usable space inside the box unlike a traditional connector with bushing.

Traditional EMT connector protrudes inside box and creates the cumbersome and labor intensive need to clip the device mounting screw to install device.

The Space-Saver EMT Connector's low profile design eliminates this cumbersome and labor intensive requirement.

UL File No. E22132

Cat. #	Size	Unit Qty.	Wt. Lbs. Per 100	A	B
SSC50	1/2"	50	8	1.38	1.15
SSC75	3/8"	25	12	1.55	1.36
SSC100	1"	25	12	1.75	1.76

SPACE-SAVER EMT RAIN TIGHT COMPRESSION CONNECTORS – STEEL

Applications:

- Used to join EMT conduit to box or enclosure – third party certified to more stringent requirements for raintight applications

Features:

- The only Space-Saver EMT Compression Connector UL Listed raintight
- Male threads on the locknut maximize space in box or enclosure and provide a smooth pulling surface, eliminating the need for a bushing or insulated throat fitting
- Angled teeth on locknut bite into enclosure, preventing loosening from vibration
- No disassembly of the gland nut is required for installation of the conduit
- Knurled wrenching surface on body for easy tightening
- Hex shaped gland nut allows for easy wrenching, providing a fast, tight application
- Distinct black gland nut allows inspectors to tell at a glance that the fitting is raintight and suitable for use outdoors
- Gasket seals installation for raintight connection between box and the connector

Certifications and Compliances:

- UL and cUL Listed, File No. E-22132
- UL Standard 514B
- Certified by UL to CSA Standard C22.2 No. 18
- Listed raintight
- Concrete tight

Standard Materials:

- Body and nut – steel
- Gasket – rubber

Standard Finishes:

- Body – zinc electroplate
- Nut – painted black
- Gasket – natural

Thin Wall Conduit Fittings (for EMT Conduit)

Compression Type Fittings – Raintight

COMPRESSION TYPE FITTINGS – RAINTIGHT CONNECTORS

Applications:

- Used to join EMT conduit to a box or enclosure in raintight environments
- The design prevents water seepage into conduit, box or enclosure

Features:

- All steel construction with zinc electroplate finish provides for durable corrosion resistance
- Flat surface on gland nut provides smooth, flat surface for easy wrenching
- Distinct black gland nut provides quick raintight identification
- Integral gasketed compression ring secures and seals for reliable installation
- Interior shoulder conduit stop provides positive seating of conduit inside the body
- Gasket on male threads of box connector seals installation for raintight connection between the box and the connector
- Available in insulated and non-insulated versions to meet any customer preference
- Angled teeth on locknut for secure bite into enclosure
- Extruded locknut with shoulder provides more threads for more secure installation
- Concrete tight
- Threadless
- Standard material: steel
- Standard finish: zinc plated

Certifications and Compliances:

- UL Listed
- cUL Listed
- Concrete tight
- Raintight

Straight Connectors – Insulated – Raintight

Thin Wall Conduit Fittings (for EMT Conduit)

Push-in EMT Raintight Fittings – Zinc Die Cast

EMT Fittings

PUSH-IN EMT RAINLIGHT FITTINGS – ZINC DIE CAST

Applications:

- Used to join EMT conduit to a box or enclosure in raintight environments
- Design prevents water seepage into conduit, box or enclosure

Features:

- Fast installation; fittings push onto the EMT conduit without the use of any tools or additional labor
- No disassembly required
- Available in 1/2" and 3/4" trade sizes for both connectors and couplings
- Available in insulated and non-insulated versions to meet customer preference
- Raintight listed
- Concrete tight
- Patented design

Certifications and Compliances:

- UL and cUL Listed, File No. E-22132

Standard Materials and Finishes:

- Body – zinc die cast, natural
- Gasket – neoprene

Straight Connectors – Non-insulated

Thin Wall Conduit Fittings (for EMT Conduit)

Compression Type Fittings – Zinc Die Cast

COMPRESSION TYPE FITTINGS – ZINC DIE CAST

Features:

- The split compression ring assures solid attachment to the conduit and good ground continuity
- The hex surfaces on the compression nut provide for easy wrenching to quickly and easily tighten the nut
- Concrete tight
- Threadless

Standard Material:

- Zinc

Standard Finish:

- Natural

Thin Wall Conduit Fittings (for EMT Conduit)

Combination Couplings

ACC SERIES COMBINATION COUPLINGS – STEEL

Applications:

- Used to join EMT conduit to armoured cable, metal-clad cable or flexible metallic conduit

Features:

- Dual gripping saddle design on the coupling safely secures cable or conduit in place and prevents loosening from vibration
- Steel compression ring and nut provide a strong, secure termination point for EMT conduit
- #2 tri-head set screw may be installed using a slotted, Phillips or Robertson head screwdriver
- Steel combination coupling is zinc electroplated for corrosion resistance

Certifications and Compliances:

- UL Listed
- cUL Listed

Standard Materials and Finishes:

- Body – steel, zinc electroplated
- Saddle – steel, zinc electroplated
- Screw – steel, zinc electroplated

Thin Wall Conduit Fittings (for EMT Conduit)

EMT Elbows

Applications:

- Elbow “sweeps” are used to make a 45° or 90° bend between two lengths of thin wall or EMT conduit

Features:

- Curvature of the conduit is used to fit specific locations and/or make turns or change directions
- Concrete tight when taped
- Made of steel and zinc plated for corrosion resistance

Certifications and Compliances:

- UL Listed
- cUL Listed

UL File No. E-25501

Rigid/Intermediate Grade Conduit Fittings

Compression Fittings – Type CPR

TYPE CPR COMPRESSION FITTINGS

Applications:

Use type CPR compression fittings for:

- Both IMC and metallic rigid conduit
- New work in poured concrete
- Maintenance, repairs and alterations
- Connections at panels and boxes
- New, altered or damaged stub-ups
- Applicable locations where field threading is impractical or undesirable

Features:

- UL Listed for use with IMC as well as metallic rigid conduit
- Unequaled versatility for the installer
- Unique gland ring design tightens up in fewer turns; provides outstanding pull-out strength; saves time and adds confidence
- Advanced, thoughtful design and premium materials team up for an installation you can be proud of
- Concrete tight
- Threadless

Certifications and Compliances:

- UL/cUL Listed
- UL514B Fittings for Conduit and Outlet Boxes

Standard Materials:

- Bodies – malleable iron
- Compression nuts – iron
- Compression rings – zinc plated steel
- Locknuts – zinc plated steel
- Insuliners – nylon

Straight Connectors – Non-insulated

Rigid/Intermediate Grade Conduit Fittings Concrete Tight

Set Screw Type Fittings – Raintight (SSR Series)

SET SCREW TYPE FITTINGS – RAIN TIGHT

Applications:

Rainboot™ Connectors and Couplings are used with rigid conduit for IMC, steel or aluminum. Outdoors or indoors. Use Rainboot fittings for:

- Conduit systems expansion and alterations
- Maintenance and repair operations
- New, altered or damaged stub-ups
- Connections at panels and boxes
- Embedment in concrete
- Installations in tight quarters: near corners, walls, ceilings, overhangs, obstacles or adjacent raceways
- Situations where threading equipment or heavy pipe wrenches are impractical
- Conduit systems in NEC wet locations

Features:

- The only line of rigid/IMC threadless fittings suitable for raintight applications
- The only alternative to field threading in NEC wet locations
- May be installed in any position
- Tough and durable, long-lasting, trouble-free installations
- Requires only a 3/8" wrench for installation
- Full line – 1/2" through 2"
- Faster, easier method to install raintight rigid/IMC raceway systems

Certifications and Compliances:

- Constructed in accordance but not listed to UL514B

Standard Materials:

- Bodies
Connectors – 1/2" - 2": malleable
Couplings – 1/2" - 2": malleable
- Boots – injection molded PVC attached with special epoxy
- Set screws – hardened steel coated with special sealing resin compound

Straight Connectors – Insulated

Cat. #	Size	Unit Qty.	Wt. Lbs. Per 100
SSR11	1/2"	20	20

SSR25	1 1/2"	4	116
SSR26†	2"	4	165

†Four tightening screws.

Rigid/Intermediate Grade Conduit Fittings

Split Conduit Couplings & Combination Couplings

Rigid Fittings

SPLIT CONDUIT COUPLINGS

Applications:

- Provides a quick and easy method of joining two pieces of threaded rigid or IMC conduit

Features:

- Concrete tight
- Suitable for use in Class I, Division 2 areas

Standard Materials:

- Body – ductile iron
- Clamping hardware – electrogalvanized steel
- Gasket – neoprene

Cat. #	Size	Unit Qty.	Wt. Lbs. Per 100

Rigid/Intermediate Grade Conduit Fittings

Conduit Couplings

THREE-PIECE CONDUIT COUPLINGS – MALLEABLE IRON

Applications:

- Used to join two lengths of threaded conduit; couples conduit when conduit cannot be turned

Features:

- NPSM threads

Standard Materials:

- Heavy duty casting
- Malleable iron

Standard Finish:

- Zinc plated

Options:

Description

- Hot dip galvanized **Suffix HDG**

Malleable Iron (Concrete Tight)

NO DISASSEMBLY RAIN-TIGHT THREE-PIECE CONDUIT COUPLINGS – STEEL

Applications:

- Used to join two lengths of rigid and IMC conduit together in applications where conduit cannot be turned
- Unique design allows for a quick and easy install which translates into labor savings when compared with traditional fittings

Features:

- Manufactured out of steel to provide mechanical protection and solid grounding of one conduit to another
- Zinc electroplated design which protects against corrosion in damp locations
- No disassembly design which allows for the pairing of two pieces of conduit without the hassle of taking apart the fitting; conduit is input on each end of the coupling and the locknut is tightened down to provide quick and easy raintight seal
- Neoprene rubber o-ring which prevents against the penetration of water or moisture
- RoHS compliant

Standard Materials:

- Body and gland nut – steel
- O-ring – neoprene rubber

Standard Finish:

- Zinc electroplated

Rigid/Intermediate Grade Conduit Fittings

Rigid Elbows

RIGID ELBOWS – STEEL

Applications:

- Used in conjunction with rigid couplings (catalog numbers RC50-RC400) to make a 45° or 90° bend between two lengths of threaded rigid or IMC conduit

Features:

- Curvature of the conduit is used to fit specific locations and/or make turns or change directions in the installation
- Can be used in both indoor and outdoor applications, offering the customer increased flexibility
- Made of steel and galvanized for corrosion resistance

Certifications and Compliances:

- UL Listed
- cUL Listed

Standard Material:

- Steel

Rigid/Intermediate Grade Conduit Fittings

Mogul Pulling Elbows

MOGUL PULLING ELBOWS – DIE CAST COPPER-FREE ALUMINUM

Rigid Fittings

Applications:

- Used as a chamber for containing heavy duty conductors
- For use as a chamber for containing a 90° turn in large stiff conductors to change conductor direction or to enter buildings
- For use as a pull box for pulling large conductors
- For use as a chamber for making splices and taps
- Can be used as an accessible opening to accommodate future changes of the system

Features:

- Large dome cover permits easy, straight through pull
- Dimension from center line of back hub to bushing of end hub exceeds six times the trade diameter of the conduit
- Tapered threads provide easy assembly, tight construction
- Heavy duty machine screws for cover
- Cover gasket provides long, dependable service and protection against the elements, such as fuel, oil and water
- Smooth design and finish make handling easy and complement any construction job
- Body and cover: die cast copper-free aluminum
- Gasket: fuel-, oil- and water-resistant flex seal

Certifications and Compliances:

- UL Standard 514A
- NEC: Article 314
- CSA C22.2 No. 18
- CEC: 22.1

Standard Finish:

- Corrosion-resistant metallic paint

UL File No. E-15022

Mogul Pulling Elbows facilitate wire pulling in 90° bends to allow changes in conductor direction. The pulling elbows can also be used to allow conductor entrance into buildings. With the smooth finish and large dome cover, wires can be easily pulled through without compromising the wire insulation. The gasketed cover creates a raintight chamber and the copper-free aluminum construction provides increased corrosion resistance, making the mogul pulling elbow ideal for any outdoor application.

Rigid/Intermediate Grade Conduit Fittings

Grounding Bushings

INSULATED THROAT GROUNDING BUSHINGS – MALLEABLE IRON

Applications:

- For use on threaded rigid/IMC conduit to provide a means of grounding conduit through an insulated bushing

Features:

- Resilient plastic liner, resists corrosion, chemicals and temperature extremes
- Insuliner – ULTEM1000 rated at 150°C
- One set screw provided with each fitting; locks bushing in any desired position
- External stainless steel hardware as standard
- Steel screws are standard

Standard Finish:

- Zinc plated

150°C Rated Aluminum Lug – for Copper or Aluminum Grounding Conductors – Threaded

UL File No. E-6225

Rigid/Intermediate Grade Conduit Fittings

Conduit Clamps, Straps, Hangers

J TYPE CONDUIT BEAM CLAMPS – IRON

Features:

JCC Series Conduit Beam Clamps are:

- Available in 1/2" to 4" sizes
- Suitable for IMC, EMT and rigid conduit
- Designed to exceed UL load requirements
- Made from ductile iron with an electrogalvanized finish
- Designed to support conduit on vertical or horizontal beams

UL File No. E-184283

Rigid/Intermediate Grade Conduit Fittings

Sealing Locknuts & Bush-Lok™ Bushing/Locknut Combination Fittings

SEALING LOCKNUTS

Applications:

Only one sealing locknut is required to:

- Functionally replace rigid threaded enclosure connectors
- Provide raintight, watertight or oiltight seal in any position
- Provide positive ground connection
- Provide economies in installation and fitting costs

Features:

- Integrally fused PVC gasket provides positive seal against water, oils and other liquids
- Designed for use with raintight, watertight and oiltight enclosures, NEMA 2, 3, 3R, 4 and 12
- UL Listed raintight
- UL Listed liquidtight
- Can be used with either sheet metal or standard cast metal boxes
- 1/2" to 2" heavy duty steel
- 2 1/2" to 6" malleable iron

UL File No. E-19189

BUSH-LOK™ BUSHING/LOCKNUT COMBINATION FITTINGS – STEEL 150°C Rated

Patented!

Applications:

- The Bush-Lok eliminates the need to use a locknut and bushing when entering a box or enclosure; it's an all-in-one bushing/locknut combination that allows the installer to use one fitting instead of having to piece together parts; also solves the problem of not enough thread left to engage the bushing after installing a locknut into a box or enclosure
- For use with rigid/IMC conduit and with other threaded fittings

Features:

- Offered in most common trade sizes – 1/2", 3/4" and 1"
- NPSM – straight threads
- The innovative bushing/locknut combination uses one fitting instead of having to piece together parts
- Bush-Lok solves the problem of installing a locknut and a bushing and then not having enough thread left to engage the bushing
- Allows for more working capacity inside a box or enclosure
- Non-metallic insuliner will not chip, crack, swell or shrink; it resists corrosion, chemicals and temperature extremes and provides a smooth pulling surface for conductors
- Angled teeth on body provide solid connection for ground continuity and a secure installation

Certifications and Compliances:

- cULus
- UL File No. E-19189

Standard Materials and Finishes:

- Body – steel, zinc plated
- Insuliner – non-metallic, high temperature rated up to 150°C

UL File No. E-19189

Rigid/Intermediate Grade Conduit Fittings

Galvanized Rigid Conduit Nipples

GALVANIZED RIGID CONDUIT NIPPLES – STEEL

Applications:

- For use with rigid and IMC conduit to join two enclosures or conduit bodies together

Features:

- Designed for use with threaded rigid conduit
- NPT threads with end cap on each end

Rigid Fittings

Certifications and Compliances:

- cULus Listed
- Galvanized Rigid Nipples meet UL6 and ANSI C80.1
- UL File No. E-25501

Rigid/Intermediate Grade Conduit Fittings

Rigid Conduit Nipples

RIGID CONDUIT NIPPLES – ALUMINUM

Applications:

- For use with rigid and IMC conduit to join two enclosures or conduit bodies together

Features:

- Can be used in both indoor and outdoor applications, offering customer increased flexibility
- Can be used in hazardous and non-hazardous locations
- Available from close to 12" to suit customer application
- NPT threads

Certifications and Compliances:

- UL File No. E-324286

Rigid/Intermediate Grade Conduit Fittings

Push Plugs, Snap-in Blanks, Reducing Washers

Rigid Fittings

PUSH PLUGS – PLASTIC

Applications:

- Used to plug knockouts on enclosures to prevent moisture, dust and debris from entering the enclosure during shipment or install
- Plugs are wider than size listed to ensure secure connection in enclosure
- Temperature rating: 180°F to 200°F
- Tensile strength: 600-2300 PSI

Rigid/Intermediate Grade Conduit Fittings

Concrete Slab Inserts

CONCRETE SLAB INSERTS – 90 DEGREE

Applications:

- For use with rigid and IMC
- For conduit installed in poured concrete slabs
- 90 degree design eliminates the need to bend conduit
- Provides flush threaded conduit hub for connecting rigid and IMC conduit and allows future access to conduit system
- Used in in-slab ceiling and floor poured applications

Standard Material:

- Zinc die cast

Series 5

Die Cast Aluminum Conduit Outlet Bodies, Covers & Gaskets

Series 5 die cast copper-free aluminum conduit bodies, covers and gaskets are available for use with rigid or EMT conduit (with set screw). Conduit bodies are available in trade sizes 1/2" to 4", in the most popular conduit body shapes (C, LB, LL, LR, T) and 1/2" to 2" in TB and X shapes. The Series 5 family is available as components or pre-packaged in various configurations as a SnapPack™ assembly. In addition, Series 5 is completely interchangeable with other manufacturers.

Applications:

- Act as pull outlets for conductors being installed
- Provide openings for making splices and taps in conductors
- Act as mounting outlets for lighting fixtures and wiring devices
- Connect conduit sections
- Provide taps for branch conduit runs
- Make 90° bends in conduit runs
- Provide for access to conductors for maintenance and future system changes

Features:

- Die cast copper-free aluminum construction is lightweight and corrosion-resistant for long, reliable service
- Epoxy powder coat finish provides additional corrosion resistance and an aesthetically-pleasing appearance
- Conduit bodies are supplied with threaded hubs for use with rigid/IMC conduit or as a combination body
- Combination bodies are supplied with tri-head set screws (slotted, Phillips, Robertson) for use with EMT or rigid/IMC conduit on trade sizes 1/2" to 2"
- Domed aluminum cover provides additional cubic capacity
- Perforated center gasket that can be easily removed, if desired
- SnapPack™ available in choice of three configurations to match customer preferences

Certifications and Compliances:

- UL Listed
- cUL Listed
- UL File No. E-15022
- Suitable for wet locations (1/2" to 2" rigid bodies)
- Suitable for NEMA 4 (1/2" to 1" rigid bodies with integral gasket cover)

Standard Materials and Finishes:

- Bodies – copper-free aluminum with epoxy powder paint
- Covers – aluminum with stainless steel screws, natural
- Gaskets – neoprene, natural

Series 5

Integral gasket covers. The sheet aluminum covers feature a raised dome with stainless steel screws supplied with nylon washers and a gasket for simplifying installation—reducing inventory and labor costs. These innovative covers are UL and cUL Listed and are NEMA 4 rated 1/2" to 1" trade sizes with rigid bodies.

SnapPack™. Designed for ordering and receiving convenience, the SnapPack combines a body, gasket and sheet aluminum cover in a single assembly.

1 Rigid body with traditional cover and gasket (e.g. LB15 CGN)

2 Combination body with traditional cover and gasket (e.g. LB15 MTC)

3 **NEMA 4** rigid body with integral gasketed cover (e.g. X15 ICG)

Form 5 Conduit Outlet Bodies, Covers & Gaskets – Malleable Iron

Applications:

Form 5 Malleable Iron Conduit Bodies are used in conduit systems to:

- Act as pull outlets for conductors being installed
- Provide openings for making splices and taps in conductors
- Act as mounting outlets for lighting fixtures and wiring devices
- Connect conduit sections
- Provide taps for branch conduit runs
- Make 90 degree bends in conduit runs
- Provide for access to conductors for maintenance and future system changes

Features:

- Interchangeable with Appleton Form 35 Conduit Bodies
- Built-in rollers on 1 1/4" to 4" C and LB bodies to facilitate wire pulling
- Smooth and rounded integral bushings for protection of wire insulation
- Solid neoprene gaskets may be converted to open type by pulling out perforated center section
- Stainless steel cover screws
- Domed sheet steel covers provide additional cubic capacity
- Integral gasket cover provides NEMA 4 rating

Certifications and Compliances:

- UL File No. E-15022
- UL Standard 514B
- cUL/CSA to CSA Standard C22.2 No. 18

Standard Materials:

- Bodies – malleable iron
- Gaskets – neoprene
- Covers – sheet steel or malleable
- Cover screws – stainless steel

Form 35 is a registered trademark of Appleton Electric/EGS.

Form 5

Standard Finishes:

- Malleable iron – electrogalvanized and aluminum acrylic paint
- Neoprene – natural
- Sheet steel – electrogalvanized
- Stainless steel – natural

Options:

Description	Suffix
• Hot dip galvanized	HDG

Form 5 Conduit Outlet Bodies, Covers & Gaskets – Malleable Iron

Cast Device Boxes

FS & FD Boxes

Applications:

Cast device boxes are installed to:

- Accommodate wiring devices
- Act as pull boxes for conductors in a conduit system
- Provide openings to make splices and taps in conductors
- Use indoors and outdoors
- Use in applications where boxes may be subjected to rough use

Features:

- Green ground screw is located on the flange of the box for easy ground wire termination and is standard on boxes
- Suitable for use in wet locations when used with gasket and flat blank covers
- Mounting lugs standard
- Tapered threaded hubs (NPT) with integral bushing
- Available as shallow (FS) or deep (FD) configuration
- Ample wiring room provided in either FS or FD configuration
- Wide selection of surface or flush covers available in three materials (sheet malleable, steel, aluminum)
- Malleable iron construction provides high tensile strength for strong, dependable service
- Covers are individually bagged and supplied with screws

Certifications and Compliances:

- cULus
- cCSAus

Cast Device Boxes

Cast Device Boxes

VXF Stainless Steel Junction Boxes

Applications:

For use where high quality, durable products that withstand corrosion, chemical treatments and wash downs are required, including:

- Wastewater treatment plants
- Food and beverage facilities
- Pharmaceutical plants
- Pulp and paper mills
- Mines

VXF Stainless Steel Junction Boxes are installed in threaded rigid conduit systems to:

- Act as junction boxes for making terminations
- Act as pull outlets

Features:

VXF Junction Box

Includes:

- Four tapped conduit openings with three 316 stainless steel installed recessed hex plugs
- Four 1/4-20 x 1" stainless steel hex head bolts for mounting box to surface
- One 10-32 x 1/4" installed green ground screw with slotted head

VXF Hub Cover

Includes:

- Fixture rated up to 130 lbs. with VXF body
- Neoprene gasket
- Four 1/4-20 x 5/8" stainless steel hex head bolts and lock washer for cover attachment to box
- One 10-24 x 5/8" Phillips pan head set screw

VXF Blank Cover

Includes:

- Neoprene gasket
- Four 1/4-20 x 5/8" stainless steel hex head bolts for cover attachment to box
- GRF10SS comes with PVC protective peel off coating

GRF Replacement Gasket

Includes:

- Neoprene gasket

Certifications and Compliances:

- UL/cUL Listed, File No. E-15022
- NEC/CEC
 - Class I, Division 2
 - Class II, Divisions 1 & 2
 - Class III
- Fixture rated (with pendant cover)
- UL514A
- Wet locations
- NEMA 4X
- Assembled in the USA

Standard Materials:

- Body, plugs and cover – 316 stainless steel
- Nuts and washers – stainless steel
- Gasket – neoprene

Standard Finishes:

- Body, plugs, nuts and washer – natural
- GRF10SS – natural with #4 brushed finish

VXF JUNCTION BOXES

VXF12SS	3/4" Pendant Cover with Gasket

VXF BLANK COVER

Cat. #	Description
GRF10SS	Flat Cover with Gasket

GRF REPLACEMENT GASKET

Cat. #	Description
GASK643	Neoprene Gasket

Applications:

- Myers™ Hubs are used in the termination of electrical circuits through wall of the enclosure
- Designed for use indoors or outdoors with rigid conduit and IMC
- Ideal for pharmaceutical, chemical and food processing, pulp/paper, nuclear, solar and commercial construction applications
- Resistant to a variety of chemicals, including acetic, citric and salt water
- Special design of o-ring gasket provides excellent environmental ratings and chemical resistance
- Hub is provided with a stainless steel ground nut

Features:

- Wide range of styles, trade sizes and materials to meet customer requirements and preferences
- Multiple certifications provide users peace of mind
- Easy installation and smooth pulling service for labor savings
- Tapered female threads for rigid/IMC conduit, NPSM male threads

Certifications and Compliances:

- NEC/CEC:
 - Class I, Division 2
 - Class II, Divisions 1 & 2
 - Class III, Divisions 1 & 2
 - Class I, Zone 1, AEx e II
 - Class I, Zone 1, Ex e II
- UL Listed – UL Standard 514B
- CSA certified – certified by UL to CSA Standard C22.2 No. 18
- NEMA Type 2, 3, 3R, 4, 4X, 12 (std. hub and ground hub)
- IEC:
 - ATEX certified to EN60079-0:2009, EN60079-7:2007 and EN60079-14 standards
 - ATEX certified – ITS12ATEX47591X II 2G Ex e IIC Gb Ta (-15°C to 120°C)
 - IECEx certified – IECEx ETL 12.0009X to IEC 60079-0:2007-10, Edition 5 and IEC 60079-7:2006-07, Edition 4
 - IECEx – Ex e II Gb Ta (-15°C to 120°C)
 - IP66

Standard Materials:

- Nut – zinc (Zamek-2, Zamek-3); aluminum (Al 360); stainless (316)
- Body – zinc (Zamek-2, Zamek-3); aluminum (Al 360); stainless (316)
- Insuliner – Lexan
- O-ring gasket – nitrile; Viton for ATEX versions
- Ground screw – steel/stainless steel

Standard Finishes:

- Aluminum – natural
- Zinc – natural
- Stainless – natural

Options:

- | Description | Suffix |
|--|-----------|
| • Nickel-chrome plate finish (available on zinc hubs only) | CP |

Design Features

- A Vibration-proof** - Strong, oversize nut with radial serrations assures flush installation and positive grounding.
- B Grounding Screw** for added safety.
- C Captive O-ring Gasket** - Impervious to corrosive moisture and petroleum products. Gasket assures positive water and dusttight installations.
- D Precision Machine Cut Threads** - Positive fit and simple installation.
- E No Welding** - Unique serrations on both nut and hub bite into metal, assuring a positive electrical ground. (UL approved for use with service entrance conduit).
- F Posi-Lok Insulated Throat** - Cannot come out. Standard in sizes from 1/2" through 4".

Hub Basic Scru-Tite®

Hubs are ideal for general use with rigid conduit. Provides positive seal and electrical ground.

Available in trade sizes 3/8" through 6"

Ground Hub

Combines all of the features of the Hub Basic Scru-Tite® plus the additional feature of the grounding screw on the locknut.

Available in trade sizes 1/2" through 6"

ATEX Rated Hub

Hub is listed for use in hazardous (classified) locations to IECEx/ATEX certifications. Ideal for global requirements and OEMs shipping material worldwide.

Available in trade sizes 1/2" through 4"

Through-bulkhead Fitting

Hubs are the perfect method for installing hubs on cast boxes or through thicker walls.

Metric to NPT Adapter

Used to convert a threaded metric entry to an NPT entry.

Drain Plugs

Designed to install in the bottom of an enclosure to drain any accumulated condensation. Available in aluminum or stainless steel construction.

Cap-off

Designed to install in enclosure to provide environmental cap for unused entries or knockouts.

HUB BASIC SCR-U-TITE® – NEMA 2, 3, 3R, 4, 4X, 12

Minimum space from center of pipe or conduit to nearest obstruction.

1. Dimensions in top row (boxed squares) are centers for conduits of same size.

Example: How close may 3" conduits be spaced? Answer 4 1/2".

2. Dimensions in gray shaded squares are for centers of conduits

NOT of the same size. Example: What is the minimum spacing for 2" and 3/4" conduit? Read down column marked 3/4" to figure opposite 2" and find dimension is 2 19/32".

Note: Minimum spacing dimensions as shown will give approximately 1/8" clearance between locking nuts.

Minimum space from center of pipe or conduit to nearest obstruction

Commercial Hubs

Features:

- Commercial Hubs are dependable low profile hubs that meet the requirements of UL standards
- Neoprene grade chloroprene gasket firms into an elastic compound (similar to rubber) and provides environmental protection for industrial applications
- Medium viscosity flame retardant insuliner provides a smooth pulling surface
- Cast threads to meet UL standards and allow quick and easy installation
- Hex surfaces on the body make tightening with a wrench easy
- Thinner, lighter weight construction
- Available in standard and grounded version to meet customer preferences

Certifications and Compliances:

NEC/CEC:

- Class I, Division 2
- Class II, Divisions 1 & 2
- Class III, Divisions 1 & 2
- UL and cUL Listed
- UL File No. E-19189
- Suitable for wet locations

Conduit Hubs

The use of rigid/IMC conduit remains the preferred choice in many applications because of the physical protection of conductors and long service life of the installation. Consequently, the need to terminate conduit into a box or enclosure creates the need for a hub.

The Commercial Hub has been developed to provide a lightweight hub that installs quickly and easily, providing a secure termination.

Standard Materials and Finishes:

- Body and nut – corrosion-resistant Zamek-2 and Zamek-3 type zinc
- Gasket – neoprene grade chloroprene
- Insuliner – Lexan 920A, medium viscosity flame retardant grade
- Finish – natural

Conduit Hubs

CONDUIT HUBS – MALLEABLE IRON

Applications:

- Ideal for terminating electrical conduit through the walls of enclosures
- Designed for use indoors or outdoors with rigid conduit and IMC; specific applications include: food processing plants, distilleries, breweries, sewage disposal plants, chemical plants, paper processing mills and refineries

Features:

- Male thread type
- Tapered female thread for rigid conduit and IMC
- Recessed o-ring gasket assures raintight and secure environmental connections
- Insulated throat provides smooth pulling surface
- Locking screw on the nut doubles as a grounding screw for added safety
- Complete size range from 1/2" to 6"
- Hubs fit standard knockouts; no special tools required

Certifications and Compliances:

- Class I, Division 2
- Class II, Divisions 1 & 2
- Class III, Divisions 1 & 2
- UL Standard 514B
- cUL Listed – Certified by UL to CSA Standard C22.2 No. 18
- NEMA: FB-1
- Suitable for wet locations
- RoHS compliant

Standard Material and Finish:

- Material – malleable iron
- Finish – zinc electroplate

Conduit Hubs

Conduit Hubs

CONDUIT HUBS – IRON SPACE-SAVER

Applications:

- Ideal for terminating rigid/IMC conduit through the walls of enclosures
- Designed for use indoors or outdoors with rigid and IMC conduit; specific applications include: food processing plants, distilleries, breweries, sewage disposal plants, chemical plants, paper processing mills and refineries

Features:

- Male thread is on the nut for a low profile, space saving fit
- Quick and easy when installing rigid conduit nipple between two existing enclosures
- Insulated throat provides smooth pulling surface
- Furnished with SG sealing gasket
- Hub fits standard knockouts; no special tools required

Certifications and Compliances:

- Class I, Division 2
- Class II, Divisions 1 & 2
- Class III, Division 1 & 2
- UL and cUL Listed, File No. E-19189
- UL Standard 514B
- Certified by UL to CSA Standard C22.2 No. 18
- Suitable for wet locations

Standard Materials:

- Body and nut – malleable iron
- Sealing ring – steel and rubber

Standard Finishes:

- Body and nut – zinc electroplate
- Sealing ring – natural

XD Deflection Couplings

Applications:

XD Couplings can be installed indoors, outdoors, buried underground or embedded in concrete in non-hazardous areas. XDs are used with standard rigid conduit or PVC rigid conduit. (PVC requires rigid metal conduit nipples and rigid metal-to-PVC conduit adapters). XDs provide a flexible and watertight connection for protection of conduit wiring systems from damage due to movement.

Typical applications include:

- Underground conduit feeder runs
- Runs between sections of concrete subject to relative movement
- Runs between fixed structures
- Conduit entrances in high rise buildings
- Bridges
- Marinas, docks, piers

Features:

- XD Couplings accommodate the following movements without collapsing or fracturing the conduit, and damaging the wires it contains:
 1. Axial expansion or contraction up to $\frac{3}{4}$ "
 2. Angular misalignment of the axes of the coupled conduit runs in any direction to 30°
 3. Parallel misalignment of the axes of coupled conduit runs in any direction to $\frac{3}{4}$ "
- Inner sleeve maintains constant I.D. in any position and provides a smooth insulated wireway for protection of wire insulation
- Watertight flexible neoprene outer jacket is corrosion-resistant and protects the grounding strap and the attachment points of the hubs
- Tinned copper flexible braid grounding straps assure grounding continuity
- Stainless steel jacket clamps for strength and corrosion resistance
- Standard tapered electrical threads fit standard rigid conduit
- Integral hub bushing protects insulation of conductors

Certifications and Compliances:

- UL Standard 514B
- CSA 22.2 No. 18 3-12
- Wet locations

Options:

- Description** **Suffix**
- Hot dip galvanized **HGD**

Size Ranges:

- 1" to 6" (smaller sizes can be obtained by using reducing bushings)

Standard Materials and Finishes:

Hubs:

- Feraloy® iron alloy – electrogalvanized

Outer Jacket:

- Molded neoprene – natural (black)

Jacket Clamps:

- Stainless steel – natural

Inner Sleeve:

- Molded plastic – natural (brown)

Bonding Strap:

- Braided tinned copper

1. Axial expansion/contraction

2. Angular misalignment

3. Parallel misalignment

Dimensions (in Inches):

Conduit Size	Cat. #	A Dia.	B Length
1"	XD3*	7	$3^{15}/16$
1 $\frac{1}{4}$ "	XD4	$7^{3}/8$	$4^{1}/4$
1 $\frac{1}{2}$ "	XD5	$7^{1}/4$	$4^{1}/2$
2"	XD6	$7^{1}/4$	$4^{15}/16$
2 $\frac{1}{2}$ "	XD7	$7^{1}/2$	$5^{5}/16$
3"	XD8	$7^{5}/8$	$5^{15}/16$
3 $\frac{1}{2}$ "	XD9	$7^{3}/4$	$6^{1}/2$
4"	XD010	$7^{7}/8$	$6^{15}/16$
5"	XD012	$7^{3}/4$	8
6"	XD014	$8^{3}/8$	9

* $\frac{3}{4}$ " trade size can be created using third party certified 1" - $\frac{3}{4}$ " reducing bushings.

XJG Rigid/IMC Expansion Couplings

Applications:

XJG Expansion Couplings are used with rigid metal conduit and IMC:

- To couple together two sections of conduit subject to longitudinal movement
- In conduit runs to prevent damage to conduit supports such as in a building or on a bridge
- Indoors or outdoors in long conduit runs to permit linear movement caused by thermal expansion and contraction
- In conduit runs that cross structural joints
- On long conduit runs to prevent conduit from buckling and ensuing circuit failures

Features:

- Weatherproof and approved for use indoors or outdoors without an external bonding jumper
- Available in 1/2" through 6" trade sizes
- For use with rigid metal and IMC conduit
- Available in 4" and 8" maximum conduit movement
- Internal bonding springs and metallic bushings create high integrity internal ground connection and eliminate need for external bonding jumpers and clamps (up to 4" trade size)
- Optional redundant tinned copper bonding jumpers (BJ Series – ordered separately)
- UL Listed for use in wet locations
- Patented design

Certifications and Compliances:

- UL Standard 514B
- CSA 22.2 No. 18 3-12
- NEMA FB1
- Wet locations
- Third party certified as an effective grounding means (i.e. the path to ground is permanent and continuous), for two sections of conduit subject to expansion or contraction

Options:

- | Description | Suffix |
|--|---------------------------|
| • Available in copper-free aluminum (not available on 5" and 6" sizes)..... | SA |
| • Hot dip galvanized | HDG |
| • Available with redundant bonding jumper for visible indication of bonding (BJ Series)† | (Order Separately) |

Standard Materials and Finishes:

Body

- Steel – electrogalvanized
- Copper-free aluminum – natural
- *Feraloy*® iron alloy – electrogalvanized (5" and 6" only)

Reducer & Gland Nut

- 1/2" through 1": steel – electrogalvanized
- 1 1/4" through 6": *Feraloy* iron alloy – electrogalvanized and aluminum paint
- Copper-free aluminum – natural

Packing

- PTFE composite

Washer & Bushing

- Steel – electrogalvanized

Gasket

- Vellum

Ground Springs

- Phosphor bronze – electrogalvanized

Ground Strap

- Braided tinned copper

U-bolts

- Malleable iron – electrogalvanized

†XJG Expansion Couplings use a metallic bushing and ground springs to create a high integrity internal ground connection. External ground straps offer a redundant ground path and easy visible indication of ground.

‡XJ128 and XJ148 are not internally grounded. A pair of 36" bonding jumpers are provided with fitting.

XJG EMT Expansion Couplings

Applications:

XJG EMT Expansion Couplings are used with EMT conduit:

- To couple together two sections of conduit subject to longitudinal movement
- In conduit runs to prevent damage to conduit supports such as in a building or on a bridge
- Indoors or outdoors in long conduit runs to permit linear movement caused by thermal expansion and contraction
- In conduit runs that cross structural joints
- On long conduit runs to prevent conduit from buckling and ensuing circuit failures

Features:

- Weatherproof and approved for use indoors or outdoors without an external bonding jumper
- Available in 1/2" through 4" trade sizes
- For use with EMT conduit
- Available in 4" maximum conduit movement
- Internal bonding springs and metallic bushings create high integrity internal ground connection and eliminate need for external bonding jumpers and clamps (up to 4" trade size)
- Optional redundant tinned copper bonding jumpers (BJ Series – ordered separately)
- UL Listed for use in wet locations
- Flat surface on gland nut provides smooth, flat surface for easy wrenching
- Distinct black gland nut provides quick identification as a wet location fitting
- Patented design

Certifications and Compliances:

- UL Standard 514B
- CSA 22.2 No. 18 3-12
- NEMA FB1
- Wet locations

XJGD Rigid/IMC Expansion/Deflection Couplings

Applications:

XJGD Combination Expansion/Deflection Couplings are used with rigid metal conduit and IMC:

- To couple together two sections of conduit subject to longitudinal movement
- To accommodate axial expansion, angular misalignment and parallel misalignment
- Indoors or outdoors in long conduit runs to permit linear and axial movement caused by thermal expansion and contraction
- To maintain electrical continuity without the need for an external bonding jumper and clamps
- In conduit runs that cross structural joints
- In conduit runs to prevent damage to conduit supports such as in a building or on a bridge
- On long conduit runs to prevent conduit from buckling and ensuing conduit failures

Features:

- XJGD fittings are weatherproof and approved for use indoors or outdoors without an external bonding jumper
- Available in 1/2" through 4" trade sizes
- For use with rigid metal and IMC conduit
- Available in 4" maximum conduit movement
- XJGD Couplings include XD Couplings, which accommodate the following movements without collapsing or fracturing the conduit, and damaging the wires it contains:
 1. Axial expansion or contraction up to 3/4"
 2. Angular misalignment of the axes of the coupled conduit runs in any direction to 30°
 3. Parallel misalignment of the axes of coupled conduit runs in any direction to 3/4"
- XD component includes inner sleeve which maintains constant I.D. in any position and provides a smooth insulated wireway for protection of wire insulation
- XD component contains a watertight flexible neoprene outer jacket which is corrosion-resistant and protects the grounding strap and the attachment points of the hubs
- XD component includes stainless steel jacket clamps for strength and corrosion resistance
- XJG component includes internal bonding springs and metallic bushings to create high integrity internal ground connection and eliminate need for external bonding jumpers and clamps (up to 4" trade size)

Features (continued):

- Optional redundant tinned copper flexible braid bonding jumpers assure continuity (BJ Series – ordered separately)
- UL Listed for use in wet locations
- NPT threads fit standard rigid conduit
- Patented design

Certifications and Compliances:

- UL Standard 514B
- CSA 22.2 No. 18 3-12
- Wet locations

Standard Materials and Finishes:

Body, Hubs, Gland Nut, Washer & Bushing:

- Feraloy® iron alloy – electrogalvanized

Packing:

Liquidtight Fittings

Overview

Our liquidtight product line offers high quality, high performance fittings. Designed to the toughest standards and integrating the latest technology, not only do you get a reliable and durable product, you also get one that reduces installation time and cost. Our versatile lines of liquidtight fittings are designed for a wide range of industrial, commercial and residential applications. Choose from our Liquidator™, LiQuik™, zinc die cast, non-metallic or low profile liquidtight fittings.

Liquidtight Fittings Selection Chart:

	Family	Material	Size/Range	Configurations	Typical Applications
	Liquidator™	Malleable Iron	3/8" - 6"	Straight, 45°, 90°	For use with LFMC in tough, industrial, corrosive applications
	Liquidator LT SA Aluminum	Copper-free Aluminum	3/8" - 4"	Straight (3/8" through 4"), 90° (3/8" through 2")	Used where aluminum material is preferred in tough, industrial, corrosive applications
	LTK Low Profile	Steel/Malleable Iron	3/8" - 2"	Straight, 45°, 90°	Used where there are space restrictions in tough, industrial, corrosive applications
	LTQ LiQuik™	Malleable Iron	3/8" - 2"	Straight (3/8" through 2"), 45° & 90° (1/2" through 1")	Labor saving, no disassembly, in tough, industrial, corrosive applications
	LTDC Zinc Die Cast	Zinc Die Cast	3/8" - 4"	Straight, 90°	Used where zinc die cast material is preferred in tough, industrial, corrosive applications
	LTNM Non-metallic	Nylon	3/8" - 2"	Straight, 90°	Use with non-metallic Type B LT conduit in corrosive, commercial and residential applications
	LT US Product of the USA	Steel/Malleable Iron	3/8" - 4"	Straight, 45°, 90°	When Product of the USA material is specified in tough, industrial, corrosive applications
	LTS Steel	Tubular Steel	1/2" - 2"	Straight Only	For use in cost-competitive applications in light industrial and commercial applications
	LT SS Stainless Steel	304 Stainless Steel	1/2" - 2"	Straight, 90°	Used where corrosion resistance is required in tough, industrial, corrosive applications
	Space-Saver	Malleable Iron	3/8" - 1"	Straight Only	Used where space restrictions occur in tough, industrial, corrosive applications

Liquidtight

Product Features	User Benefits
UL Listed; cUL certified	Assurance of safe and reliable performance; end-user peace of mind
Provides protection in wet locations	Meets NEC and UL requirements for use in wet locations; reduces downtime and replacement costs
Available in various configurations in various trade sizes and materials	Complete selection of styles and sizes; easy selection from one source, saves time and money
Hex surfaces on gland nut and body	Easy wrenching; fast, easy installation results in labor savings
Sealing gasket effectively seals out water, oil, dust and dirt	Eliminates leakage, potential downtime and replacement costs
Locknut bites into box; won't vibrate loose	Provides a reliable ground and safety of personnel and equipment
Cupped long grounding ferrule is distortion-free	Provides excellent pull-out strength, prevents conduit pop-out and provides grounding for safety of personnel and equipment
Concrete tight	Provides rugged durability in concrete applications

Liquidtight Fittings

Overview

Applications:

Typical applications for liquidtight conduit and liquidtight fittings include the wiring of machine tools, motors, transformers, food processing equipment, robotics, air conditioning units, illuminated storefront signs and billboards, etc. The flexible metallic conduit and fittings protect conductors from mechanical damage due to vibration and movement, and seal out cutting oils, coolants, water, dust, etc. Applications such as these can be found in, but are not limited to, industries such as:

- Machine tool manufacturers
- Electric power generating plants
- Waste treatment facilities
- Paint manufacturing facilities
- Automobile manufacturing facilities
- Aerospace industries
- Breweries
- Food processing plants
- Dairies
- Pulp and paper mills
- Petroleum refineries
- Chemical and petrochemical plants

Features:

- Liquidtight, raintight, oiltight for protection and long life in wet, dusty and corrosive environments
- Hex shaped gland nut allows for easy wrenching, providing a fast, tight installation
- Suitable for wet locations
- Reusable, long ferrule prevents pull-out and tight bend conduit pop-out
- Furnished with locknut and sealing ring
- Third party certified
- Available in insulated and non-insulated versions to meet any customer preference

Certifications and Compliances:

- UL Listed liquidtight flexible metal conduit fittings are suitable for use in the following hazardous locations under NEC:
 - Class I, Division 2;
 - Class II, Divisions 1 & 2; and
 - Class III, Divisions 1 & 2;
 - Suitable for grounding in sizes 3/8" through 1 1/4" under NEC
- UL Standards 514B, 467
- cUL Standard C22.2 No. 18F
- UL File No. E-19189

Liquidtight Fittings

Liquidator™ Flexible Metallic Conduit Fittings

Applications:

- Liquidator™ Fittings are used when liquidtight conduit is in tough, industrial and corrosive applications
- Available in both malleable iron and aluminum construction with the option of a ground lug pre-attached

Features:

- Liquidtight, raintight, oiltight for protection and long life in wet, dusty and corrosive environments
- Hex shaped gland nut allows for easy wrenching, providing a fast, tight installation
- Suitable for wet locations
- Reusable, long ferrule prevents pull-out and tight bend conduit pop-out
- Furnished with locknut and sealing ring
- Third party certified
- Available in malleable iron and aluminum construction
- Available in straight, 90 and 45 degree configurations
- Available in sizes $\frac{3}{8}$ " to 6" (select sizes)
- Available in insulated and non-insulated versions to meet any customer preference

Certifications and Compliances:

- UL Listed liquidtight flexible metal conduit fittings are suitable for use in the following hazardous locations under NEC:
 - Class I, Division 2;
 - Class II, Divisions 1 & 2; and
 - Class III, Divisions 1 & 2;
 - Suitable for grounding in sizes $\frac{3}{8}$ " through $1\frac{1}{4}$ " under NEC
- UL Standards 514B, 467
- cUL Standard C22.2 No. 18F
- UL File No. E-19189

Standard Materials:

- Body – straight – $\frac{3}{8}$ " through 6": malleable iron; $\frac{3}{8}$ " through 4": aluminum
- 45° – $\frac{3}{8}$ " through 4": malleable iron
- 90° – $\frac{3}{8}$ " through 4": malleable iron or aluminum
- Gland nut – malleable iron or aluminum
- Ferrule – steel
- Gland nut sealing ring – polyethylene
- Sealing gasket – thermoplastic elastomer
- Locknut – steel or aluminum

Standard Finishes:

- Malleable iron – zinc electroplate
- Aluminum – natural

Liquidtight Fittings

Zinc Die Cast Conduit Fittings

Applications:

- Used in tough, industrial and corrosive applications

Features:

- Liquidtight, raintight, oiltight for protection and long life in wet, dusty and corrosive environments
- Hex shaped gland nut allows for easy wrenching, providing a fast, tight installation
- Suitable for wet locations
- Reusable, long ferrule prevents pull-out and tight bend conduit pop-out
- Furnished with locknut and sealing ring
- Third party certified
- Available in straight and 90 degree configurations
- Available in sizes 3/8" to 4"
- Available in insulated and non-insulated versions to meet any customer preference

Certifications and Compliances:

- UL Listed liquidtight flexible metal conduit fittings are suitable for use in the following hazardous locations under NEC:
 - Class I, Division 2;
 - Class II, Divisions 1 & 2; and
 - Class III, Divisions 1 & 2;
 - Suitable for grounding in sizes 3/8" through 1 1/4" under NEC
- UL Standards 514B, 467
- cUL Standard C22.2 No. 18F
- UL File No. E-19189

Standard Materials:

- Body – straight: zinc die cast
90°: zinc die cast
- Gland nut – zinc die cast
- Ferrule – zinc die cast
- Gland nut sealing ring – polyethylene
- Sealing gasket – thermoplastic elastomer
- Locknut – zinc die cast

Standard Finish:

- Zinc die cast – natural

Liquidtight Fittings

LTK Low Profile Conduit Fittings

Applications:

- Flexible metallic liquidtight conduit used with liquidtight fittings is designed to protect conductors from mechanical damage due to vibration and movement while sealing out cutting oils, coolants, water, dust, etc.
- Typical applications include the wiring of machine tools, motors, transformers, food processing equipment, robotics, air conditioning units, illuminated signs, etc.
- LTK Low Profile Liquidtight Fittings are designed specifically for OEM applications that require close side-by-side mounting of multiple liquidtight fittings in tight spaces

Certifications and Compliances:

- UL Listed liquidtight flexible metal conduit fittings are suitable for use in the following hazardous locations under NEC:
 - Class I, Division 2;
 - Class II, Divisions 1 & 2; and
 - Class III, Divisions 1 & 2;
 - Suitable for grounding in sizes 3/8" through 1 1/4" under NEC
- UL Standards 514B, 467
- cUL Standard C22.2 No. 18F
- UL File No. E-19189

Standard Materials:

- Body – straight: steel
45°: malleable iron
90°: malleable iron
- Gland nut – steel
- Ferrule – steel
- Gland nut sealing ring – nylon
- Sealing gasket – polypropylene
- Locknut – steel

Standard Finishes:

- Steel – zinc electroplate
- Malleable iron – zinc electroplate

Liquidtight Fittings

LiQuik™ Conduit Fittings

Applications:

- Used as a labor saving, no disassembly alternative to our Liquidator™ family; simply loosen the black nut, insert your liquidtight conduit and tighten down for a secure connection
- Two dimples on the ferrule insert into the body and “lock” so the ferrule will not spin during the two step “twist on” application, saving both time and money

Features:

- Liquidtight, raintight, oiltight for protection and long life in wet, dusty and corrosive environments
- Hex shaped gland nut allows for easy wrenching, providing a fast, tight installation
- Suitable for wet locations
- Reusable, long ferrule prevents pull-out and tight bend conduit pop-out
- Furnished with locknut and sealing ring
- Third party certified
- Available in straight, 90 and 45 degree configurations
- Available in sizes 3/8” to 2”
- Available in insulated and non-insulated versions to meet any customer preference

Certifications and Compliances:

- UL Listed liquidtight flexible metal conduit fittings are suitable for use in the following hazardous locations under NEC:
 - Class I, Division 2;
 - Class II, Divisions 1 & 2; and
 - Class III, Divisions 1 & 2;
 - Suitable for grounding in sizes 3/8” through 1 1/4” under NEC
- UL Standards 514B, 467
- cUL Standard C22.2 No. 18F
- UL File No. E-19189

Standard Materials:

- Body – straight: malleable iron
- 45°: malleable iron
- 90°: malleable iron
- Gland nut – malleable iron
- Ferrule – steel
- Gland nut sealing ring – polyethylene
- Sealing gasket – thermoplastic elastomer
- Locknut – steel

Standard Finish:

- Malleable iron – zinc electroplate

Liquidtight Fittings

Steel Liquidtight Conduit Fittings

Applications:

- Used in tough, industrial and standard applications
- The compact, slim diameter is meant for tight spaces and neat appearance

Features:

- Liquidtight, raintight, oiltight for protection and long life in wet, dusty and corrosive environments
- Hex shaped gland nut allows for easy wrenching, providing a fast, tight installation
- Suitable for wet locations
- Reusable, long ferrule prevents pull-out and tight bend conduit pop-out
- Furnished with locknut and sealing ring
- Third party certified
- Available in straight configurations only
- Available in sizes $\frac{3}{8}$ " to 2"
- Available in insulated and non-insulated versions to meet any customer preference

Standard Materials:

- Body – steel
- Gland nut – steel
- Ferrule – steel
- Gland nut sealing ring – nylon
- Sealing gasket – polypropylene
- Locknut – steel

Standard Finish:

- Steel – zinc plated

Certifications and Compliances:

- UL Listed liquidtight flexible metal conduit fittings are suitable for use in the following hazardous locations under NEC:
 - Class I, Division 2;
 - Class II, Divisions 1 & 2; and
 - Class III, Divisions 1 & 2;
 - Suitable for grounding in sizes $\frac{3}{8}$ " through $1\frac{1}{4}$ " under NEC
- UL Standards 514B, 467
- cUL Standard C22.2 No. 18F
- UL File No. E-19189

Liquidtight Fittings

Space-Saver Liquidtight Conduit Fittings

Applications:

- Used in tough, industrial and standard applications
- The compact, slim diameter is meant for tight spaces and neat appearance
- Male threads on the nut maximize space in box or enclosure and provide a smooth pulling surface, eliminating the need for a bushing or insulated throat fitting

Features:

- Liquidtight, raintight, oiltight for protection and long life in wet, dusty and corrosive environments
- Hex shaped gland nut allows for easy wrenching, providing a fast, tight installation
- Suitable for wet locations
- Reusable, long ferrule prevents pull-out and tight bend conduit pop-out
- Furnished with locknut and sealing ring
- Third party certified
- Available in straight configurations only
- Available in sizes 3/8" to 1"
- Available with optional aluminum grounding lug for easy ground wire termination

Standard Materials:

- Body – malleable iron
- Gland nut – malleable iron
- Ferrule – steel
- Gland nut sealing ring – nylon
- Sealing gasket – rubber
- Locknut – steel

Standard Finish:

- Malleable iron – zinc plated

Certifications and Compliances:

- UL Listed liquidtight flexible metal conduit fittings are suitable for use in the following hazardous locations under NEC:
 - Class I, Division 2;
 - Class II, Divisions 1 & 2; and
 - Class III, Divisions 1 & 2;
 - Suitable for grounding in sizes 3/8" through 1 1/4" under NEC
- UL Standards 514B, 467
- cUL Standard C22.2 No. 18F
- UL File No. E-19189

Liquidtight Fittings

Stainless Steel Liquidtight Conduit Fittings

Applications:

- Used in tough, industrial and standard applications
- Made of strong, corrosion-resistant, 304 stainless steel for long, dependable service where superior corrosion resistance and/or strength is required

Features:

- Liquidtight, raintight, oiltight for protection and long life in wet, dusty and corrosive environments
- Hex shaped gland nut allows for easy wrenching, providing a fast, tight installation
- Suitable for wet locations
- Reusable, long ferrule prevents pull-out and tight bend conduit pop-out
- Furnished with locknut and sealing ring
- Third party certified
- Available in straight and 90 degree configurations
- Available in sizes 1/2" to 2"

Certifications and Compliances:

- UL Listed liquidtight flexible metal conduit fittings are suitable for use in the following hazardous locations under NEC:
 - Class I, Division 2;
 - Class II, Divisions 1 & 2; and
 - Class III, Divisions 1 & 2;
 - Suitable for grounding in sizes 3/8" through 1 1/4" under NEC
- UL Standards 514B, 467
- cUL Standard C22.2 No. 18F
- UL File No. E-19189

Standard Materials:

- Body – straight: 304 stainless steel
90°: 304 stainless steel
- Gland nut – 304 stainless steel
- Ferrule – steel
- Gland nut sealing ring – nylon
- Sealing gasket – polypropylene
- Locknut – stainless steel

Standard Finish:

- 304 stainless steel – natural

Liquidtight Fittings

Stainless Steel Liquidtight Accessories

SEALING GASKETS (ORDER SEPARATELY)

Applications:

- To form a raintight seal between a conduit fitting and the outside of a box

Features:

- Gasket is designed to provide superior sealing for customer applications
- Constructed of stainless steel to provide extreme durability in the most corrosive applications

Certifications and Compliances:

- UL Listed
- cUL Listed

Standard Materials:

- Ring – stainless steel
- Gasket – neoprene rubber

Standard Finishes:

- Stainless steel – natural
- Neoprene rubber – natural

LOCKNUTS (ORDER SEPARATELY)

Applications:

- 316 stainless steel locknuts can be used with conduit or NPS threaded pipe

Features:

- Precision machined threads allow for easy installation
- Heavy stock thickness and specially designed tabs tighten securely and will not easily loosen even in the most severe applications

Standard Material:

- Locknut – stainless steel

Standard Finish:

- Stainless steel – natural

Liquidtight Fittings

Product of the USA Conduit Fittings

Applications:

- Used in tough, industrial and standard applications
- Used in government funded projects or projects that require domestic made material

Features:

- Liquidtight, raintight, oiltight for protection and long life in wet, dusty and corrosive environments
- Hex shaped gland nut allows for easy wrenching, providing a fast, tight installation
- Suitable for wet locations
- Reusable, long ferrule prevents pull-out and tight bend conduit pop-out
- Furnished with locknut and sealing ring
- Third party certified
- Available in straight, 90 and 45 degree configurations
- Available in sizes $\frac{3}{8}$ " to 4"

Certifications and Compliances:

- UL Listed liquidtight flexible metal conduit fittings are suitable for use in the following hazardous locations under NEC:
 - Class I, Division 2;
 - Class II, Divisions 1 & 2; and
 - Class III, Divisions 1 & 2;
 - Suitable for grounding in sizes $\frac{3}{8}$ " through $1\frac{1}{4}$ " under NEC
- UL Standards 514B, 467
- cUL Standard C22.2 No. 18F
- UL File No. E-19189

Standard Materials:

- Body – straight: steel
45°: malleable iron
90°: malleable iron
- Gland nut – steel
- Ferrule – steel
- Gland nut sealing ring – nylon
- Sealing gasket – polypropylene
- Locknut – steel

Standard Finishes:

- Steel – zinc electroplate
- Malleable iron – zinc electroplate

Liquidtight Fittings

Non-metallic Liquidtight Conduit Fittings

Applications:

- For use with non-metallic Type B liquidtight conduit to terminate and seal conduit to liquidtight, oiltight or raintight box or enclosure

Features:

- Liquidtight, raintight, oiltight for protection and long life in wet, dusty and corrosive environments
- Hex shaped gland nut allows for easy wrenching, providing a fast, tight installation
- Suitable for wet locations
- Reusable, long ferrule prevents pull-out and tight bend conduit pop-out
- Furnished with locknut and sealing ring
- Third party certified
- Available in straight and 90 degree configurations
- Available in sizes 3/8" to 2"
- Available in black or gray color

Certifications and Compliances:

- UL Listed liquidtight flexible metal conduit fittings are suitable for use in the following hazardous locations under NEC:
 - Class I, Division 2;
 - Class II, Divisions 1 & 2; and
 - Class III, Divisions 1 & 2;
 - Suitable for grounding in sizes 3/8" through 1 1/4" under NEC
- UL Standards 514B, 467
- cUL Standard C22.2 No. 18F
- UL File No. E-19189

Standard Materials:

- Body – straight: nylon
90°: nylon
- Ferrule – steel
- Gland nut sealing ring – nylon
- Sealing gasket – polypropylene
- Locknut – steel

Standard Finishes:

- Nylon – natural
- Steel – natural

Applications:

- For use with non-metallic liquidtight fittings to terminate and seal conduit to liquidtight, oiltight or raintight box or enclosure
- Typical applications include wiring motors, transformers, processing equipment, pumps, etc.

Features:

- Resists abrasion, oil, water, acid and metal shavings
- Smooth inside for easier wire pulling; no hazardous sharp edges or burrs; will not damage conductors
- Corrosion-resistant for tough environmental conditions
- Suitable for wet locations
- Quick installation; cuts with utility knife or PVC cutter
- 90° has smooth interior to prevent abrasion of conductors
- Rated for 80°C dry; 60°C wet; 70°C oil-resistant

Certifications and Compliances:

- UL Listed
- CSA certified

LTCOND38NM100 - GRAY

LTCOND38NMBL100 - BLACK

Standard Material:

- Integral rigid and flexible PVC construction

NON-METALLIC LIQUIDTIGHT ELECTRICAL TUBING

Features:

- Quick installation; cuts with utility knife or PVC cutter
- Suitable for use in high vibration or flexing applications
- Resists corrosion, oil and water
- Maximum flexibility; can be used in extremely tight areas
- Resists abuse, pulling and crushing

Certifications and Compliances:

- UL Listed
- CSA certified

Cord & Cable Connectors

CG Series Color-coded Cord Grips

Applications:

CG Series Color-coded Grips with neoprene bushings are for use with portable cords, including S, SO, STO, ST, SJ, SJT, SJTO and SVO.

CG Cord Grips are installed to:

- Provide a means for passing a cord into an enclosure
- Form a watertight seal for cord
- Provide pull-out protection for cord, ensuring a secure connection

Features:

- Neoprene bushings are color-coded by cable diameter for quick and easy identification of proper cord grip
- Rugged construction protects cord from damage
- Compact design permits close spacing of fittings on panel applications
- Tightening one nut creates watertight seal
- Male tapered thread NPT
- Straight cord grips available in steel or aluminum; 45° and 90° cord grips available in malleable iron

Certifications and Compliances:

- UL Standard 514B
- UL File No. E-23223
- CSA Standard C22.2 No. 18
- Suitable for NEMA 4 enclosures and other wet locations
- Suitable for use in Class I, Division 2 hazardous locations when installed in accordance with NEC 501.10(B)(2)

Standard Materials:

- Body – straight – 1/2" through 1 1/2": steel; 1/2" through 1": aluminum
45° – 1/2" through 1": malleable iron
90° – 1/2" through 1": malleable iron
- Nut – steel or aluminum
- Bushing – neoprene

Standard Finishes:

- Body (steel or malleable Iron) – electrogalvanized
- Body (aluminum) – natural
- Nut (steel) – electrogalvanized
- Nut (aluminum) – natural

Cord & Cable Connectors

NCG Non-metallic Cord Grips

Applications:

For use with portable cord, NCG Series Watertight Cord Grips terminate and protect conductors from mechanical damage due to vibration and movement. A neoprene bushing seals out oils, coolants, water, dust and other abusive agents. NCG Cord Grips may be used with types S, SO, STO, SJ, SJT, SJTO and SVO portable cords.

Typical applications include the termination of wiring for:

- Machine tools
- Motors
- Transformers
- Food processing equipment
- Robotics
- Air conditioning units
- Illuminated signs
- Terminal boxes
- Control cabinets

Features:

- Available in 3/8" to 1" trade sizes
- Neoprene bushings cover a large cable range, reducing the number of different fittings required
- Polyamide non-metallic construction stands up to most corrosive environments
- Polyamide locknut available; order separately
- UL Listed and cUL third party certified
- Raintight and watertight construction for outdoor use
- Tightening one nut creates watertight seal

Certifications and Compliances:

- UL File No. E-23223
- UL Standard 514B
- cUL to CSA Standard C22.2 No. 18
- IP68
- NEMA 4X Watertight
- Zone 2, Division 2 use per Code

Standard Materials:

- Cable gland body and nut – polyamide 6
- Bushing – neoprene
- Locknut – polyamide 6

Cat. #	Size	Cable Range in Inches (mm)
NCG38 35	3/8"	0.10 - 0.35 (2.5 - 8mm)
NCG50 50	1/2"	0.20 - 0.50 (5 - 12mm)
NCG75 75	3/4"	0.35 - 0.75 (9 - 18mm)

Locknuts (Ordered Separately)

Cat. #	Size	Std. Pkg.
10N	3/8"	25
11N	1/2"	25
12N	3/4"	25
13N	1"	20

Cord & Cable Connectors

NCGS Non-metallic Solar Cord Grips

Applications:

- Used in both commercial and residential grid-tied PV solar applications and are designed to accommodate the entry of multiple PV wires coming into a combiner or pass through box
- Provide mechanical strain relief as well as a liquidtight seal around the solar panel wires

Features:

- Multi-hole grip to allow for entry of multiple PV wires
- Solar cord grips offer customer flexibility by allowing the termination from one to 31 PV wires in a single connector
- Skinned over glands provide a durable, liquidtight seal around the wires
- No disassembly required for installation
- Wide range of cable acceptance sizes for customer flexibility
- Steel locknuts included
- Temperature rating: -22°F (-30°C) to 212°F (100°C) to meet the most demanding environmental conditions

Certifications and Compliances:

- UL/cUL recognized
- UL File No. E-23223
- IP68
- Flammability rating: 94-V2

Standard Materials and Finishes:

- 6/6 nylon with TPE/Buna N sealing glands, natural

AC/MC Fittings

ACB Series

ACB SERIES – STEEL & MALLEABLE IRON

Applications:

- ACB Series Connectors are used to connect armoured cable, metal-clad cable or flexible metallic conduit to a box or enclosure

Features:

- Dual gripping saddle design on the connector safely secures cable or conduit in place and prevents loosening from vibration
- Insulated throat provides a smooth pulling surface that won't strip cable
- Angled teeth on locknut bite into enclosure, preventing loosening from vibration
- Tri-head set screw may be installed using a slotted, Phillips or Robertson head screwdriver
- Steel connector is zinc electroplated for corrosion resistance

Listed for use with:

- Flexible Metal Conduit (RWFMC): $\frac{3}{8}$ " - 4"
- Armoured cable (AC): $\frac{3}{8}$ " - $1\frac{1}{4}$ "
- MC cable (MC): $\frac{3}{8}$ " - 3"
- MCI-A cable (MCI-A): $\frac{3}{8}$ " - $1\frac{1}{4}$ "

Certifications and Compliances:

- UL Listed
- cUL Listed
- UL File No. E-19188

Standard Materials and Finishes:

- Body – straight: steel, zinc electroplated
- Body – 45° and 90°: malleable, zinc electroplated
- Saddle – steel, zinc electroplated
- Screw – steel, zinc electroplated
- Insulated throat – thermoplastic, natural

AC/MC Fittings

Space-Saver ACB Series Quick-Lok™ Connectors

SPACE-SAVER ACB SERIES – STEEL

Applications:

- Used to join AC/MC cable to a box or enclosure

Features:

- Male threads on locknut allow for more room inside the box
- Smooth pulling surface eliminates the need for insulated throat fittings and/or plastic bushings
- Angled teeth on locknut bite into enclosure, preventing loosening from vibration
- Dual gripping saddle design on the fitting safely secures cable or conduit in place and prevents loosening from vibration
- Tri-head set screw may be installed using a slotted, Phillips or Robertson head screwdriver
- Steel fitting is zinc electroplated for added corrosion resistance
- Suitable for use with steel or aluminum cables
- Dry locations

Certifications and Compliances:

- UL and cUL Listed, File No. E-19188  
- UL Standard 514B
- Certified by UL to CSA Standard C22.2 No. 18

Standard Material:

- Body and nut – steel

Standard Finish:

- Steel – zinc electroplate

QUICK-LOK™ CONNECTORS – STEEL

Features:

- No locknut required
- Single unit or duplex construction with captive clamp
- Connects 50 MC, AC and flex RW cable sizes with just three fittings
- Easy to install: tilt, insert and snap down
- Single unit construction eliminates loose component parts; integral green plastic insulated throat bushing provides maximum protection for wire installation

Standard Material:

- Tubular steel

Standard Finish:

- Zinc plated

AC/MC Fittings

Quick-Lok™ Pro Connectors – Zinc Die Cast & Steel Set Screw & Duplex Type – Malleable Iron

QUICK-LOK™ PRO CONNECTORS – ZINC DIE CAST & STEEL

Applications:

- Quick-Lok™ Pro Connectors are used to connect armoured cable, metal-clad cable, MCI-A cable or flexible metallic conduit to a box or enclosure for dry location applications
- Fits 1/2" knockout

Connectors:

- **Single Connector** – For installation of one cable into a box or enclosure
- **Duplex Connector** – Allows for installation of two cables in a single KO, into box or enclosure
- **90° Connector** – For installation of 90° bend in cable
- **Old Work Connector** – For installing and terminating cable after an old work box has been installed

Features:

- Easy tool-free installation (the single and old work connector can also be removed without tools)
- Integral insulated throat bushing provides protection for wire insulation
- Reusable
- Wide range of styles and configurations to meet customer requirements and preferences
- Single unit construction eliminates loose component parts
- Duplex and 90° connector cover opens wide for easy access and wiring
- For use in dry locations/concrete tight when taped

Certifications and Compliances:

- cULus
- UL File No. E-19188
- Concrete tight when taped

Standard Materials:

- Body – zinc die cast, zinc plated steel
- Cover – zinc plated steel
- Insulator – non-metallic

Combination Couplings – Steel

ACC SERIES COMBINATION COUPLINGS – STEEL

Applications:

- ACC Combination Couplings are used to join EMT conduit to armoured cable, metal-clad cable or flexible metallic conduit

Features:

- Dual gripping saddle design on the coupling safely secures cable or conduit in place and prevents loosening from vibration
- Steel compression ring and nut provide a strong, secure termination point for EMT conduit
- Tri-head set screw may be installed using a slotted, Phillips or Robertson head screwdriver
- Steel combination coupling is zinc electroplated for corrosion resistance

Certifications and Compliances:

- UL Listed
- cUL Listed

Standard Materials and Finishes:

- Body – steel, zinc electroplated
- Saddle – steel, zinc electroplated
- Screw – steel, zinc electroplated

Note: Bushings are packed in clear poly bags.

METAL STUD GROMMETS – UNIVERSAL

Applications:

- Intended to snap into metal studs to protect wire insulation from sharp edges of metal studs, providing 360° protection

Features:

- Makes pulling smooth and easy by preventing hang-ups of cable on raw metal
- Triple lock design holds bushing securely
- Universal grommet shipped as one piece and separates easily for installation
- Fits hold diameters between 1 3/8" and 1 11/16" (34.9mm to 42.9mm)
- Maximum temperature rating: 115°C (239°F)

Instructions:

1. Front and back pieces pull apart.
2. Snap the front bushing into stud hole.
3. Lock securely onto stud by attaching flat blank bushing.

MSG1BULK	Bulk Package	1 3/8" - 1 11/16"	1000	15.5

Flexible Metallic Conduit Fittings

ACB Series

ACB SERIES – STEEL & MALLEABLE IRON

Applications:

- ACB Series Connectors are used to connect armoured cable, metal-clad cable or flexible metallic conduit to a box or enclosure

Features:

- Dual gripping saddle design on the connector safely secures cable or conduit in place and prevents loosening from vibration
- Insulated throat provides a smooth pulling surface that won't strip cable
- Angled teeth on locknut bite into enclosure, preventing loosening from vibration
- Tri-head set screw may be installed using a slotted, Phillips or Robertson head screwdriver
- Steel connector is zinc electroplated for corrosion resistance

Listed for use with:

- Flexible Metal Conduit (RWFMC): $\frac{3}{8}$ " - 4"
- Armoured cable (AC): $\frac{3}{8}$ " - 1 $\frac{1}{4}$ "
- MC cable (MC): $\frac{3}{8}$ " - 3"
- MCI-A cable (MCI-A): $\frac{3}{8}$ " - 1 $\frac{1}{4}$ "

Certifications and Compliances:

- UL Listed
- cUL Listed
- UL File No. E-19188

Standard Materials and Finishes:

- Body – straight: steel, zinc electroplated
- Body – 45° and 90°: malleable, zinc electroplated
- Saddle – steel, zinc electroplated
- Screw – steel, zinc electroplated
- Insulated throat – thermoplastic, natural

FMC Fittings

Flexible Metallic Conduit Fittings

Space-Saver ACB Series Quick-Lok™ Connectors

SPACE-SAVER ACB SERIES – STEEL

Applications:

- Used to join FMC conduit to a box or enclosure

Features:

- Male threads on locknut allow for more room inside the box
- Smooth pulling surface eliminates the need for insulated throat fittings and/or plastic bushings
- Angled teeth on locknut bite into enclosure, preventing loosening from vibration
- Dual gripping saddle design on the fitting safely secures cable or conduit in place and prevents loosening from vibration
- Tri-head set screw may be installed using a slotted, Phillips or Robertson head screwdriver
- Steel fitting is zinc electroplated for added corrosion resistance
- Suitable for use with steel or aluminum cables
- Dry locations

Certifications and Compliances:

- UL and cUL Listed, File No. E-19188  
- UL Standard 514B
- Certified by UL to CSA Standard C22.2 No. 18

Standard Material:

- Body and nut – steel

Standard Finish:

- Steel – zinc electroplate

UL File No. E-19188

QUICK-LOK™ CONNECTORS – STEEL

Features:

- No locknut required
- Single unit or duplex construction with captive clamp
- Connects 50 MC, AC and flex RW cable sizes with just three fittings
- Easy to install: tilt, insert and snap down
- Single unit construction eliminates loose component parts; integral green plastic insulated throat bushing provides maximum protection for wire installation

Standard Material:

- Tubular steel

Standard Finish:

- Zinc plated

UL File No. E-19188

Flexible Metallic Conduit Fittings

Quick-Lok™ Pro Connectors – Zinc Die Cast & Steel

QUICK-LOK™ PRO CONNECTORS – ZINC DIE CAST & STEEL

Applications:

- Quick-Lok™ Pro Connectors are used to connect armoured cable, metal-clad cable, MCI-A cable or flexible metallic conduit to a box or enclosure for dry location applications
- Fits 1/2" knockout

Connectors:

- **Single Connector** – For installation of one cable into a box or enclosure
- **Duplex Connector** – Allows for installation of two cables in a single KO, into box or enclosure
- **90° Connector** – For installation of 90° bend in cable
- **Old Work Connector** – For installing and terminating cable after an old work box has been installed

Features:

- Easy tool-free installation (the single and old work connector can also be removed without tools)
- Integral insulated throat bushing provides protection for wire insulation
- Reusable
- Wide range of styles and configurations to meet customer requirements and preferences
- Single unit construction eliminates loose component parts
- Duplex and 90° connector cover opens wide for easy access and wiring
- For use in dry locations/concrete tight when taped

Certifications and Compliances:

- cULus
- UL File No. E-19188
- Concrete tight when taped

Standard Materials:

- Body – zinc die cast, zinc plated steel
- Cover – zinc plated steel
- Insulator – non-metallic

*UL Listed flexible metallic conduit fittings are suitable as grounding means under NEC 350-5 and suitable for hazardous location use per Class I, Division 2, NEC 501-4(b).

†Suitable for use with armoured cable.

§UL approved for use with aluminum interlocking grounding metal-clad cable, Type MCIA (Southwire MCAP™).

MCAP™ is a registered trademark of Southwire Company.

Flexible Metallic Conduit Fittings

Set Screw & Duplex Type – Malleable Iron

Applications:

- Used to clamp and secure AC/MC cable to a box or enclosure

Features:

- High strength malleable iron
- Used with armoured cable and flexible metal conduit

Standard Materials:

- Malleable iron
- Steel locknut
- Stamped steel cover (Duplex Type only)

Standard Finish:

- Zinc plated

SET SCREW TYPE – MALLEABLE IRON

FMC Fittings

Flexible Metallic Conduit Fittings

Combination Couplings

ACC SERIES COMBINATION COUPLINGS – STEEL

Applications:

- ACC Combination Couplings are used to join EMT conduit to armoured cable, metal-clad cable or flexible metallic conduit

Features:

- Dual gripping saddle design on the coupling safely secures cable or conduit in place and prevents loosening from vibration
- Steel compression ring and nut provide a strong, secure termination point for EMT conduit
- Tri-head set screw may be installed using a slotted, Phillips or Robertson head screwdriver
- Steel combination coupling is zinc electroplated for corrosion resistance

Certifications and Compliances:

- UL Listed
- cUL Listed

Standard Materials and Finishes:

- Body – steel, zinc electroplated
- Saddle – steel, zinc electroplated
- Screw – steel, zinc electroplated

METAL STUD GROMMETS – UNIVERSAL

Applications:

- Intended to snap into metal studs to protect wire insulation from sharp edges of metal studs, providing 360° protection

Features:

- Makes pulling smooth and easy by preventing hang-ups of cable on raw metal
- Triple lock design holds bushing securely
- Universal grommet shipped as one piece and separates easily for installation
- Fits hold diameters between 1 3/8" and 1 11/16" (34.9mm to 42.9mm)
- Maximum temperature rating: 115°C (239°F)

Instructions:

1. Front and back pieces pull apart.
2. Snap the front bushing into stud hole.
3. Lock securely onto stud by attaching flat blank bushing.

Service Entrance & Grounding Fittings

Grounding Fittings

GROUND CLAMP – ZINC DIE CAST

Applications:

- For bare or insulated wire or armoured grounding cable

UL File No. E-6225

Cat. #	Grounding Conductor Electrode Clamping Range	Lug Conductor Range	Unit Qty.	Wt. Lbs. Per 100
141DC	1/2", 3/4", 1"	#8 - #2	25	16

GROUND CLAMP – BRONZE PLATED

Applications:

- For bare or insulated wire or armoured grounding cable

UL File No. E-6225

Cat. #	Grounding Conductor Electrode Clamping Range	Lug Conductor Range	Unit Qty.	Wt. Lbs. Per 100
141PDC	1/2", 3/4", 1"	#8 - #2	25	16

GROUND CLAMPS – COPPER ALLOY FOR BARE WIRE

Applications:

- Used to connect bare copper wire to water pipe, re-bar, ground rod or copper water tubing for grounding
- Available with steel or bronze screws (bronze are listed for direct burial)
- Cast from high strength, highly conductive copper alloy

UL File No. E-6225

Cat. #	Grounding Conductor Electrode Clamping Range	Description	Unit Qty.	Wt. Lbs. Per 100
GCS13	1/2" - 1"	Bare Wire	100	12
GCS46	1 1/4" - 2"	Bare Wire	50	30
GCS610	2 1/2" - 4"	Bare Wire	12	74
GCB13	1/2" - 1"	Bronze Screw Direct Burial	100	18

GROUND CLAMPS – COPPER ALLOY FOR ARMOURED CABLE

Applications:

- Used to connect armoured cable to water pipe for grounding
- Special pressure bar grips armoured cable insulation to decrease chances of grounding conductor being pulled out
- Cast from high strength, highly conductive copper alloy

360 Degree Swivel Type

- Pressure bar swings 360 degrees for easy alignment
- Assembled with zinc plated steel screws
- Cast from high strength, highly conductive copper alloy

UL File No. E-6225

Cat. #	Grounding Conductor Electrode Clamping Range	Description	Unit Qty.	Wt. Lbs. Per 100
GCAB13	1/2" - 1"	Bronze Screw Direct Burial	25	24
GCAS13	1/2" - 1"	360 Degree Swivel	25	35

Service Entrance/
Groundings

Service Entrance & Grounding Fittings

Grounding Fittings

GROUND CLAMPS – COPPER ALLOY FOR RIGID CONDUIT

Applications:

- Used to connect grounding conductor in rigid conduit to water pipe for grounding
- Assembled with zinc plated steel screws
- Cast from high strength, highly conductive copper alloy

UL File No. E-6225

GCR13

GCRC13

GCRCS13

Cat. #	Grounding Conductor Electrode Clamping Range	Description	Unit Qty.	Wt. Lbs. Per 100
GCR13	1/2" - 1"	Rigid Clamp	50	26
GCRC13	1/2" - 1"	Regular Hub	50	26
GCRCS13	1/2" - 1"	360 Degree Swivel	50	26

GROUND CLAMP – COPPER ALLOY FOR RIGID OR EMT CONDUIT 360 DEGREE SWIVEL

Applications:

- Used to connect grounding conductor in rigid or EMT conduit to water pipe for grounding
- Pressure bar clamps conduit in place and swings 360 degrees for easy alignment
- Assembled with zinc plated steel screws
- Cast from high strength, highly conductive copper alloy

UL File No. E-6225

Cat. #	Grounding Conductor Electrode Clamping Range	Description	Unit Qty.	Wt. Lbs. Per 100
GCRES13	1/2" - 1"	360 Degree Swivel	50	26

GROUND CLAMPS – COPPER ALLOY FOR DIRECT BURIAL

Applications:

- Available in 1/2", 3/4" and 5/8" trade sizes
- Used to connect a grounding conductor to a driven ground rod
- Approved for direct burial in ground and concrete
- Assembled with bronze hexagon headed bolt
- Cast from high strength, highly conductive copper alloy

UL File No. E-6225

Cat. #	Grounding Conductor Electrode Clamping Range	Description	Unit Qty.	Wt. Lbs. Per 100
GRC1	1/2"	Regular	100	9
GRC58	5/8"	Ground Rod	50	9
GRC2	3/4"	Ground Rod	50	12

Service Entrance & Grounding Fittings

Grounding Fittings

LAY-IN GROUNDING LUGS

Applications:

- Designed for quick and easy installation and are used to bond wires and surfaces in grounding applications

Features:

- Allows for quick and easy installation
- Used to bond wires and surfaces in grounding applications
- Available in either aluminum or copper material to suit customer specification
- Both aluminum and copper lugs are suitable for use with copper or aluminum conductors
- Heavy duty plated slotted or hex head screw for easy installation
- Each lug accepts a range of cable sizes

Certifications and Compliances:

- cULus Listed, File No. E-6225

Standard Materials and Finishes:

- Aluminum lay-in lug – zinc plated
- Copper lay-in lug – natural copper
- Set screw – zinc plated steel

Cat. #	Description	Conductor Range	Unit Qty.	Wt. Lbs. Per 100
LL414SA	Aluminum	#4 - #14	100	1.9
LL108SA	Aluminum	1/0 - #8 AWG	50	6.6
LL306SA	Aluminum	3/0 - #6 AWG	25	16.4
LL414C	Copper	#4 - #14 AWG	100	4.4
LL108C	Copper	1/0 - #8 AWG	50	15.9
LL306C	Copper	3/0 - #6 AWG	25	40.0

SOLAR LAY-IN GROUNDING LUGS

Applications:

- The ideal choice for the quick installation of one continuous grounding conductor or as a jumper to multiple locations
- Just unscrew the set screw, lay in the cable and re-tighten, making it easy to retrofit or repair

Features:

- Tin plated copper for additional corrosion resistance
- For use with #4-14 cable
- Stainless steel slotted screw
- Suitable for direct burial and outdoor use
- Ideal for continuous grounding of solar PV panels
- Suitable for use with copper conductors only, solid or stranded

INTERSYSTEM BONDING BRIDGES

Applications:

- Provides reliable intersystem bonding between power and communication grounding systems in commercial and residential applications

Features:

- For use in residential and commercial applications
- Can ground up to four systems to a single location
- Available in either zinc alloy or copper alloy material
- Snap-on plastic cover provides easy installation and protects from the elements
- Rated for use with solid and stranded copper conductors

Certifications and Compliances:

- cULus Listed, File No. E-6225

Standard Materials and Finishes:

- Zinc bonding bridge – natural
- Copper bonding bridge – natural
- Screws – stainless steel
- Protective snap-on cover – plastic

Cat. #	Description	Main Conductor Range	Aux. Conductor Range	Unit Qty.	Wt. Lbs. Per 100
BB414DC	Zinc Alloy	#6 - #2	#4 - #14	10	38.5
BB414C	Copper Alloy	#6 - #2	#4 - #14	10	65.4

Certifications and Compliances:

- cULus Listed
- UL File No. E-6225

Standard Materials and Finishes:

- Body – copper, tin plated
- Screw – stainless steel, natural

Cat. #	Description	Cable	Unit Qty.	Wt. Lbs. Per 100

Condulet® Conduit Outlet Bodies, Covers & Gaskets – Stainless Steel

Condulet® Stainless Steel Fittings deliver power where you need it, saving you time and money throughout the life of your facility.

Superior resistance to corrosion and heat, combined with unmatched strength, make stainless steel Condulet bodies and boxes a long-term solution for even the most extreme environments.

Applications:

Conduit outlet bodies are installed in conduit systems to:

- Act as pull outlets for conductors being installed
- Provide openings for making splices and taps in conductors
- Act as mounting outlets for lighting fixtures and wiring devices
- Connect conduit sections
- Provide taps for branch conduit runs
- Make 90° bends in conduit runs
- Provide for access to conductors for maintenance and future system changes

Features:

- Self-healing properties of stainless steel fittings help reduce the penetration of rust/corrosion and eliminate damage to the fitting
- Stainless steel fittings retain their strength in extreme heat and extreme cold conditions
- Fitting surface is easy to maintain and keep clean
- Easy cleaning capabilities make these fittings perfect for food processing and other hygienic areas where wash downs are common
- Superior strength and durability greatly reduce replacement of fittings – this will lower your total cost of ownership and increase your return on investment
- Stainless steel fittings do not require harsh environment-damaging cleaners to keep them looking like new
- Conduit hubs have tapered threads and feature integral bushing for protection of wire insulation
- Outlet bodies designed to match conduit size for neat, compact installations

Certifications and Compliances:

- UL Standard 514A
- CSA Standard C22.2 No. 18.1-04
- Raintight – when installed with cover and gasket

Standard Materials:

- Bodies and covers – 316 stainless steel
- Cover screws – 316 stainless steel
- Gasket – neoprene

Condulet® Conduit Outlet Bodies, Covers & Gaskets – Stainless Steel

Condulet® Stainless Steel Device Boxes deliver power where you need it, saving you time and money throughout the life of your facility.

Superior resistance to corrosion and heat, combined with unmatched strength, make stainless steel Condulet bodies and boxes a long-term solution for even the most extreme environments.

Applications:

Cast device boxes are installed in conduit systems to:

- Accommodate wiring devices
- Act as pull boxes for conductors in a conduit system
- Provide openings to make splices and taps in conductors
- Provide access to conductors for maintenance and future system changes
- Connect conduit systems

Features:

- Self-healing properties of stainless steel fittings help reduce the penetration of rust/corrosion and eliminate damage to the fitting
- Stainless steel fittings retain their strength in extreme heat and extreme cold conditions
- Fitting surface is easy to maintain and keep clean
- Easy cleaning capabilities make these fittings perfect for food processing and other hygienic areas where wash downs are common
- Superior strength and durability greatly reduce replacement of fittings – this will lower your total cost of ownership and increase your return on investment
- Stainless steel fittings do not require harsh environment-damaging cleaners to keep them looking like new
- Internal green grounding screw standard
- Tapered threads for protection of wire insulation
- Wide selection of covers available
- Single or double conduit entry
- Ample wiring room provided for easy installations

Certifications and Compliances:

- UL Standard 514A
- CSA Standard C22.2 No. 18.1-04
- Raintight – when installed with cover and gasket

Standard Materials:

- Bodies and covers – 316 stainless steel
- Cover screws – 316 stainless steel
- Gasket – neoprene

Stainless Steel Fittings

VXF Junction Boxes

Applications:

For use where high quality, durable products that withstand corrosion, chemical treatments and wash downs are required, including:

- Wastewater treatment plants
- Food and beverage facilities
- Pharmaceutical plants
- Pulp and paper mills
- Mines

VXF Stainless Steel Junction Boxes are installed in threaded rigid conduit systems to:

- Act as junction boxes for making terminations
- Act as pull outlets

Features:

VXF Junction Box

Includes:

- Four tapped conduit openings with three 316 stainless steel installed recessed hex plugs
- Four 1/4-20 x 1" stainless steel hex head bolts for mounting box to surface
- One 10-32 x 1/4" installed green ground screw with slotted head

VXF Hub Cover

Includes:

- Fixture rated up to 130 lbs. with VXF body
- Neoprene gasket
- Four 1/4-20 x 5/8" stainless steel hex head bolts and lock washer for cover attachment to box
- One 10-24 x 5/8" Phillips pan head set screw

VXF Blank Cover

Includes:

- Neoprene gasket
- Four 1/4-20 x 5/8" stainless steel hex head bolts for cover attachment to box
- GRF10SS comes with PVC protective peel off coating

GRF Replacement Gasket

Includes:

- Neoprene gasket

Certifications and Compliances:

- UL/cUL Listed, File No. E-15022
- NEC/CEC
 - Class I, Division 2
 - Class II, Divisions 1 & 2
 - Class III
- Fixture rated (with pendant cover)
- UL514A
- Wet locations
- NEMA 4X
- Assembled in the USA

Standard Materials:

- Body, plugs and cover – 316 stainless steel
- Nuts and washers – stainless steel
- Gasket – neoprene

Standard Finishes:

- Body, plugs, nuts and washer – natural
- GRF10SS – natural with #4 brushed finish

Stainless Steel Fittings

Locknuts & Bushings

Stainless steel fittings deliver unbeatable corrosion protection where you need it, saving you time and money throughout the life of your facility.

Superior resistance to corrosion and heat, combined with unmatched strength, make stainless steel fittings a long-term solution for even the most extreme environments.

Features:

- Self-healing properties of stainless steel fittings help reduce the penetration of rust/corrosion and eliminate damage to the fitting
- Stainless steel fittings retain their strength in extreme heat and extreme cold conditions
- Fitting surface is easy to maintain and keep clean
- Easy cleaning capabilities make these fittings perfect for food processing and other hygienic areas where wash downs are common
- Superior strength and durability greatly reduce replacement of fittings – this will lower your total cost of ownership and increase your return on investment
- Stainless steel fittings do not require harsh environment-damaging cleaners to keep them looking like new
- Stainless steel fittings are ideal for industrial MRO and OEM applications in food and beverage, pharmaceutical, petrochemical, wastewater, salt water and other corrosive environments

Standard Materials:

- Fittings – 316 stainless steel
- Conduit, nipples, couplings and elbows – 316 stainless steel, 304 stainless steel
- Conduit hangers – 316 stainless steel, 301 stainless steel

LOCKNUTS

11SS

Features:

- 316 stainless steel locknuts can be used with conduit or NPS threaded pipe
- Precision machined threads allow for easy installation
- Heavy stock thickness and specially designed tabs tighten securely and will not easily loosen even in the most severe applications

BEAM CLAMPS

531SST

Features:

- This heavy duty "electrician's" style beam clamp is cast in stainless for superior strength and corrosion resistance
- Designed for use on I-beams, channels and other structural members, this beam clamp provides firm fixturing without drilling holes
- Attachment holes in the back and bottom permit a wide variety of applications

Clamps

RIGHT ANGLE CLAMPS

RAC50SS

Features:

- Designed to fit pipe/rigid conduit as well as PVC coated rigid conduit, right angle clamps firmly fix pipe to the flange of a structural member without drilling holes
- Cast in CF8M (316) with 316 stainless steel U-bolt and nuts, these clamps are designed for both strength and corrosion resistance

Cat. #	Size	Unit Qty.	Std. Pkg.	Wt. Lbs. Per 100	A	B	C	D	E

PARALLEL CLAMPS

PARC75SS

Features:

- Used to run pipe or conduit along the flange of I-beams or channels simply and easily without drilling holes
- The 100% stainless (CF8M and 316 stainless steel) design offers superb corrosion resistance and strength
- These clamps will fit both rigid conduit and PVC coated rigid conduit and are available in 3/4" and 1" trade sizes

Cat. #	Size	Unit Qty.	Std. Pkg.	Wt. Lbs. Per 100	A	B	Overall Width

CONDUIT

UL File No. E-324286

RCOND50 304SS

Features:

- Stainless steel threaded conduit polished to a bright finish to further increase corrosion resistance and provide enhanced aesthetic appearance
- Provided in 10' lengths with coupling attached and color-coded thread protector for the opposite end
- Custom sizes are also available

Stainless Steel

THREE-PIECE COUPLINGS

191SS

Features:

- Designed to join and connect threaded ends of rigid conduit where neither length of conduit can be turned
- These stainless steel three-piece couplings are polished to a bright finish for increased corrosion resistance and improved appearance
- 316 stainless steel

Cat. #	Size	Unit Qty.	Std. Pkg.	Wt. Lbs. Per 100	Overall Length	Major Nut Dia.	Major Body Dia.

192SS	1"	50	50	33	1.51"	1.66"	1.66"

Stainless Steel Fittings

Liquidtight Fittings

Applications:

- Used in tough, industrial and standard applications
- Made of strong, corrosion-resistant, 304 stainless steel for long, dependable service where superior corrosion resistance and/or strength is required

Features:

- Liquidtight, raintight, oiltight for protection and long life in wet, dusty and corrosive environments
- Hex shaped gland nut allows for easy wrenching, providing a fast, tight installation
- Suitable for wet locations
- Reusable, long ferrule prevents pull-out and tight bend conduit pop-out
- Furnished with locknut and sealing ring
- Third party certified
- Available in straight and 90 degree configurations
- Available in sizes 1/2" to 2"

Certifications and Compliances:

- UL Listed liquidtight flexible metal conduit fittings are suitable for use in the following hazardous locations under NEC:
 - Class I, Division 2;
 - Class II, Divisions 1 & 2; and
 - Class III, Divisions 1 & 2;
- Suitable for grounding in sizes 3/8" through 1 1/4" under NEC
- UL Standards 514B, 467
- cUL Standard C22.2 No. 18F
- UL File No. E-19189

Standard Materials:

- Body – straight: 304 stainless steel
90°: 304 stainless steel
- Gland nut – 304 stainless steel
- Ferrule – steel
- Gland nut sealing ring – nylon
- Sealing gasket – polypropylene
- Locknut – stainless steel

Standard Finish:

- 304 stainless steel – natural

Stainless Steel Fittings

Sealing Gaskets & Locknuts

SEALING GASKETS (ORDER SEPARATELY)

Applications:

- To form a raintight seal between a conduit fitting and the outside of a box

Features:

- Gasket is designed to provide superior sealing for customer applications
- Constructed of stainless steel to provide extreme durability in the most corrosive applications

Certifications and Compliances:

- UL Listed
- cUL Listed

Standard Materials:

- Ring – stainless steel
- Gasket – neoprene rubber

Standard Finishes:

- Stainless steel – natural
- Neoprene rubber – natural

LOCKNUTS (ORDER SEPARATELY)

Applications:

- 316 stainless steel locknuts can be used with conduit or NPS threaded pipe

Features:

- Precision machined threads allow for easy installation
- Heavy stock thickness and specially designed tabs tighten securely and will not easily loosen even in the most severe applications

Standard Material:

- Locknut – stainless steel

Standard Finish:

- Stainless steel – natural

Stainless Steel

Hot Dip Galvanized Products

Introduction to Hot Dip Galvanized Products

Hot Dip Galvanized Finish:

Hot dip galvanizing is a form of galvanization. It is the technology of coating by passing the product through a molten bath of zinc at high temperature. The process of hot dip galvanizing results in a metallurgical bond between zinc and steel with a series of distinct iron zinc alloys. The hot dip zinc coating produces a much thicker, durable coating which prevents corrosion of the protected product by forming a physical barrier and by acting as a sacrificial anode if this barrier is damaged.

Application Process:

The product is skimmed (to remove surface oils), run through an acid wash, water washed, run through a dip fluxing solvent (to enhance the coating adhesion), dry pre-heated (typically 120°C to 180°C), hot dip galvanized (typically 450°C to 480°C), water cooled and then passivated.

Applications:

- To provide corrosion protection against road salt and other harsh environmental factors
- To meet Department of Transportation, mass transit or other project specifications
- For infrastructure projects, including bridges, subways, railways and other modes of transportation; many U.S. roads, bridges and tollways are decades old and in need of repair; many of these rework/rebuild projects require hot dip galvanized products
- For governmental use (many government projects, federal and/or state, require the use of hot dip galvanized products)

Certifications and Compliances:

- Conforms to finish thickness per ASTM A123/A123M
- UL Standard 514B
- NEMA FB1

FORM 5 CONDUIT OUTLET BODIES, COVERS & GASKETS

Applications:

Form 5 Malleable Iron Conduit Bodies are used in conduit systems to:

- Act as pull outlets for conductors being installed
- Provide openings for making splices and taps in conductors
- Act as mounting outlets for lighting fixtures and wiring devices
- Connect conduit sections
- Provide taps for branch conduit runs
- Make 90 degree bends in conduit runs
- Provide for access to conductors for maintenance and future system changes

Features:

- Interchangeable with Appleton Form 35 Conduit Bodies
- Built-in rollers on 1 1/4" to 4" C and LB bodies to facilitate wire pulling
- Smooth and rounded integral bushings for protection of wire insulation
- Solid neoprene gaskets may be converted to open type by pulling out perforated center section
- Stainless steel cover screws
- Domed sheet steel covers provide additional cubic capacity
- Integral gasket cover provides NEMA 4 rating

Certifications and Compliances:

- UL File No. E-15022
- UL Standard 514B
- cUL to CSA Standard C22.2 No. 18

Form 35 is a registered trademark of Appleton Electric/EGS.

Standard Materials:

- Bodies – malleable iron
- Gaskets – neoprene
- Covers – sheet steel or malleable
- Cover screws – stainless steel

Standard Finishes:

- Malleable iron – hot dip galvanized
- Neoprene – natural
- Sheet steel – electrogalvanized
- Stainless steel – natural

Hot Dip Galvanized

Hot Dip Galvanized Products

Mogul Bodies, Covers & Gaskets

Applications:

Mogul bodies are installed in conduit systems to:

- Act as pull outlets for conductors that are stiff, due to large size or type of insulation
- Provide the longer openings needed when pulling large conductors
- Prevent sharp bends and kinks in large conductors (protects insulation during installation)
- Provide ample openings for splices and taps
- Provide access to wiring for maintenance and future system changes

Features:

Mogul bodies have:

- Long openings
- Provision for easy bends
- Taper tapped hubs with integral bushings
- Stainless steel cover screws
- Covers are provided with integral gasket

Certifications and Compliances:

- UL Standard 514B
- Fed. Spec.: W-C-586d
- CSA Standard C22.2 No. 18

Standard Material:

- *Feraloy*® iron alloy

Standard Finish:

- *Feraloy* – hot dip galvanized

BUBXL WITH COVER & GASKET

Cat. #	Size
BUBXL6 HDG	2"
BUBXL8 HDG	3"

BUBXL Features:

XL Mogul Conduit Bodies and Covers are designed to ease installation, saving time and money while maintaining the quality you have come to expect from Eaton's Crouse-Hinds Division.

- Larger internal volume provides additional space for bending and pulling large conductors (complies with the 6X wire bending rule)
- Rollers improve the ability to pull larger conductors and protect the insulation when the wire is being pulled, greatly reducing cut cable incidents
- Cover design takes less time to install and can be used as a solid or with the center removed for more internal volume

Conduit Hubs

CONDUIT HUBS – MECHANICALLY GALVANIZED MALLEABLE IRON

Applications:

- Ideal for terminating electrical conduit through the walls of enclosures
- Designed for use indoors or outdoors with rigid conduit and IMC, specific applications include food processing plants, distilleries, breweries, sewage disposal plants, chemical plants, paper processing mills and refineries

Features:

- Male thread type
- Tapered female thread for rigid conduit and IMC
- Recessed o-ring gasket assures raintight and secure environmental connections
- Insulated throat provides smooth pulling surface
- Locking screw on the nut doubles as a grounding screw for added safety
- Complete size range from 1/2" to 6"
- Hubs fit standard knockouts; no special tools required

Certifications and Compliances:

- Class I, Division 2
- Class II, Divisions 1 & 2
- Class III, Divisions 1 & 2
- UL Standard 514B
- UL Listed – Certified by UL to CSA Standard C22.2 No. 18
- NEMA: FB-1
- Suitable for wet locations

Standard Material:

- Malleable iron

Standard Finish:

- Mechanically galvanized

FD Boxes & Covers

Applications:

Cast device boxes are installed to:

- Accommodate wiring devices
- Act as pull boxes for conductors in a conduit system
- Provide openings to make splices and taps in conductors
- Use indoors and outdoors
- Use in applications where boxes may be subjected to rough use

Features:

- Green ground screw is located on the flange of the box for easy ground wire termination and is standard on boxes
- Suitable for use in wet locations when used with gasket and flat blank covers
- Mounting lugs standard
- Tapered threaded hubs (NPT) with integral bushing
- Available as shallow (FS) or deep (FD) configuration
- Ample wiring room provided in either FS or FD configuration
- Wide selection of surface or flush covers available in three materials (sheet malleable, steel, aluminum)
- Malleable iron construction provides high tensile strength for strong, dependable service
- Covers are individually bagged and supplied with screws

Certifications and Compliances:

- cULus
- cCSAus

Standard Material:

- Malleable iron

Standard Finish:

- Hot dip galvanized

XJG Expansion Couplings

Applications:

XJG Expansion Couplings are used with rigid metal conduit and IMC:

- To couple together two sections of conduit subject to longitudinal movement
- In conduit runs to prevent damage to conduit supports such as in a building or on a bridge
- Indoors or outdoors in long conduit runs to permit linear movement caused by thermal expansion and contraction
- In conduit runs that cross structural joints
- On long conduit runs to prevent conduit from buckling and ensuing circuit failures

Features:

- Weatherproof and approved for use indoors or outdoors without an external bonding jumper
- Available in 1/2" through 6" trade sizes
- For use with rigid metal and IMC conduit
- Available in 4" and 8" maximum conduit movement
- Internal bonding springs and metallic bushings create high integrity internal ground connection and eliminate need for external bonding jumpers and clamps (up to 4" trade size)
- Optional redundant tinned copper bonding jumpers (BJ Series – ordered separately)
- UL Listed for use in wet locations
- Patented design

Certifications and Compliances:

- UL Standard 514B
- CSA 22.2 No. 18 3-12
- NEMA FB1
- Wet locations
- Third party certified as an effective grounding means (i.e. the path to ground is permanent and continuous), for two sections of conduit subject to expansion or contraction

Options:

- | | |
|--|---------------|
| Description | Suffix |
| • Available with redundant bonding jumper for visible indication of bonding (BJ Series)† (Order Separately) | |

Standard Materials and Finishes:

Body

- Steel – electrogalvanized
- Copper-free aluminum – natural
- *Feraloy*® iron alloy – electrogalvanized (5" and 6" only)

Reducer & Gland Nut

- 1/2" through 1": steel – hot dip galvanized
- 1 1/4" through 6": *Feraloy* iron alloy – hot dip galvanized
- Copper-free aluminum – natural

Packing

- PTFE composite

Washer & Bushing

†XJG Expansion Couplings use a metallic bushing and ground springs to create a high integrity internal ground connection. External ground straps offer a redundant ground path and easy visible indication of ground.

‡XJ128 HDG and XJ148 HDG are not internally grounded. A pair of 36" bonding jumpers are provided with fitting.

Hot Dip Galvanized Products

XD Deflection Couplings

Applications:

XD Couplings can be installed indoors, outdoors, buried underground or embedded in concrete in non-hazardous areas. XDs are used with standard rigid conduit or PVC rigid conduit. (PVC requires rigid metal conduit nipples and rigid metal-to-PVC conduit adapters). XDs provide a flexible and watertight connection for protection of conduit wiring systems from damage due to movement.

Typical applications include:

- Underground conduit feeder runs
- Runs between sections of concrete subject to relative movement
- Runs between fixed structures
- Conduit entrances in high rise buildings
- Bridges
- Marinas, docks, piers

Features:

- XD Couplings accommodate the following movements without collapsing or fracturing the conduit, and damaging the wires it contains:
 1. Axial expansion or contraction up to $\frac{3}{4}$ "
 2. Angular misalignment of the axes of the coupled conduit runs in any direction to 30°
 3. Parallel misalignment of the axes of coupled conduit runs in any direction to $\frac{3}{4}$ "
- Inner sleeve maintains constant I.D. in any position and provides a smooth insulated wireway for protection of wire insulation
- Watertight flexible neoprene outer jacket is corrosion-resistant and protects the grounding strap and the attachment points of the hubs
- Tinned copper flexible braid grounding straps assure grounding continuity
- Stainless steel jacket clamps for strength and corrosion resistance
- Standard tapered electrical threads fit standard rigid conduit
- Integral hub bushing protects insulation of conductors

Standard Materials and Finishes:

Hubs:

- *Feraloy*® iron alloy – hot dip galvanized

Outer Jacket:

- Molded neoprene – natural (black)

Jacket Clamps:

- Stainless steel – natural

Inner Sleeve:

- Molded plastic – natural (brown)

Bonding Strap:

- Braided tinned copper

1. Axial expansion/contraction

2. Angular misalignment

3. Parallel misalignment

Dimensions (in Inches):

Certifications and Compliances:

- UL Standard 514B
- CSA 22.2 No. 18 3-12
- Wet locations

Size Ranges:

- 1" to 6" (smaller sizes can be obtained by using reducing bushings)

Conduit Size	Cat. #	A Dia.	B Length

* $\frac{3}{4}$ " trade size can be created using third party certified 1" - $\frac{3}{4}$ " reducing bushings.

Hot Dip Galvanized Products

W-Series Junction Boxes

Applications:

Junction boxes, designed for hazardous and non-hazardous locations, are used in a variety of industries to perform the following functions:

- As a pull box
- To provide enclosures for splices and taps
- As a mounting box for multi-device control stations
- For housing apparatus, instruments and other devices

Considerations for Selection:

- Environmental location – the physical location of the junction box will call for proper construction of the box to meet National Electrical Code requirements and will affect the material and finish needed to meet weather and corrosive conditions, if present.
- Number and size of conductors – combined with the function to be performed (i.e. splicing, pull box), determines the amount of space needed, and therefore, the required physical dimensions of the box.
- Conduit layout – determines the number, size and location of the conduit openings in the box. It will also determine the type of mounting required (i.e. flush or surface positioning of the box).
- Flexibility required – if changes in the electrical system are anticipated, the box chosen should be easily adaptable, either by construction or size to the future system.

Options and Accessories:

A wide variety of options and accessories for special application are available for the various junction box families. These can be selected once the type of junction box has been determined. These options are shown on the individual pages. Some of the options available include:

- Special covers
- Hinged covers
- Materials and finishes
- Equipment mounting plates
- Conduit or device openings
- *Corro-free*™ epoxy powder coat – information available upon request

Quick Selector Chart:

Junction Box	Environmental Capability/ Type Designation	Size Range† L, W, D Inside	Max. Conduit Opening Size	Mtg.	Cover Type	Cover Material
WAB	Raintight/Type 3, 4 Dusttight/Type 12	4 x 4 x 2 to 8 x 8 x 6	4	Surface	Unflanged	Steel
WJB	Raintight/Type 3 Watertight/Type 4	4 x 4 x 4 to 36 x 24 x 24	6	Surface	Flanged	Steel
WJBF	Raintight/Type 3 Watertight/Type 4	4 x 4 x 4 to 36 x 24 x 24	6	Flush	External Flanged Recessed Sidewalk	Steel (Checkered)

†Length and width are inside dimensions. Depth is inside dimension without cover.

Drilled & Tapped Conduit Openings or Slip Holes:

All W-Series Cast Iron Junction Boxes may be ordered with drilled and tapped conduit openings or slip holes – subject to minimum spacing limitations.

To order a box from the factory with conduit openings, consult factory.

WJBF Junction Boxes

Applications:

WJBF Junction Boxes are primarily designed for surface mounting. These heavy duty boxes are installed in conduit systems to:

- Act as pull box for conductors
- Provide openings and space for making splices and taps in conductors
- Provide for branch conduit runs
- Provide access to conductors for maintenance and future system changes
- Enclose and protect electrical equipment

Features:

- Covers are suitable for vehicular traffic (H2O loading)
- Neoprene gasket cemented to cover
- Wide range of drilled and tapped conduit entrance sizes and locations permits extreme flexibility of use in conduit system
- Internal equipment mounting pads may be drilled and tapped for 1/4"-20 mounting screws
- Blind tapped into internal mounting pads
- Mounting straps are standard on smaller sized boxes up to 8" x 8" x 6"; for larger sizes, consult factory

Certifications and Compliances:

- Weatherproof
- Watertight
- NEMA 3, 4, 5
- NEMA 250
- CEC†:
 - Class II, Division 1, Groups E, F, G
 - Class III
 - Encl. 3, 4, 5
- H2O Vehicle Load Rating*

*Self-certify to H2O vehicle load rating equivalent to 16,000 lbs. on cover center.
 †cUL certified for sizes up to 8" x 8" x 6".

Standard Materials:

- Body – iron alloy
- Cover and mounting straps – heavy gauge steel (checkered)
- Gaskets – neoprene
- Cover screws – stainless steel

Standard Finish:

- Iron alloy and heavy gauge steel – hot dip galvanized

Options:

WAB Junction Boxes

Applications:

Where a heavy duty dustproof, weatherproof enclosure is desired, WAB Junction Boxes are installed in conduit systems to:

- Act as pull box for conductors
- Provide openings and space for making splices and taps in conductors
- Provide for branch conduit runs
- Provide access to conductors for maintenance and future system changes
- Enclose and protect electrical devices

Features:

- Flat neoprene cover gasket
- Wide range of drilled and tapped and slip hole conduit entrance sizes and locations permits extreme flexibility of use in conduit system
- Internal equipment mounting pads available blind tapped for 1/4"-20 mounting screws
- Blind tapped into internal mounting pads
- Mounting straps are standard on smaller sized boxes up to 8" x 8" x 6"; for larger sizes, consult factory

W-Series Junction Boxes Drilling & Tapping Information

DRILLED & TAPPED CONDUIT OPENINGS OR SLIP HOLES

All W-Series Cast Iron Junction Boxes may be ordered with drilled and tapped conduit openings or slip holes – subject to minimum spacing limitations listed in Table 1.

To order a box from the factory with conduit openings:

Option 1:

Send in a sketch of the box with openings specified (subject to spacing limitations specified in Table 1) **OR**

Option 2:

Step 1: Select one of the four standard arrangements in Table 2, based on number and location of conduit entries.

Step 2: Pick a symbol from Table 3 for each opening in the arrangement (see example).

Step 3: Table 4 lists the maximum size and number of conduit openings by box size and the spacing dimensions. Use Table 4 to verify the openings selected are permitted.

Example – Catalog Number Logic:

- Select box required: WJB121208.
- User wants one 1/2" drilled and tapped hole in the top of the box, two 1" drilled and tapped holes on both sides and three 1/2" slip holes in the bottom of the box.
- Select arrangement 3 because it allows up to three openings per side.
- Next, the symbols for the openings are substituted and written in clockwise order starting with location "a". The catalog number is written in three parts: part 1 – box number, part 2 – arrangement number, part 3 – symbols for the conduit openings.
- For this example, the box would be ordered as:

WJB121208-3-0AO C0C 1A1A1A C0C

Box Cat. #	Arrangement #	Symbols for Openings
WJB121208	3	0AO C0C 1A1A1A C0C

*Spacing dimensions apply to drilled and tapped holes. Space has been provided for a locknut and bushing when drilled and tapped holes are required.
†Top and bottom are the longer dimensions on enclosures which are not square.

Hot Dip Galvanized

Thin Wall Conduit Fittings (for EMT Conduit)

Set Screw Type Fittings – Product of the USA

PRODUCT OF THE USA FITTINGS

Applications:

Product of the USA conduit fittings are used:

- To join EMT to a box or enclosure
- To couple two ends of EMT conduit

Features:

- All connectors available with or without insulated throat
- Hex surfaces on fitting body and compression nut for easy wrenching
- Couplings utilize a ridge center stop for easy identification of adequate conduit sealing within the coupling
- Set screw connectors and couplings utilize a #2 combination head screw for secure installation
- Thick steel conduit locknut provides a strong, secure installation
- Made in the USA

Certifications and Compliances:

- cULus Listed
- Set screw connectors and couplings – concrete tight when tapped

Standard Materials and Finishes:

- Steel
- Zinc electroplated

Straight Connectors – Insulated

Thin Wall Conduit Fittings (for EMT Conduit)

Compression Type Fittings – Product of the USA – Raintight

PRODUCT OF THE USA FITTINGS

Applications:

Product of the USA conduit fittings are used:

- To join EMT to a box or enclosure in raintight environments
- To prevent water seepage into conduit, box or enclosure

Features:

- Flat surface on gland nut provides smooth, flat surface for easy wrenching
- Integral gasketed compression ring secures and seals for reliable installation
- Gasket on male threads of box connector seals installation for raintight connection between the box and the connector
- Available in insulated and non-insulated versions to meet any customer preference
- Angled teeth on locknut for secure bite into enclosure
- Extruded locknut with shoulder provides more threads for more secure installation
- Concrete tight
- Product of the USA

Certifications and Compliances:

Rigid/Intermediate Grade Conduit Fittings

Conduit Fittings – Product of the USA

TYPE CPR COMPRESSION FITTINGS PRODUCT OF THE USA

Applications:

Use Type CPR Product of the USA Compression Fittings for:

- Both IMC and metallic rigid conduit
- New work in poured concrete
- Maintenance, repairs and alterations
- Connections at panels and boxes
- New, altered or damaged stub-ups
- Applicable locations where field threading is impractical or undesirable

Features:

- UL Listed for use with IMC as well as metallic rigid conduit
- Unequaled versatility for the installer
- Unique gland ring design tightens up in fewer turns; provides outstanding pull-out strength; saves time and adds confidence
- Advanced, thoughtful design and premium materials team up for an installation you can be proud of

Certifications and Compliances:

- UL514B Fittings for Conduit and Outlet Boxes

Standard Materials:

- Bodies – steel
- Compression nuts – steel
- Compression rings – zinc plated steel
- Locknuts – zinc plated steel
- Insuliners – glass-reinforced polypropylene

Liquidtight Fittings

Liquidtight Conduit Fittings – Product of the USA

Applications:

- Used in tough, industrial and standard applications
- Used in government funded projects or projects that require domestic made material

Features:

- Liquidtight, raintight, oiltight for protection and long life in wet, dusty and corrosive environments
- Hex shaped gland nut allows for easy wrenching, providing a fast, tight installation
- Suitable for wet locations
- Reusable, long ferrule prevents pull-out and tight bend conduit pop-out
- Furnished with locknut and sealing ring
- Third party certified
- Available in straight, 90 and 45 degree configurations
- Available in sizes $\frac{3}{8}$ " to 4"

Certifications and Compliances:

- UL Listed liquidtight flexible metal conduit fittings are suitable for use in the following hazardous locations under NEC:
 - Class I, Division 2;
 - Class II, Divisions 1 & 2; and
 - Class III, Divisions 1 & 2;
 - Suitable for grounding in sizes $\frac{3}{8}$ " through $1\frac{1}{4}$ " under NEC
- UL Standards 514B, 467
- cUL Standard C22.2 No. 18F
- UL File No. E-19189

Standard Materials:

- Body – straight: steel
45°: malleable iron
90°: malleable iron
- Gland nut – steel
- Ferrule – steel
- Gland nut sealing ring – nylon
- Sealing gasket – polypropylene
- Locknut – steel

Standard Finishes:

- Steel – zinc electroplate
- Malleable iron – zinc electroplate

Product of the USA

CG Series Color-coded Cord Grips

Conduit Fittings – Product of the USA

Applications:

CG Series Color-coded Cord Grips with neoprene bushings are for use with portable cords, including S, SO, STO, ST, SJ, SJT, SJTO and SVO.

CG Cord Grips are installed to:

- Provide a means for passing a cord into an enclosure
- Form a watertight seal for cord
- Provide pull-out protection for cord, ensuring a secure connection

Features:

- Neoprene bushings are color-coded by cable diameter for quick and easy identification of proper cord grip
- Rugged construction protects cord from damage
- Compact design permits close spacing of fittings on panel applications
- Tightening one nut creates watertight seal
- Male tapered thread NPT

Certifications and Compliances:

- UL Standard 514B
- UL File No. E-23223
- CSA Standard C22.2 No. 18
- Suitable for NEMA 4 enclosures and other wet locations
- Suitable for use in Class I, Division 2 hazardous locations when installed in accordance with NEC 501.10(B)(2)

Standard Materials:

- Body – 1/2" through 1": steel
- Nut – steel
- Bushing – neoprene

Standard Finishes:

- Body (steel) – electrogalvanized
- Nut (steel) – electrogalvanized

Switch & Outlet Boxes – Technical Data

General Information:

A box, with or without a bracket or bar hanger, intended for support of a fixture/luminaire weighing 50 lbs. or less is marked "FOR FIXTURE/LUMINAIRE SUPPORT" on the carton to indicate that the box is intended for fixture/luminaire support. A box, with or without a bracket or bar hanger, intended for support of a fixture/luminaire weighing more than 50 lbs. is marked with the weight of the fixture/luminaire to be supported. Metallic device boxes and device plaster rings have not been investigated for support of a ceiling fixture/luminaire unless marked for use in ceilings, walls and with the weight of the product to be supported. Metallic device boxes intended to be installed in an existing structure have been investigated for the support of utilization equipment weighing not more than 6 lbs.

Article 314 of the National Electrical Code® (NEC®) covers the installation and use of boxes. The article includes table references that guide the electrician in the selection of the proper size box necessary to safely accommodate electrical service requirements. The box capacity table is reproduced in part from NEC as a quick reference and guide. The NEC should be consulted for complete details.

Eaton's Crouse-Hinds Series products are produced in accordance with the requirements of UL514A, UL514B and UL514C, and are classified for fire resistance according to the standard, Fire Tests of Building Construction and Materials, ANSI/UL263, ASTM E 119 and NFPA 251. This listing is based on products when used in a fire rated (2 HR) wall or ceiling. Eaton's Crouse-Hinds Series steel boxes are listed with UL File No. E-23156 and Eaton's Crouse-Hinds Series non-metallic boxes are listed with UL File No. E-102328 and UL (2 HR fire rated) File No. R9933.

Eaton's Crouse-Hinds Series switch and outlet boxes comply with the requirements of NEMA Standard OS-1, NFPA 70-370 and Federal Spec. #W-J-800E.

Under File No. E-23156, Eaton's Crouse-Hinds Series concentric and "moon" KO style boxes, the following is stated "Suitable for bonding without any additional bonding means around concentric (or eccentric) knockouts where used in circuits above or below 250V."

Wall thickness on all steel boxes is 0.0625" with minimum galvanization thickness of G60.

Switch & Outlet Boxes – Technical Data

OUTLET BOXES & COVERS

Eaton's Crouse-Hinds Division has assembled one of the most complete outlet box product lines in the business. We've been leading in quality and selection for decades, and throughout the steel outlet box offering, you will find innovative products and solutions that save labor, cut material costs and increase productivity.

We have a complete offering of:

- 4" and 4¹/₁₆" square drawn and welded boxes
- 4" square and 4¹/₁₆" square, switch, masonry, utility, outlet, ceiling, fan and gangable boxes
- Drawn boxes available with concentric knockouts, combining 1/2" and 3/4" knockout
- Complete line of covers, partitions, extension rings and accessories
- Uni-Mount™ covers
- PRE-formance™ products
- Pre-assembled boxes which includes Uni-Mount cover attached to 4" square box
- Pre-fabricated boxes which includes Uni-Mount cover attached to 4" square box with ground screw and lead installed
- Fire alarm boxes and covers

Standard Materials – Steel Covers, Outlet and Switch Boxes:

- Steel boxes and covers are made of .0625 inch thick pre-galvanized sheet steel
- Handy box covers are made of .030 inch thick galvanized sheet steel

BRACKETS USED ON BOXES

"F" BRACKET

Mounts on face of stud. See catalog number for set back. For wood studs.

"D" BRACKET

Side mount bracket with set up hook and guide tabs for automatic positioning. Standard bracket set back is 5/8". For wood and metal studs.

"S" BRACKET

Side mount brackets with set up hook for wood or metal studs. Standard bracket set back is 5/8".

"C" BRACKET

Ceiling box bracket for wood studs.

"VS" BRACKET

Plain flat mounted bracket for use on wood or metal studs. No set back.

"VMS" BRACKET

Side bracket for use with wood or metal studs. Provides set up tabs to position on face of stud.

"VP" BRACKET

Side bracket with set up hooks for wood studs.

"SSB" BRACKET

Positions box on either side of a steel stud.

"MSB" BRACKET

Position box on either side of steel stud.

CLAMPS USED ON BOXES

Cat. # TP900

MC-BX
FOR ARMoured & METAL-CLAD (MCI) CABLE

NM-1

NM-2
FOR NON-METALLIC CABLE

NM-4

MOUNTING EARS

Cat. # TP901

ONE SCREW EAR

Cat. # TP902

TWO SCREW EAR

Mounting ears are available on many of our switch boxes. They are set forward in $\frac{1}{16}$ " the "old way" position. Two screw ears are generally used on shallow boxes and one screw ears on deep boxes.

BOX ENTRY DETAILS

1/2" Conduit KO

3/4" Conduit KO

1" Conduit KO

Concentric 1/2" and 3/4" KO

Eccentric 1/2" and 3/4" KO

Cable Pry-outs Always in Pairs

Knockouts and Pry-outs

Conduit KOs have standard trade size dimensions. KOs are uniform and true for attachment of cable or conduit connectors. Pry-outs for cable entrance are slotted – a twist with screwdriver removes them. KOs and pry-outs are precision stamped to permit easy removal, but remain sufficiently strong and sturdy when not removed.

4" square drawn boxes feature a $\frac{1}{2}$ " and $\frac{3}{4}$ " "inverted" concentric KO – easily removed. Our 4" square welded boxes feature our $\frac{1}{2}$ " eccentric KO which also features easy removability of both the $\frac{1}{2}$ " and $\frac{3}{4}$ " KOs.

Note: These KOs are suitable for bonding without bonding jumpers around concentric (or eccentric) knockouts where used in circuits above or below 250V.

Steel Square Boxes

4" SQUARE OUTLET BOXES & COVERS

Applications:

- For use with conduit
- Available in red for fire alarm applications

Features:

- Ideal for exposed work applications, providing an easy method for the installation of electrical devices (switches, receptacles, fans, lights, etc.)
- Raised ground screw location in the welded boxes saves time in installation
- Available with pre-installed ground screws and pigtails for increased labor savings
- Knockouts are suitable for use without a bonding jumper in circuits above or below 250 volts
- Available in two depths for differing cubic capacity requirements
- Welded or drawn construction to match customer preference
- Extensive cover offering to meet various customer applications and needs

FLEXIBLE FIXTURE HANGERS

TPSFH Square Flexible Fixture Hangers are used in commercial or light industrial applications where HID high bay and low bay lighting fixtures are used. Specific applications include storage facilities, shipping warehouses, retail and DIY facilities.

Features:

- Suitable for use with 1/2" or 3/4" fixture conduit stems, these hangers allow the conduit stem of the fixture (luminaire) to swing in any direction; maximum swing angle is 26° from vertical max. slope angles 22 1/2°
- Available for attachment to 4" square steel boxes
- Quickly and easily attached by two screws
- Hangers are drilled and tapped for use with 3/4" conduit stem as standard and come supplied with a 3/4" - 1/2" reducer for 1/2" conduit stem applications

Certifications and Compliances:

- UL1598
- CSA C22.2 No. 250
- Suitable for damp locations

Standard Materials and Finishes:

- Material – sheet steel
- Finish – zinc chromate for corrosion resistance

Steel Square Covers

METALGUARD™ PROTECTIVE PLATES

Applications:

- For use with single, two, three and four gang commercial or residential boxes/plaster rings; with or without devices, switches, GFCI, etc. installed
- Commercial or residential ceiling boxes

Features:

- Seals out sheetrock mud, sanding dust and paint overspray to keep the electrical box and its wiring free from contaminants
- Heavy duty reusable metallic plate provides mechanical protection to box and wiring and speeds up trim process
- Easy to install; all you have to do is push them in; they come out easy – just put a screwdriver into the slot in front, turn and pull them out
- Reduces risk of callbacks and expense of rework because of wire and box damage
- MetalGuard serves as a guide for router in cutting out boxes

Standard Material & Finish:

- 18 gauge steel
- Natural finish

Steel Square Covers

UNI-MOUNT™ COVERS

The Uni-Mount combines the features of a mounting device plate with those of a box support, giving you one universal plate for all of your needs. Specifically designed for use with metal or wood studs:

The new and improved version incorporates four small holes on the left side (support side) of the bracket. These holes allow for the attachment of box mounting brackets to allow for use of both sides of the stud. The holes are strategically located to accept either the Eaton's B-Line Series BB423 bracket or the Caddy H23 bracket. Additionally, the viewing hole has been significantly enlarged (and is now diamond shaped) to make it even easier to find mark lines on the stud.

Features:

- Guide tabs ensure consistent alignment on stud
- Stud alignment hole ensures consistent mounting height
- Rigid bracket design eliminates the need for far side support
- Available as a single or two device cover
- Universal design fits all 4" square boxes
- Available in 1/2", 5/8" and 3/4" raised
- Can be ordered pre-assembled to popular 4" square boxes
- Fast and easy installation
- Can be used in multiple applications, resulting in less items to stock
- Less labor intensive
- Less material handling
- No multiple assemblies to handle
- Can be used in Class II communications outlets for low voltage without a box
- UL Listed and CSA certified*
- UL File No. E-23156

*CSA requires a far side support.

4¹¹/₁₆" SQUARE OUTLET BOXES & COVERS

Applications:

- For use with conduit
- For use in commercial and industrial applications, where larger sized conductor or wiring devices are needed and additional volume is required
- Available in red for fire alarm applications

Features:

- Ideal for exposed work applications, providing an easy method for the installation of electrical devices (switches, receptacles, fans, lights, etc.)
- Raised ground screw location in the welded boxes saves time in installation
- Concentric knockouts have a 1/2" and 3/4" knockout in the same location for customer flexibility
- Knockouts are suitable for use without a bonding jumper in circuits above or below 250 volts
- Available in two depths for differing cubic capacity requirements
- Welded or drawn construction to match customer preference
- Extensive cover offering to meet various customer applications and needs

Steel Masonry Boxes

GANGABLE MASONRY BOXES

UL LISTED

Features:

- The gangable feature allows the option of creating a multiple gang box from a single gang box by simply removing the combo head screw holding the side with a #2 bit and connecting the two (or more) boxes together re-using the screws
- Non-metallic partitions (ordered separately) install quickly and easily without tools in multi-gang boxes and are used to separate power and control circuits within the same box, as required by the National Electrical Code®

FLEXIBLE FIXTURE HANGERS

TPRFH Flexible Fixture Hangers are used in commercial or light industrial applications where HID high bay and low bay lighting fixtures are used. Specific applications include storage facilities, shipping warehouses, retail and DIY facilities.

Features:

- Suitable for use with 1/2" or 3/4" fixture conduit stems, these hangers allow the conduit stem of the fixture (luminaire) to swing in any direction; maximum swing angle is 26° from vertical max. slope angles 22 1/2°
- Available for attachment to round or octagonal steel boxes
- Quickly and easily attached by two screws
- Hangers are drilled and tapped for use with 3/4" conduit stem as standard and come supplied with a 3/4" - 1/2" reducer for 1/2" conduit stem applications

Certifications and Compliances:

- UL1598
- CSA C22.2 No. 250
- Suitable for damp locations

Standard Materials and Finishes:

- Material – sheet steel
- Finish – zinc chromate for corrosion resistance

Steel Specialty Boxes

4" FAN RATED OCTAGON CONCRETE BOX UL LISTED

TP643

Applications:

- Used in poured deck applications
- Typical construction includes: high rises, apartments, condominiums and restaurants with outdoor dining areas
- Installed on wooden or steel forms and concrete poured around
- Upon removal of the forms, the box is flush with the concrete
- It is common, and continuing to become even more so, to have ceiling fans mounted to these boxes; because of the additional mounting support boss, this new box is suitable for use with fans of up to 70 pounds and fixtures up to 90 pounds

Features:

1. The TP643 Fan Rated Concrete Box is made from two-piece welded construction and is supplied with two rows of 1/2" and 3/4" dedicated KOs
2. The box is also supplied with two external mounting ears which are used to secure the box to the forms
3. The fan (or fixture) is held securely in place by the two 10-32 x 1 1/2" long pan head screws and lock washers; the screws attach to the specially designed boss
4. There are two 8-32 x 1/2" screws provided for attachment of a box plate/cover (TP648, TP649 or TP650 – ordered separately)
5. Mounting support boss and locknuts allow the TP643 box to be used with fans of up to 70 pounds and fixtures up to 90 pounds

NON-METALLIC CEILING FAN BOXES

2³/₁₆" DEEP

UL LISTED

With clamps for non-metallic cable.

All mounting hardware supplied; suitable for support of fans weighing up to 35 lbs.

Features:

- Made of heavy duty, engineered thermoplastic material
- Offers the labor saving feature of quick entry and integral clamping
- Eliminates the need to use a screwdriver to break open pry-outs
- The easy access entry point serves as a wire clamp, eliminating time required to mechanically secure the wire to the box

Steel Square Boxes

4" SQUARE OUTLET BOXES & COVERS

Applications:

- For use with conduit

Features:

- Ideal for exposed work applications, providing an easy method for the installation of electrical devices (switches, receptacles, fans, lights, etc.)
- Raised ground screw location in the welded boxes saves time in installation
- Standard with pre-installed ground screws and available with ground pigtails for increased labor savings
- Knockouts are suitable for use without a bonding jumper in circuits above or below 250 volts
- Available in different depths for differing cubic capacity requirements
- Welded or drawn construction to match customer preference
- Extensive cover offering to meet various customer applications and needs

Certifications and Compliances:

- CSA Listed
- CSA File No. LR 97704-2

Steel Boxes

PVC Switch Boxes

Applications:

Non-metallic Switch and Outlet Boxes are used:

- In branch circuit wiring as a splice point
- To mount wiring devices such as switches and receptacles
- To provide mechanical protection for wiring systems and electrical devices

Features:

- Available for use with wood or metal studs to meet any construction preference
- Quick entry feature on all non-metallic boxes offers labor savings – no need to break out knockouts – simply push the non-metallic cable into the box; no tools are required; no need to remove knockouts
- Unique configuration of this quick entry feature on single gang boxes provides a self-feeding feature that eliminates the need to reach inside the box to pull the wire out
- Integral labor saving clamping feature on two, three and four gang boxes; the multiple gang box unique entry also serves as a clamp, eliminating the need to mechanically secure the cable inside the box
- There are no separate clamps or screws to install or tighten; each entry into the multiple gang boxes has the quick entry feature, allowing the installer to simply push the cable into the box without the need for tools or removal of knockouts, so the cable can be inserted where it is required

Certifications and Compliances:

- UL File No. E-102328
- Classified for use in fire rated (2 HR) wall or ceiling; Fire Rating No. R9933

Standard Materials:

- PVC (Polyvinyl Chloride Compound)

PRE-formance™

Giving you the convenience of a pre-fabricated product, plus the flexibility to accommodate job site requirements.

Contractors are continually looking for ways to improve job site efficiency and properly align skilled resources to meet tight commercial construction project deadlines. PRE-formance™ delivers the pre-engineered and pre-assembled combination of mounting method, outlet box, plaster ring, devices and leads to simplify branch wiring installation.

Certifications and Compliances:

- UL Listed and cUL Listed
- UL File No. E-23156

BASIC ASSEMBLIES

- Available with the most popular drawn and welded boxes with ground screw and pigtail lead already installed
- Patented Uni-Mount™ cover combines plaster ring and mounting method
- Standard pre-fabricated assemblies with mounting brackets, boxes, mud rings, ground screw and pigtail leads
- Most popular configurations available from stock

CUSTOM ASSEMBLIES

- Cafeteria style selection of our extensive line of mounting brackets, boxes, plaster rings, wiring devices and other associated branch wiring accessories
- Assembled-to-order pre-fabricated products for both AC/MC and EMT applications
- Can be ordered with: wiring devices with pigtail leads and push-in connectors, AC/MC or EMT connectors installed, cable whips attached per customer application
- Assembled from stock components to meet tight job requirements

COMPLETE ASSEMBLIES

- The most complete turn-key solution for commercial construction projects; the process begins with your architectural and electrical engineering drawings and delivers a total pre-fabricated branch wiring system: custom produced, labeled, packaged by room and floor and delivered to your exact location
- The ideal solution for commercial buildings with repetitive installations, such as hotels, condominiums, commercial and retail offices, hospitals and apartments
- Job-specific customized drawings and labels simplify material handling and speed installation
- Dedicated project management and engineering expertise through every step of the project
- Innovative PRE-formance products are designed *by* contractors for contractors, and provide ease of wiring and job site flexibility to get the job done right and on time
- Includes flexible products designed with pre-fabrication, productivity, safety and job site speed in mind
- Contractors can realize 30 to 40% labor savings over traditional “stick-build” wiring methods for greatly improved job site efficiency

Basic Assemblies

UNI-MOUNT™ ASSEMBLIES

Uni-Mount Assemblies combine the patented Uni-Mount cover (mounting method and mud ring, all in one) to a 4" square box with ground screw and lead installed to simplify ordering, receiving and improve job site speed.

Certifications and Compliances:

- UL Listed and cUL Listed
- UL File No. E-23156

Pre-fabricated Box Features:

- Uni-Mount provides a secure box support and features a built-in plaster ring
- Can be field assembled with outlet box for power applications or used without a box for low voltage applications
- Pre-fabricated Uni-Mount is available with most popular outlet boxes with a choice of 1/2", 5/8" or 3/4" raised cover and includes ground screw and lead
- Rigid bracket design eliminates the need for far side support
- Guide tabs ensure alignment on studs

Uni-Mount Features:

- Uni-Mount combines the features of a mounting device plate with those of a box support, giving you one universal plate for all of your needs; specifically designed for use with metal or wood studs
- New and improved Uni-Mount incorporates four small holes on the left side (support side) of the bracket; these holes allow for the attachment of box mounting brackets to allow for use of both sides of the stud
- The holes are strategically located to accept the B-Line BB423 bracket; additionally, the viewing hole has been significantly enlarged (and is now diamond shaped) to make it even easier to find mark lines on the stud

Basic Assemblies

UNI-MOUNT™ ASSEMBLIES (CONTINUED)

Uni-Mount Assemblies combine the patented Uni-Mount cover (mounting method and mud ring, all in one) to a 4" square box with ground screw and lead installed to simplify ordering, receiving and improve job site speed.

Cat. #	Description Pre-fabricated Box, Cover, Ground Screw & Lead Assembly	Capacity Cu. In.	Unit Qty.	Wt. Lbs. Per 100
For AC/MC Cable				
TP30454PF	1½" Deep Welded Box Assembled to ½" Raised Single Gang Uni-Mount Cover	24.8	25	114
TP31454PF	1½" Deep Welded Box Assembled to ⅝" Raised Single Gang Uni-Mount Cover	25.3	25	117
TP32454PF	1½" Deep Welded Box Assembled to ¾" Raised Single Gang Uni-Mount Cover	26.5	25	121
TP35454PF	1½" Deep Welded Box Assembled to ½" Raised Two Gang Uni-Mount Cover	27.0	25	109
TP36454PF	1½" Deep Welded Box Assembled to ⅝" Raised Two Gang Uni-Mount Cover	29.0	25	123
TP37454PF	1½" Deep Welded Box Assembled to ¾" Raised Two Gang Uni-Mount Cover	30.0	25	125
TP30431PF	2⅞" Deep Welded Box Assembled to ½" Raised Single Gang Uni-Mount Cover	34.1	25	134
TP31431PF	2⅞" Deep Welded Box Assembled to ⅝" Raised Single Gang Uni-Mount Cover	34.6	25	137
TP32431PF	2⅞" Deep Welded Box Assembled to ¾" Raised Single Gang Uni-Mount Cover	35.8	25	141
TP35431PF	2⅞" Deep Welded Box Assembled to ½" Raised Two Gang Uni-Mount Cover	36.3	25	129
TP36431PF	2⅞" Deep Welded Box Assembled to ⅝" Raised Two Gang Uni-Mount Cover	38.3	25	143
TP37431PF	2⅞" Deep Welded Box Assembled to ¾" Raised Two Gang Uni-Mount Cover	39.3	25	145

UNI-MOUNT™ ASSEMBLIES WITH OPEN BACK BOX

Patented Open Back Boxes maximize working area to reduce wiring time and eliminate interference problems. Eliminates the need for disassembly at the job site. All Open Back Box Assemblies are shipped with TP472 flat, blank back covers.

Cat. #	Description Pre-fabricated Open Back Box, Cover, Ground Screw & Lead Assembly	Capacity Cu. In.	Unit Qty.	Wt. Lbs. Per 100
For Conduit				
TP3040DPF	2⅞" Deep Welded Open Back Box, ½" Raised Single Gang Uni-Mount Cover, Ground Screw, Lead and Back Cover	24.8	25	114
TP3140DPF	2⅞" Deep Welded Open Back Box, ⅝" Raised Single Gang Uni-Mount Cover, Ground Screw, Lead and Back Cover	25.3	25	117
TP3240DPF	2⅞" Deep Welded Open Back Box, ¾" Raised Single Gang Uni-Mount Cover, Ground Screw, Lead and Back Cover	26.5	25	121
TP3540DPF	2⅞" Deep Welded Open Back Box, ½" Raised Two Gang Uni-Mount Cover, Ground Screw, Lead and Back Cover	27.0	25	109
TP3640DPF	2⅞" Deep Welded Open Back Box, ⅝" Raised Two Gang Uni-Mount Cover, Ground Screw, Lead and Back Cover	29.0	25	123
TP3740DPF	2⅞" Deep Welded Open Back Box, ¾" Raised Two Gang Uni-Mount Cover, Ground Screw, Lead and Back Cover	30.0	25	125

Additional Uni-Mount/box configurations available. Consult factory for details. Remove the 'PF' in catalog number for boxes without ground screw and lead. For stranded wire, replace 'PF' with 'PFA'.

PRE-formance™

Single Sided, Double Sided, Floor Mount, Telescoping Slider, Multi-mount, Open Bracket & T-bar Assemblies

SINGLE SIDED ASSEMBLIES

Single Sided Direct Mount Assemblies – all catalog numbers contain a single sided direct mount bracket (for 2½” and 3½” studs), 4” square steel box, mud ring and 8” insulated solid ground wire with ground screw.

UL and cUL Listed

UL File No. E-324733

Cat. #	Description Pre-fabricated Box, Cover, Ground Screw & Lead Assembly
PFH3 40D58	BB423 Single Sided Bracket, Open Back 2½” Deep Box with Pigtail, ⅝” Raised 1G Mud Ring
PFH3 40D75	BB423 Single Sided Bracket, Open Back 2½” Deep Box with Pigtail, ¾” Raised 1G Mud Ring
PFH3 40DAR*	BB423 Single Sided Bracket, Open Back 2½” Deep Box with Pigtail, Adjustable 1G Mud Ring
PFH3 4D58	BB423 Single Sided Bracket, TP403 2½” Deep Box with Pigtail, ⅝” Raised 1G Mud Ring

PFBH24 292N	BA50 Bar Hanger, TP292 2 1/8” Deep Octagon Box

Uni-Mount™ Assemblies with Wiring Devices

PRE-formance Uni-Mount Assemblies – all catalog numbers contain a Uni-Mount cover (TP31000 - TP37000), patented 4" square open back box, an 8" insulated solid box ground wire and one or two pre-wired Eaton's Wiring Devices with leads, push-in connectors and device protect plates.

Uni-Mount Assemblies with Wiring Devices are shipped standard with open back boxes. Open back boxes maximize the working area to reduce wiring time and eliminate interference problems. They virtually eliminate the need for disassembly at the job site. Open back boxes are available in either 1½" or 2½" deep with ½" and ¾" eccentric knockouts. All 4" square open back box assemblies are shipped with TP472 flat, blank back covers.

All assemblies are shown with ivory colored devices. At the end of the catalog number, replace the 'V' with 'W' for white colored device. Other device colors and types are available. Consult factory for details.

PF3DS 40S275C203W3WV	PF3DS 40S275I203W3WV	1 1/2" Deep	3/4" Two Gang

- All open back box assemblies are shipped with TP472 flat, blank back covers, ground screw and lead.
- Other box types, device colors, mud ring depths, brackets and assembly configurations are available. Consult factory for details.
- To change the color of device from ivory (as shown) to white, substitute 'V' (ivory) with 'W' (white). For example: PF3DS 40D58C20DV becomes PF3DS 40D58C20DW.
- All receptacles are shipped standard ground up. Add suffix DN for ground down.
- All assemblies shipped standard with metal device protect plates.
- Pre-installed connectors available on all assembly types. Consult factory for details.

Floor Mount Assemblies with Wiring Devices

PRE-formance Floor Mount Assemblies – all catalog numbers contain a floor mount bracket (BBF18) which positions device at 18" on center, a 4" square box, an 8" insulated solid box ground wire with ground screw and one or two pre-wired Eaton's Wiring Devices with leads, push-in connectors and device protect plates.

Floor Mount Assemblies with Wiring Devices are shipped standard with open back boxes. Open back boxes maximize the working area to reduce wiring time and eliminate interference problems. They virtually eliminate the need for disassembly at the job site. Open back boxes are available in either 1½" or 2½" deep with ½" and ¾" eccentric knockouts. All 4" square open back box assemblies are shipped with TP472 flat, blank back covers.

All assemblies are shown with ivory colored devices. At the end of the catalog number, replace the 'V' with 'W' for white colored device. Other device colors and types are available. Consult factory for details.

- Other box types, device colors, mud ring depths, brackets and assembly configurations are available. Consult factory for details.
- To change the color of device from ivory (as shown) to white, substitute 'V' (ivory) with 'W' (white). For example: PF16TS 4DAC20DV becomes PF16TS 4DAC20DW.
- All receptacles are shipped standard ground up. Add suffix DN for ground down.
- All assemblies shipped standard with metal device protect plates.
- Pre-installed connectors available on all assembly types. Consult factory for details.
- Telescoping Slider Bracket Assemblies are shipped with traditional closed back box, ground screw and stranded leads on box and devices.
- Device leads and push-in connectors are left inside the box and will not be pulled out of knockouts prior to shipment unless specified by customer.

Multi-mount Assemblies with Wiring Devices

PRE-formance Multi-mount Assemblies – all catalog numbers contain a multiple mount bracket (available in either 16” stud spanning or 24” stud spanning). Each position may contain an outlet box, an 8” insulated solid box ground wire with ground screw and one or two pre-wired Eaton’s Wiring Devices with leads, push-in connectors and device protect plates.

Catalog Numbering System for Additional Assembly Configurations

PRE-formance™ Catalog Numbering System for Additional Assembly Configurations:

Part number example
PF16TS 4D75C20DU TR V X X

Complete

The most complete turnkey solution for commercial construction projects – the ideal solution for commercial buildings with repetitive installations, such as hotels, condominiums, commercial and retail offices, hospitals and apartments.

PRE-formance Complete delivers:

- Total pre-fabricated branch wiring system custom produced with Eaton's Crouse-Hinds Series components, labeled, packaged by room and floor, delivered to your exact location
- Lower total cost of ownership
- Simplified material management, improved material handling and job site safety
- Flexibility to allow skill set allocation to match job requirements
- Elimination of job site material "piles" and inefficient searching for pieces and parts at the job site
- Elimination of job site "engineering"
- Reduction of overages and scrap, including expensive wire and cable
- 30% to 40% labor savings over traditional "stick-build" wiring methods for greatly improved job site efficiency

PRE-formance™

Complete

From customized take-off and proposal, through kick-off meetings, mock-ups and status meetings, the focus is on delivering the custom solution that will drive job site productivity and help make your job a better job – faster, easier, safer and more profitable.

Customized Solution Using Unique/Patented Products:

- Patented Uni-Mount™ combination mounting and device plate
- HomeRunner™ 8 x 8 or 12 x 12 box with patented clamping system; flush or surface mount cover available
- Quick-Lok™ Pro snap-in fittings listed for use with AC/MC, FMC or MCI-A
- Patented open back box with raised ground dimple; third party listed includes ground pigtail and back closure plate; allows access from either side of the box
- Customized home runs and labeling provides easy circuit identification during construction and for future maintenance requirements

Detailed Proposal:

- Includes complete transparency as to what is included and everything needed for project approval submittals

Quotation Take-off Drawings Provided with Device Highlights and Quantity

Complete

Dedicated Project Management:

- Dedicated factory project management and local sales support and expertise
- Customized project management includes:
 - Gantt charts
 - Secure shared project folders
 - Conference calls and site visits

Customized Packaging/Labeling:

- Customized packaging and labeling to simplify job site receiving and handling through job-specific cartons labeled by project floor, unit or area
- Ergonomically designed boxes help eliminate the need for special equipment and help reduce material handling risks

Complete

Customized Labels and Drawings:

- Customized labels and drawings improve job site layout and provide comprehensive point-to-point connection data for faster installation and elimination of “field engineering”

The image displays a physical PRE-formance unit on the left, which is a metal cabinet housing electrical components. To its right is a set of technical drawings. The top-left drawing is a detailed wiring diagram with a legend. The middle drawing is a floor plan showing the unit's placement in a room. The bottom-right drawing is a 'ONE LINE DIAGRAM' showing the electrical system's configuration. A title block on the right identifies the manufacturer as Crouse-Hinds.

Project Close-out Meetings:

- Project close-out meetings to review punch list items (if any) and share lessons learned

PRE-formance™ Complete Features:

- Simple, easy to install, UL Listed solution ideal for commercial construction projects and improves job site efficiency
- Modeled by architects and designed by engineers to meet exact project requirements
- Dedicated factory project management and local sales expertise and support
- Product flexibility allows for adjustment on site, if required
- Re-allocates labor, eliminates scrap and material piles, reduces spot buying and consolidates material ordering and receiving
- Helps improve job performance and profitability

HomeRunner™ Boxes

Commercial Construction Screw Cover Junction Box with Patented Clamps

Applications:

HomeRunner™ Junction Boxes are designed specifically for commercial construction applications to provide a spacious, flexible junction box for terminating home runs and other electrical wiring. Its patented clamping design and flexibility make it the most convenient, labor savings junction box available.

Features:

- Designed and approved for use with AC, MC, MCI-A, NM or EMT
- Patented clamping feature eliminates the need for field punching/drilling of knockouts and installation of connectors
- Standard surface or flush cover options – eliminates the need for custom covers
- Multiple mounting holes and knockouts for installation flexibility
- Optional stud bracket for direct mounting to steel or wood studs
- Kick stand far side support available with HR080803
- Available in two sizes to match customer requirements and preferences
- Third party certified for U.S. and Canada

Call-out Features:

1. Patented clamping system – provides maximum flexibility and maximum grip; third party certified for use with AC, MC, MCI-A or non-metallic sheathed cable
2. Welded steel construction – provides strong, dependable service and large cubic capacity for ease of wiring
3. Combination eccentric knockouts – on sides for quick and easy access, combination KOs in the back of the box are ideal for applications where joist spacing is too tight for side entry
4. Terminal cup washer and flanged nut – quick, easy service ground termination or attachment of grounding bus bar
5. Two cover options – square for surface mounted applications or oversized for flush mount applications
6. Extensive mounting flexibility – pre-drilled holes in side and back for direct mounting or for mounting bracket (purchased separately)
7. Far side support – screws on quickly and easily and is perforated which allows for adjustment in dual thickness, fire rated walls; shipped standard with 8" x 8" x 3" models

Certifications and Compliances:

- For U.S. and Canada: CSA File No. 248782
- Certified to UL50 and UL514B, and CSA C22.2 No. 18.3-04 & No. 40-M1989

Standard Materials:

- Enclosure and cover – pre-galvanized steel
- Hardware – zinc plated steel

Weatherproof

While-in-use Covers

FOR ONE & TWO GANG BOXES

POLYCARBONATE, "CONSTANT USE" DUPLEX/GFI COVER UL & CSA LISTED

Single gang covers have a patented design with movable hinges that reposition easily for vertical or horizontal mounting, with no tools required.

While-in-use Covers offer a rugged, versatile design that protects against various elements such as rain, snow and ice. They are available in gray and white; single gang, single gang deep and double gang to offer 98 different configurations. The single gang covers have a patented design with movable hinges that reposition easily for vertical or horizontal mounting, with no tools required. They are great for use with vending machines, holiday lighting, portable signs, outdoor lighting, outdoor hot tubs and more.

Features:

- Rugged, UV-resistant polycarbonate cover and back protects device inside from rain, sleet and snow without cracking or breaking and is non-corrosive and non-conductive
- Covers have a versatile product design with movable hinges that reposition for vertical/horizontal mounting, which reduces the number of SKUs
- Each cover includes a pre-mounted neoprene gasket on the back, ensuring the gasket cannot fall off or be improperly positioned during installation – assuring a weatherproof installation every time
- Available in one gang, self-closing cover, standard (3.25") and deep (4.75") depths
- Available in two gang, self-closing cover, standard (3.25") depth
- Meets and exceeds outdoor lighting requirements
- Lockable cover (with customer added locking device) adds security
- Available in both gray and white to meet customer preference
- Compatible with FS and FD boxes

Certifications and Compliances:

- UL and cUL Listed
- Meets NEMA 3R requirements

Standard Materials:

- Cover, back and hinges – polycarbonate
- Gasket – neoprene

Extra Duty While-in-use Covers

FOR ONE & TWO GANG BOXES

ONE & TWO GANG SELF-CLOSING UL & cULus LISTED

Features:

- Meets NEC® 2014 406.9 (B)(1) extra duty requirement for any application
- Rugged UV-resistant polycarbonate cover and back protects devices without cracking or breaking and is non-corrosive
- Self-closing padlockable cover
- One gang box includes three inserts for eight different configurations
- Two gang box includes three inserts for over 60 different configurations
- Box inserts accommodate decorator and GFCI devices, duplex receptacles and a variety of single receptacle sizes and toggle switches
- Single receptacle sizes include:
 - One gang: 1½", 1⅜", 1⅝", 1¾", 2⅛"
 - Two gang: 1½", 1⅜", 1⅝", 1¾"
- Cover cord opening fits #12 AWG or lighter cord
- Excellent for food and beverage wash down environments where NEMA 3R is sufficient
- Box cover includes pre-mounted gasket

Certifications and Compliances:

- cULus Listed to UL514D
- UL File No. E-102328
- NEMA 3R

Standard Materials:

- Clear cover, body and cover plates – polycarbonate
- Gasket – ethylene vinyl acetate (EVA)
- Hinge pin – stainless steel

Fixture Hangers

FLEXIBLE FIXTURE HANGERS

TPSFH and TPRFH Flexible Fixture Hangers are used in commercial or light industrial applications where HID high bay and low bay lighting fixtures are used. Specific applications include storage facilities, shipping warehouses, retail and DIY facilities.

Features:

- Suitable for use with 1/2" or 3/4" fixture conduit stems, these hangers allow the conduit stem of the fixture (luminaire) to swing in any direction; maximum swing angle is 26° from vertical max. slope angles 22 1/2°
- Available in two styles: one for attachment to round or octagonal steel boxes; the other for attachment to 4" square steel boxes
- Both styles are quickly and easily attached by two screws
- Hangers are drilled and tapped for use with 3/4" conduit stem as standard and come supplied with a 3/4" – 1/2" reducer for 1/2" conduit stem applications

Certifications and Compliances:

- UL1598
- CSA C22.2 No. 250
- Suitable for damp locations

Standard Materials and Finishes:

- Material – sheet steel
- Finish – zinc chromate for corrosion resistance

Cat. #	Description	Support Wt. (Lbs.)
TPRFH12	For use with 4" Round or Octagon Boxes	50
TPSFH12	For use with 4" Square Boxes	50

SWIV-L-DROP™ CANOPY HANGERS

The Swiv-L-Drop Canopy Hanger utilizes a patented spring design to provide vibration and shock protection for pendant mounted fixtures in both horizontal and vertical directions. Designed to fit 3" or 4" outlet boxes, the Swiv-L-Drop is for use with 1/2" fixture conduit stems. The smooth, white canopy provides an aesthetically-pleasing appearance and installs quickly and easily without the use of tools.

Certifications and Compliances:

- UL1598
- Suitable for dry locations

Standard Materials and Finishes:

- Material – sheet steel
- Finish – canopy, painted white

Cat. #	Description	Support Wt. (Lbs.)
S 1 1/2 PAINTED	For use with 3" or 4" Outlet Boxes for use with 1/2" Conduit Stems; Painted	50*
S 1 1/2 UNPAINTED	For use with 3" or 4" Outlet Boxes for use with 1/2" Conduit Stems; Unpainted	50*
S 1 3/8 PAINTED	For use with 3/8" Conduit Stems; Painted	50*
S 1 3/8 UNPAINTED	For use with 3/8" Conduit Stems; Unpainted	50*

*65 lbs. rated with a minimum 12 inch stem if fully supported by other than an outlet box.

SWAY ADAPTERS

The Sway Adapter installs quickly and easily to pendant mounted fixtures and compensates for shocks and motion due to movements, vibration, earthquakes or other sources by allowing for lateral movement up to 45 degrees. The Sway Adapter can be used independently or in conjunction with the Swiv-L-Drop hanger. The Sway Adapter is also finished in an aesthetically-pleasing white painted finish and is designed for use with 1/2" conduit stems and has 3/8" male threads.

Certifications and Compliances:

- UL1598
- Suitable for dry locations

Standard Materials and Finishes:

- Material – sheet steel
- Finish – sway adapter, painted white

Cat. #	Description
SA 1W	For use with 1/2" Conduit Stem (Male Thread is 3/8")

Vaporproof Lighting

Features:

- Durable die cast housing and guard for long product life
- Powder paint finish for corrosive environments
- Available in pendant, box and wall mounts
- Fixtures may be purchased complete or as components
- Fixtures constructed of die cast aluminum; screw-on guards are zinc die cast
- Heat-resistant clear globe available on 100 watt series
- Wire guard available

Certifications and Compliances:

- UL1598
- UL Listed File No. E-15625
- cUL Standard CSA C22.2 No 250.0
- Suitable for wet locations
- 100W max. incandescent series is UL approved for 27W max. SBCFL (equivalent to 100W incandescent)
- 200W max. incandescent series is UL approved for 42W max. SBCFL (equivalent to 200W incandescent)

Clear glass is standard; colors are available; plastic (polycarbonate) globes, which are virtually unbreakable, are available in colors and are used as an alternative to glass globe/guard combinations (not recommended to exceed 60 watts).

W-Series Junction Boxes

Application & Selection

Applications:

Junction boxes, designed for hazardous and non-hazardous locations, are used in a variety of industries to perform the following functions:

- As a pull box
- To provide enclosures for splices and taps
- As a mounting box for multi-device control stations
- For housing apparatus, instruments and other devices

Considerations for Selection:

- Environmental location – the physical location of the junction box will call for proper construction of the box to meet National Electrical Code requirements and will affect the material and finish needed to meet weather and corrosive conditions, if present.
- Number and size of conductors – combined with the function to be performed (i.e. splicing, pull box), determines the amount of space needed, and therefore, the required physical dimensions of the box.
- Conduit layout – determines the number, size and location of the conduit openings in the box. It will also determine the type of mounting required (i.e. flush or surface positioning of the box).
- Flexibility required – if changes in the electrical system are anticipated, the box chosen should be easily adaptable, either by construction or size to the future system.

Options and Accessories:

A wide variety of options and accessories for special application are available for the various junction box families. These can be selected once the type of junction box has been determined. These options are shown on the individual pages. Some of the options available include:

- Special covers
- Hinged covers
- Materials and finishes
- Equipment mounting plates
- Conduit or device openings
- *Corro-free*™ epoxy powder coat – information available upon request

Quick Selector Chart:

Junction Box	Environmental Capability/ Type Designation	Size Range† L, W, D Inside	Max. Conduit Opening Size	Mtg.	Cover Type	Cover Material
WAB	Raintight/Type 3, 4 Dusttight/Type 12	4 x 4 x 2 to 8 x 8 x 6	4	Surface	Unflanged	Steel
WJB	Raintight/Type 3 Watertight/Type 4	4 x 4 x 4 to 36 x 24 x 24	6	Surface	Flanged	Steel
WJBF	Raintight/Type 3 Watertight/Type 4	4 x 4 x 4 to 36 x 24 x 24	6	Flush	External Flanged Recessed Sidewalk	Steel (Checkered)

†Length and width are inside dimensions. Depth is inside dimension without cover.

Drilled & Tapped Conduit Openings or Slip Holes:

All W-Series Cast Iron Junction Boxes may be ordered with drilled and tapped conduit openings or slip holes – subject to minimum spacing limitations.

To order a box from the factory with conduit openings, consult factory.

WJBF Checkered Cover Sidewalk Junction Boxes

Heavy Duty

External Flanged for Flush Mounting

Applications:

WJBF Junction Boxes are primarily designed for surface mounting. These heavy duty boxes are installed in conduit systems to:

- Act as pull box for conductors
- Provide openings and space for making splices and taps in conductors
- Provide for branch conduit runs
- Provide access to conductors for maintenance and future system changes
- Enclose and protect electrical equipment

Features:

- Covers are suitable for vehicular traffic (H20 loading)
- Neoprene gasket cemented to cover
- Wide range of drilled and tapped conduit entrance sizes and locations permits extreme flexibility of use in conduit system
- Internal equipment mounting pads may be drilled and tapped for 1/4" - 20 mounting screws
- Blind tapped into internal mounting pads
- Mounting straps are standard on smaller sized boxes up to 8" x 8" x 6"; for larger sizes, consult factory

Certifications and Compliances:

- Weatherproof
- Watertight
- NEMA 3, 4, 5
- NEMA 250
- CECEt:
 - Class II, Division 1, Groups E, F, G
 - Class III
- Encl. 3, 4, 5
- H20 Vehicle Load Rating*

*Self-certify to H20 vehicle load rating equivalent to 16,000 lbs. on cover center.
tCUL certified for sizes up to 8" x 8" x 6".

Standard Materials:

- Body – iron alloy
- Cover and mounting straps – heavy gauge steel (checkered)
- Gaskets – neoprene
- Cover screws – stainless steel

Standard Finish:

- Iron alloy and heavy gauge steel – hot dip galvanized

WAB Junction Boxes

Heavy Duty Unflanged for Surface Mounting

Applications:

Where a heavy duty dustproof, weatherproof enclosure is desired, WAB Junction Boxes are installed in conduit systems to:

- Act as pull box for conductors
- Provide openings and space for making splices and taps in conductors
- Provide for branch conduit runs
- Provide access to conductors for maintenance and future system changes
- Enclose and protect electrical devices

Features:

- Flat neoprene cover gasket
- Wide range of drilled and tapped and slip hole conduit entrance sizes and locations permits extreme flexibility of use in conduit system
- Internal equipment mounting pads available blind tapped for 1/4" - 20 mounting screws
- Blind tapped into internal mounting pads
- Mounting straps are standard on smaller sized boxes up to 8" x 8" x 6"; for larger sizes, consult factory

W-Series Junction Boxes

Drilling & Tapping Information

DRILLED & TAPPED CONDUIT OPENINGS OR SLIP HOLES

All W-Series Cast Iron Junction Boxes may be ordered with drilled and tapped conduit openings or slip holes – subject to minimum spacing limitations listed in Table 1.

To order a box from the factory with conduit openings:

Option 1:

Send in a sketch of the box with openings specified (subject to spacing limitations specified in Table 1) **OR**

Option 2:

Step 1: Select one of the four standard arrangements in Table 2, based on number and location of conduit entries.

Step 2: Pick a symbol from Table 3 for each opening in the arrangement (see example).

Step 3: Table 4 lists the maximum size and number of conduit openings by box size and the spacing dimensions. Use Table 4 to verify the openings selected are permitted.

Example – Catalog Number Logic:

- Select box required: WJB121208.
- User wants one 1/2" drilled and tapped hole in the top of the box, two 1" drilled and tapped holes on both sides and three 1/2" slip holes in the bottom of the box.
- Select arrangement 3 because it allows up to three openings per side.
- Next, the symbols for the openings are substituted and written in clockwise order starting with location "a". The catalog number is written in three parts: part 1 – box number, part 2 – arrangement number, part 3 – symbols for the conduit openings.
- For this example, the box would be ordered as:

WJB121208-3-0A0 C0C 1A1A1A C0C

HomeRunner™ Box

Commercial Construction Screw Cover Junction Box with Patented Clamps

Applications:

HomeRunner™ Junction Boxes are designed specifically for commercial construction applications to provide a spacious, flexible junction box for terminating home runs and other electrical wiring. Its patented clamping design and flexibility make it the most convenient, labor savings junction box available.

Features:

- Designed and approved for use with AC, MC, MCI-A, NM or EMT
- Patented clamping feature eliminates the need for field punching/drilling of knockouts and installation of connectors
- Standard surface or flush cover options – eliminates the need for custom covers
- Multiple mounting holes and knockouts for installation flexibility
- Optional stud bracket for direct mounting to steel or wood studs
- Kick stand far side support available with HR080803
- Available in two sizes to match customer requirements and preferences
- Third party certified for U.S. and Canada

Call-out Features:

1. Patented clamping system – provides maximum flexibility and maximum grip; third party certified for use with AC, MC, MCI-A or non-metallic sheathed cable
2. Welded steel construction – provides strong, dependable service and large cubic capacity for ease of wiring
3. Combination eccentric knockouts – on sides for quick and easy access, combination KOs in the back of the box are ideal for applications where joist spacing is too tight for side entry
4. Terminal cup washer and flanged nut – quick, easy service ground termination or attachment of grounding bus bar
5. Two cover options – square for surface mounted applications or oversized for flush mount applications
6. Extensive mounting flexibility – pre-drilled holes in side and back for direct mounting or for mounting bracket (purchased separately)
7. Far side support – screws on quickly and easily and is perforated which allows for adjustment in dual thickness, fire rated walls; shipped standard with 8" x 8" x 3" models

Certifications and Compliances:

- For U.S. and Canada: CSA File No. 248782
- Certified to UL50 and UL514B, and CSA C22.2 No. 18.3-04 & No. 40-M1989

Standard Materials:

- Enclosure and cover – pre-galvanized steel
- Hardware – zinc plated steel

HomeRunner™

Fiberglass Enclosures

Reliability you can count on for the most corrosive applications.

Partnering with Eaton's Crouse-Hinds Division and our dedicated team of industry experts can help you succeed. Since 1897, we have led the development of safer, more reliable ways to power the most challenging harsh and hazardous areas. We have been established as a leader in enclosures for hazardous, industrial and commercial applications. Enclosures are engineered and manufactured to perform through the most corrosive conditions needed by OEMs, MRO, wastewater treatment facilities and chemical plants. These exceptionally durable, corrosion-resistant enclosures can withstand extreme abuse and exposure to chemicals, water and extreme conditions.

Enclosure knowledge and experience with:

- Products that deliver superior performance
- Low maintenance choices, like durable non-metallic enclosures with features designed to provide optimum protection in the harshest environments
- Dedicated and expert sales support to help select products that perform reliably and cost-effectively

A commitment to safety and productivity:

Eaton's Crouse-Hinds Division is helping more industrial facility owners, operators and engineers succeed each day – safely and cost-effectively. It's part of our commitment to focus on industries where our experience, expertise and products can make the biggest impact.

	Eaton's Crouse-Hinds Division has a full line of Krydon® material enclosures. These solid, one-piece construction enclosures are made of a proprietary formulation of fiberglass-reinforced polyester that has high impact strength, is fire retardant, heat-resistant and withstands weathering. Krydon enclosures are:			
	<ul style="list-style-type: none"> Strong and durable while providing longer service life for equipment Class I, Division 2, Groups B, C, D rating on many Krydon products Available in an expansive range of product groups Available in hundreds of sizes and options 			

Fiberglass Enclosures

Small Line Series

The Small Line Series offers a lightweight, compact, versatile solution for applications requiring tight or confined spaces. The Small Line Series houses everything from terminal blocks to small positional control. Available in a choice of two body styles, these enclosures are made of fiberglass-reinforced polyester and have a memory retaining polyurethane gasket and stainless steel screws for exceptional corrosion and chemical resistance. The Small Line Series will hold up under the most extreme conditions and provide protection in adverse environments such as water, steam, vapor or chemicals.

Features:

- Lift-off cover design with four cover screws
- Memory retaining continuous polyurethane gasket
- Captive stainless steel cover screws
- Chemical-resistant fiberglass-reinforced polyester
- Submersible, non-corrosive design
- Watertight, dusttight
- Non-conductive, impact-resistant, UV-resistant
- Material cuts, drills, punches and saws with ease and accuracy
- Rounded edges, minimal protrusions or exposed pocket areas for assembly of dust and debris
- Smooth surface, no color variations, swirls or color pockets, no voids

Certifications and Compliances:

- UL/cUL 50, Types 1, 3R, 4X, 6P, 12
- UL File No. E-57656
- CSA Std. C22.2 - File 244248 Types 1, 3R, 4X, 6P, 12
- NEMA Standard 250 - Types 1, 3R, 4X, 6P, 12
- Temperature range: -76°F to +250°F (-60°C to +120°C)
- Flammability rating: UL94-5V
- Non-flame propagating

Standard Materials and Finishes:

- Hot compression molded fiberglass-reinforced thermoset polyester
- Poured polyurethane seamless gasket provides watertight, dusttight environmental seal
- Captive stainless steel screws
- 304 stainless steel used on all external hardware

Fiberglass Enclosures Pushbutton Series

The Pushbutton Series offers a solution for applications requiring an enclosure with multiple pre-drilled openings for pushbuttons available in 30mm and 22mm configurations. The notched keyhole design, and the ability to order up to 25 holes, makes this versatile series a perfect match for your general purpose electrical and control station applications. Available in a choice of two body designs, these enclosures are made of fiberglass-reinforced polyester and have a memory retaining polyurethane gasket and stainless steel screws for exceptional corrosion and chemical resistance. The Pushbutton Series will hold up under the most extreme conditions and provide protection in adverse conditions such as water, steam, vapor or chemicals.

Features:

- Lift-off cover design with four cover screws
- Memory retaining continuous polyurethane gasket
- Captive stainless steel cover screws
- Full metal grounding strap
- Notched keyhole design
- Chemical-resistant fiberglass-reinforced polyester
- Submersible, non-corrosive design
- Watertight, dusttight
- Non-conductive, impact-resistant, UV-resistant
- Material cuts, drills, punches and saws with ease and accuracy
- Rounded edges, minimal protrusions or exposed pocket areas for assembly of dust and debris
- Smooth surface, no color variations, swirls or color pockets, no voids

Certifications and Compliances:

- UL/cUL 50, Types 1, 3, 4X, 6P, 12
- UL File No. E-57656
- CSA Std. C22.2 - File 244248 Types 1, 3, 4X, 6P, 12
- NEMA Standard 250 - Types 1, 3, 4X, 6P, 12
- Temperature range: -76°F to +250°F (-60°C to +120°C)
- Flammability rating: UL94-5V
- Non-flame propagating

Standard Materials and Finishes:

- Hot compression molded fiberglass-reinforced thermoset polyester
- Poured polyurethane seamless gasket provides watertight, dusttight environmental seal
- Captive stainless steel screws
- 304 stainless steel used on all external hardware
- Stainless steel beaded cover retention chain on the FPBM series

Fiberglass Enclosures Junction Box Series

The Junction Box Series offers an extensive selection to the industrial application requiring a vast number of configurations and sizes. The Junction Box Series is available in 12 different sizes, each offering a multitude of durable cover options with features such as stainless steel hinges, padlock covers and windows. These enclosures are made of fiberglass-reinforced polyester and have a poured polyurethane seamless gasket that provides a watertight and dusttight environmental seal for exceptional corrosion and chemical resistance. The durable Junction Box Series will hold up under the most extreme applications and provide protection and reliability in the most adverse conditions.

Features:

- Memory retaining continuous polyurethane gasket
- Captive stainless steel cover screws
- Chemical-resistant fiberglass-reinforced polyester
- Submersible, non-corrosive design
- Watertight, dusttight
- Non-conductive, impact-resistant, UV-resistant
- Material cuts, drills, punches and saws with ease and accuracy
- Rounded edges, minimal protrusions or exposed pocket areas for assembly of dust and debris
- Smooth surface, no color variations, swirls or color pockets, no voids
- Stainless steel retention chain on screw cover series
- Full length stainless steel hinges on the hinge cover series

Certifications and Compliances:

- UL/cUL 50, Types 1, 3, 4X, 6P, 12
- UL File No. E-57656
- CSA Std. C22.2 - File 244248 Types 1, 3, 4X, 6P, 12
- NEMA Standard 250 - Types 1, 3, 4X, 6P, 12
- Temperature range: -76°F to +250°F (-60°C to +120°C)
- Flammability rating: UL94-5V
- Window flammability: UL94V-0
- Non-flame propagating

Standard Materials and Finishes:

- Hot compression molded fiberglass-reinforced thermoset polyester
- Poured polyurethane seamless gasket provides watertight, dusttight environmental seal
- Captive stainless steel screws
- 304 stainless steel used on all external hardware
- Molded in mounting flange
- Panel mounting capability for fixed rear panel
- Bosses utilize threaded brass inserts accepting 10-32 screws

Fiberglass Enclosures Raised Cover Series

The Raised Cover Series offers a solution for applications requiring an enclosure with a “raised” or “deeper” cover. The deeper cover is suitable for panel mounting and for use as an operator interface in industrial equipment control stations when required. The deeper cover allows every cubic inch of valuable internal enclosure space to be used. These enclosures are made of fiberglass-reinforced polyester and have a poured polyurethane seamless gasket that provides a watertight and dusttight environmental seal for exceptional corrosion and chemical resistance. The Raised Cover Series will hold up under the most extreme applications and provide protection and reliability in high end electronics applications, harsh corrosive environments and industrial applications, both indoors and out.

Features:

- Memory retaining continuous polyurethane gasket
- Molded in mounting flange
- Captive stainless steel cover screws
- Chemical-resistant fiberglass-reinforced polyester
- Submersible, non-corrosive design
- Watertight, dusttight
- Non-conductive, impact-resistant, UV-resistant
- Material cuts, drills, punches and saws with ease and accuracy
- Rounded edges, minimal protrusions or exposed pocket areas for assembly of dust and debris
- Smooth surface, no color variations, swirls or color pockets, no voids

Certifications and Compliances:

- UL/cUL 50, Types 1, 3, 4X, 6P, 12
- UL File No. E-57656
- CSA Std. C22.2 - File 244248 Types 1, 3, 4X, 6P, 12
- NEMA Standard 250 - Types 1, 3, 4X, 6P, 12
- Temperature range: -76°F to +250°F (-60°C to +120°C)
- Flammability rating: UL94-5V
- Non-flame propagating

Standard Materials and Finishes:

- Hot compression molded fiberglass-reinforced thermoset polyester
- Poured polyurethane seamless gasket provides watertight, dusttight environmental seal
- Captive stainless steel screws
- 304 stainless steel used on all external hardware
- Molded in mounting flange
- Panel mounting capability for fixed rear panel
- Bosses utilize threaded brass inserts accepting 10-32 screws

Fiberglass Enclosures

Xtra Deep Series

The Xtra Deep Series offers a solution for applications requiring an extra deep enclosure. The deep, durable enclosure has nearly equal capacity in both the cover and the base, giving you ample room for your cover or mounting plate components. The fiberglass-reinforced polyester enclosure with flange mount base, stainless steel hardware and poured polyurethane seamless gasket provides exceptional corrosion and chemical resistance in a watertight and dusttight environmental seal. The Xtra Deep Series will hold up under the most extreme applications and provide protection and reliability in high end electronics applications, harsh corrosive environments and industrial applications, both indoors and out.

Features:

- Memory retaining continuous polyurethane gasket
- Integral mounting flange
- Molded in panel mounting inserts
- Chemical-resistant fiberglass-reinforced polyester
- Non-corrosive design
- Full length stainless steel hinge
- Watertight, dusttight
- Non-conductive, impact-resistant, UV-resistant
- Material cuts, drills, punches and saws with ease and accuracy
- Rounded edges, minimal protrusions or exposed pocket areas for assembly of dust and debris
- Smooth surface, no color variations, swirls or color pockets, no voids

Certifications and Compliances:

- UL/cUL 50, Types 1, 3, 4X, 12
- UL File No. E-57656
- CSA Std. C22.2 - File 244248 Types 1, 3, 4X, 12
- NEMA Standard 250 - Types 1, 3, 4X, 12
- Temperature range: -76°F to +250°F (-60°C to +120°C)
- Flammability rating: UL94-5V
- Non-flame propagating

Standard Materials and Finishes:

- Hot compression molded fiberglass-reinforced thermoset polyester
- Poured polyurethane seamless gasket provides watertight, dusttight environmental seal
- 304 stainless steel used on all external hardware
- Molded in mounting flange
- Panel mounting capability for fixed rear panel
- Bosses utilize threaded brass inserts accepting 10-32 screws

Fiberglass Enclosures Advantage Series

The Advantage Series is our most extensive selection of durable industrial non-metallic boxes. Available in a wide range of options, the Advantage Series is available in over 36 various configurations with options such as stainless steel hinges or stainless steel pull latches each with or without clear covers. These enclosures are made of fiberglass-reinforced polyester and have a poured polyurethane seamless gasket that provides a watertight and dusttight environmental seal for exceptional corrosion and chemical resistance. The resilient Advantage Series will provide high impact resistance in the most extreme conditions and provide protection and reliability in the most adverse applications.

Features:

- Memory retaining continuous polyurethane gasket
- No penetrating hardware
- Chemical-resistant fiberglass-reinforced polyester
- Non-corrosive design
- Watertight, dusttight
- Non-conductive, impact-resistant, UV-resistant
- Material cuts, drills, punches and saws with ease and accuracy
- Rounded edges, minimal protrusions or exposed pocket areas for assembly of dust and debris
- Smooth surface, no color variations, swirls or color pockets, no voids

Standard Materials and Finishes:

- Hot compression molded fiberglass-reinforced thermoset polyester
- Poured polyurethane seamless gasket provides watertight, dusttight environmental seal
- 304 stainless steel used on all external hardware
- Panel mounting capability for fixed rear panel
- Bosses utilize threaded brass inserts accepting 10-32 screws

Certifications and Compliances:

Fiberglass Enclosures

Wall Mount & Large Fiberglass Enclosure Series

The Wall Mount and Large Fiberglass Enclosure Series offers a solution for applications requiring a large enclosure especially suited for indoor or outdoor use and to provide protection against falling dirt, rain, sleet, snow and windblown dust. The fiberglass-reinforced polyester Wall Mount Series is available in NEMA 3R and 4X configurations and the poured polyurethane seamless gasket provides a watertight and dusttight environmental seal for exceptional corrosion and chemical resistance.

Features:

- Memory retaining continuous polyurethane gasket
- Lightweight
- Integral mounting feet
- Molded in panel mounting inserts
- Stainless steel full length continuous hinge
- Built-in padlock hasp
- Chemical-resistant fiberglass-reinforced polyester
- Watertight, dusttight
- Non-conductive, impact-resistant, UV-resistant
- Rain shield protection against incidental water ingress for NEMA 3R enclosures
- Material cuts, drills, punches and saws with ease and accuracy
- Rounded edges, minimal protrusions or exposed pocket areas for assembly of dust and debris
- Smooth surface, no color variations, swirls or color pockets, no voids

Certifications and Compliances:

3R Series

- UL/cUL 50, Types 1, 3R
- UL File No. E-57656
- CSA Std. C22.2 - File 244248 Types 1, 3R
- NEMA Standard 250 - Types 1, 3R
- Temperature range: -76°F to +250°F (-60°C to +120°C)
- Flammability rating: UL94-5V
- Non-flame propagating

4X Series

- UL/cUL 50, Types 1, 3, 3R, 4X, 12
- UL File No. E-57656
- CSA Std. C22.2 - File 244248 Types 1, 3, 3R, 4X, 12
- NEMA Standard 250 - Types 1, 3, 3R, 4X, 12
- Temperature range: -76°F to +250°F (-60°C to +120°C)
- Flammability rating: UL94-5V
- Non-flame propagating

Large Fiberglass

- UL/cUL 50, Types 1, 3, 3R, 4X, 12
- UL File No. E-57656
- CSA Std. C22.2 - File 244248 Types 1, 3, 3R, 4X, 12
- NEMA Standard 250 - Types 1, 3, 3R, 4X, 12
- IP55, IP66
- Temperature range: -76°F to +250°F (-60°C to +120°C)
- Flammability rating: UL94-5V
- Non-flame propagating

Standard Materials and Finishes:

- Hot compression molded fiberglass-reinforced polyester hand lay-up FRP
- Poured polyurethane seamless gasket provides watertight, dusttight environmental seal
- 304 stainless steel used on all external hardware
- Bosses utilize threaded brass inserts accepting 10-32 screws

Fiberglass Enclosures Disconnect & Circuit Breaker Series

The Disconnect and Circuit Breaker Series is used in larger industrial control systems and machine tool control panels where a disconnect is desirable in extreme environmental conditions. This durable NEMA 4X rated enclosure provides protection from falling dirt, rain, sleet, snow, windblown dust, splashing water and hose-directed water, and will be undamaged by the external formation of ice on the enclosure. The poured polyurethane seamless gasket and fiberglass-reinforced polyester enclosure provides exceptional corrosion and chemical resistance in adverse conditions.

Features:

- Integral mounting feet
- Stainless steel full length continuous hinge
- Padlockable in off position
- Lightweight
- Memory retaining continuous polyurethane gasket
- Molded in panel mounting inserts
- Chemical-resistant fiberglass-reinforced polyester
- Non-corrosive design
- Environmentally sealed Type 4X disconnect handle
- Watertight, dusttight
- Non-conductive, impact-resistant, UV-resistant
- Material cuts, drills, punches and saws with ease and accuracy
- Rounded edges, minimal protrusions or exposed pocket areas for assembly of dust and debris
- Smooth surface, no color variations, swirls or color pockets, no voids

Certifications and Compliances:

- UL/cUL 50, Types 1, 3, 3R, 4X, 12
- UL File No. E-57656
- CSA Std. C22.2 - File 244248 Types 1, 3, 3R, 4X, 12
- NEMA Standard 250 - Types 1, 3, 3R, 4X, 12
- Temperature range: -76°F to +250°F (-60°C to +120°C)
- Flammability rating: UL94-5V
- Non-flame propagating

Standard Materials and Finishes:

- Hot compression molded fiberglass-reinforced thermoset polyester
- Poured polyurethane seamless gasket
- 304 stainless steel used on all external hardware
- Panel mounting capability for fixed rear panel
- Bosses utilize threaded brass inserts

Fiberglass Enclosures

Custom-built Solutions for Fast Delivery

CUSTOM MODIFICATION OFFERING

Please consult the factory for a quotation on the following custom modifications that we are pleased to offer to help meet the needs of our customers:

- Custom molded colors
- Gasketed windows for the FJ, FRC and Wall Mount Series
- Custom sizes
- Special hole patterns for drilling and tapping configurations
- Dead front and sub panels
- Silk screening capabilities
- Terminal kits and DIN rails available

CUSTOM-BUILT LIGHTING & POWER PANELBOARDS:

Motor control, power distribution products and custom control panels designed and built to our customers' unique needs and delivered when they are required.

Overview:

Fiberglass panelboards rated for outdoor NEMA 3R and 4X environments.

Ratings:

120/208V 3 Phase, 4 Wire

QOB® circuit breakers, single or two-pole 120/240 VAC; three-pole 240 VAC

Trip ratings:

- 10 to 70 amps, single-pole
- 10 to 125 amps, two-pole
- 10 to 100 amps, three-pole

480Y/277V 3 Phase, 4 Wire

EDB® circuit breakers, single or two-pole 277 VAC; three-pole 480Y/277 VAC

Trip ratings:

- 15 to 70 amps, single-pole
- 15 to 125 amps, two-pole
- 15 to 125 amps, three-pole

Certifications and Compliances:

- NEMA 1, 3, 3R, 4X, 12
- UL Standard: 67
- CSA Standard: C22.2

Gasketed Window
FJ, FRC & Wall Mount Series

Fiberglass Enclosures

Custom-built Solutions for Fast Delivery

CUSTOM-BUILT HEAVY DUTY DISCONNECTS (CIRCUIT BREAKER, FUSIBLE & NON-FUSIBLE)

Applications:

- Fiberglass Heavy Duty Disconnects are for use in disconnecting motor, lighting and other circuits

Certifications and Compliances:

- NEMA/EEMAC: 1, 3, 3R, 4X, 12
- UL Standard: 508
- CSA Standard: C22.2

Electrical Ratings Ranges:

- Three-pole, 60 Hz, 600 VAC
- Starters – NEMA sizes 0, 1, 2
- Breakers – 15-800 amp rating
- Switches – 30, 60, 100, 200 amp

CUSTOM-BUILT CONTROL STATIONS

Overview:

The Pushbutton Series offers an enclosure solution where multiple pre-drilled openings for 30mm pushbuttons are required. Enclosures are available in sizes ranging from 6" x 3" to 13.5" x 11.5" with notched keyhole design and the ability to order up to 25 holes, making this solution a perfect choice for your control station applications.

Certifications and Compliances:

- UL/cUL 50, Types 1, 3, 4X, 6P, 12
- UL Standard: 508
- CSA Std. C22.2 - File 244248 Types 1, 3, 4X, 6P, 12
- NEMA Standard 250 - Types 1, 3, 4X, 6P, 12

Electrical Ratings Ranges:

- Pushbutton stations and selector switches – heavy duty 600 VAC maximum
- Pilot lights, selector switches, pushbuttons – 120-600 VAC; 24 VAC/VDC

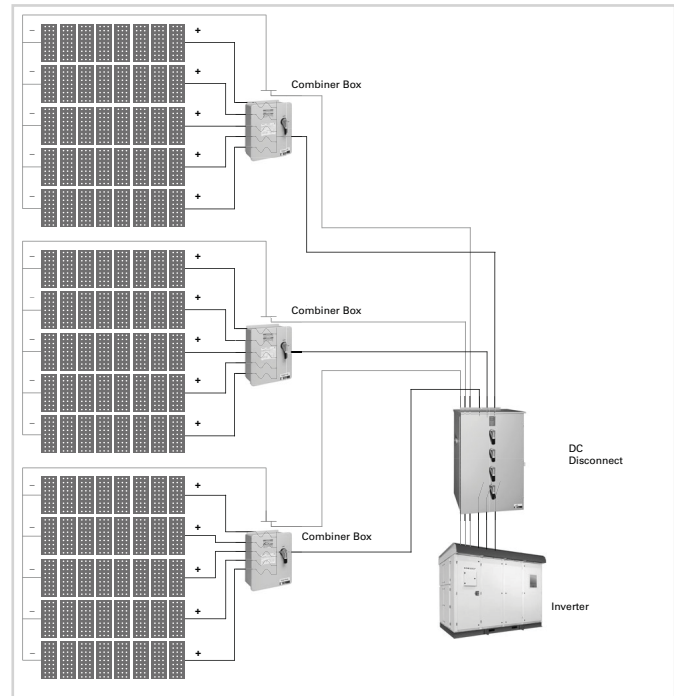

Solar Combiner Solutions

Grid-tied Solar System Information

A grid-tied solar array may be a few panels or many in series, and may range from a few 12 volt panels to high voltage multi-panel arrays for grid-tied systems. Grid-tied systems can go as high as 1000 VDC, while off-grid battery systems are typically 12, 24 or 48V.

Higher voltage systems (over 48V) have different NEC code requirements than those for low voltage battery systems, and the two types are NOT interchangeable.

Eaton's Crouse-Hinds Series Solar Combiner Boxes are designed for higher voltage circuits used in grid-tied applications. All meet NEC requirements, are made in accordance with UL1741 standards and are protected by Eaton's Bussmann® Series DC Fuses specifically designed for the protection and isolation of photovoltaic strings.

Typical Solar Grid-tied System Diagram

Eaton's Crouse-Hinds Series Solar Protection for Fiberglass Enclosures

Eaton's Crouse-Hinds Series standard NEMA 4X Solar Combiner Boxes are shipped with fiberglass enclosures. These enclosures contain a solar protection formula that gives the enclosure strength and durability to provide long, dependable service even in the most demanding environmental conditions. They retain gloss and color even when exposed to harsh UV light and offer superior resistance to chemicals and are fire retardant.

A special UV absorber is added into this solar protection formula and works to absorb UV energy and release it without damaging the fiberglass enclosure, thus providing increased protection of the polyester material and increased resistance to the damaging effects of UV radiation. For additional information on Eaton's Crouse-Hinds Series solar protection, choose fiberglass enclosures from: <http://www.crouse-hinds.com>.

How to Size a Solar Combiner*:

1. Current Inputs:

a. Eaton provides a "Max. Short Circuit Current Rating per String" (Isc) for use as a direct comparison between the published Isc of the PV module. De-rating requirements per Article 690 of the NEC are applied and should be used to make a direct comparison with the PV module Isc ratings (i.e. CCBF12 has an Isc rating of 9.6A. PV modules with Isc ratings at or below 9.6A would be acceptable). For additional information, consult the electrical ratings table found in the technical section of this brochure.

2. Ratings:

a. Voltage: (600 VDC/1000 VDC systems) – Eaton provides the total system voltage ratings to be used in comparison with the sum of the maximum number of modules in series per string. Consult NEC, ANSI and local codes when designing a system.

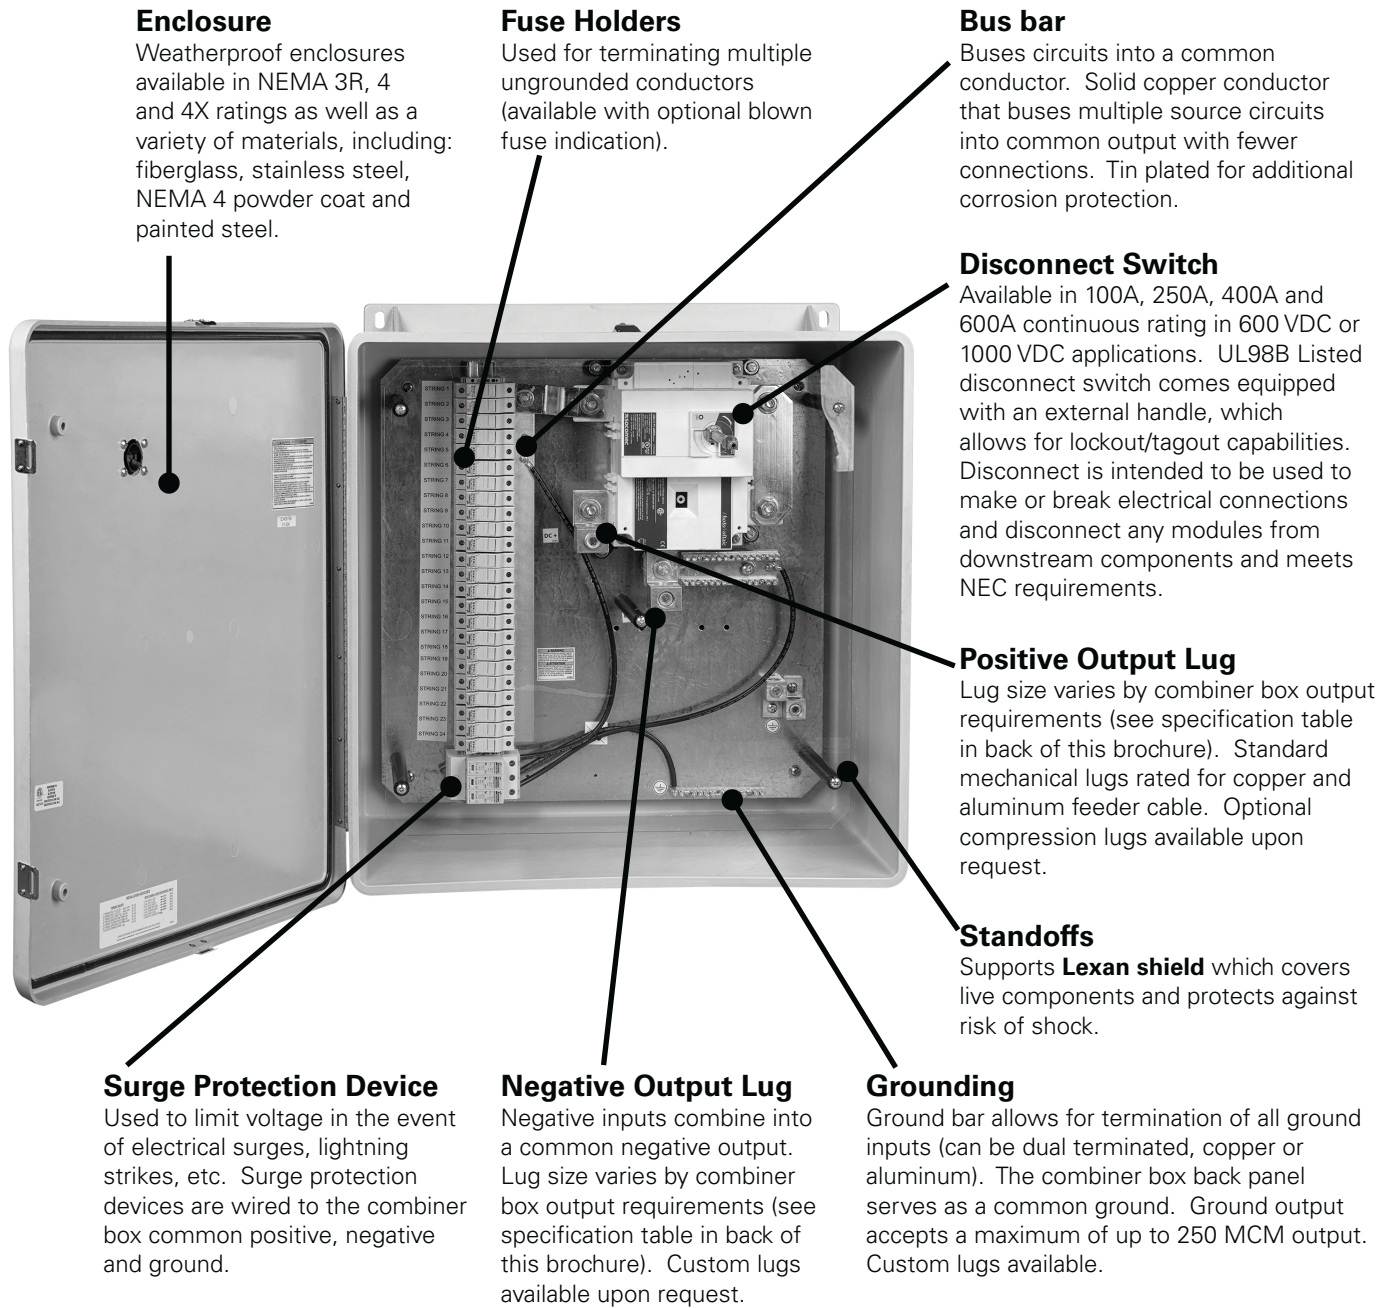

b. Current: Customer provided max. array current per string multiplied by number of combiner input circuits must be less than or equal to the max. current found in the electrical ratings table at the end of this section.

3. Hardware Sizing:

a. Integral Disconnect Switch Sizing: To determine the rating of the integral disconnect, simply multiply the number of input circuits by the max. current per string (as indicated above), and then round to the next (higher) disconnect size. In NO case can the maximum current exceed the amperage rating. Disconnect switches are rated for 100% continuous duty. Example: A 12-string combiner box with solar modules rated to 9.6A has a maximum current of 12A; 12A per string x 12 strings = 144A, which results in a 250A disconnect switch.

*The information above is provided for reference and information only. All statements, technical information and recommendations contained herein are based on information and tests we believe to be reliable. The accuracy or completeness thereof are not guaranteed. In accordance with Eaton's Terms and Conditions of Sale, and since conditions of use are outside our control, the purchaser should determine the suitability of the product for his/her intended use and assumes all risk and liability whatsoever in connection therewith.

Combiner Box Components & Features

Enclosure

Weatherproof enclosures available in NEMA 3R, 4 and 4X ratings as well as a variety of materials, including: fiberglass, stainless steel, NEMA 4 powder coat and painted steel.

Fuse Holders

Used for terminating multiple ungrounded conductors (available with optional blown fuse indication).

Bus bar

Buses circuits into a common conductor. Solid copper conductor that buses multiple source circuits into common output with fewer connections. Tin plated for additional corrosion protection.

Disconnect Switch

Available in 100A, 250A, 400A and 600A continuous rating in 600 VDC or 1000 VDC applications. UL98B Listed disconnect switch comes equipped with an external handle, which allows for lockout/tagout capabilities. Disconnect is intended to be used to make or break electrical connections and disconnect any modules from downstream components and meets NEC requirements.

Positive Output Lug

Lug size varies by combiner box output requirements (see specification table in back of this brochure). Standard mechanical lugs rated for copper and aluminum feeder cable. Optional compression lugs available upon request.

Standoffs

Supports **Lexan shield** which covers live components and protects against risk of shock.

Surge Protection Device

Used to limit voltage in the event of electrical surges, lightning strikes, etc. Surge protection devices are wired to the combiner box common positive, negative and ground.

Negative Output Lug

Negative inputs combine into a common negative output. Lug size varies by combiner box output requirements (see specification table in back of this brochure). Custom lugs available upon request.

Grounding

Ground bar allows for termination of all ground inputs (can be dual terminated, copper or aluminum). The combiner box back panel serves as a common ground. Ground output accepts a maximum of up to 250 MCM output. Custom lugs available.

Options:

Integral Connectors, Whips & Harnesses

Available as a pre-wired option for fast install and labor savings.

Current Monitoring

Can be added as an option. Incoming, ungrounded conductors (1 or 2) are fed through a single current transducer. Module configurations allow up to 12 string inputs. **NOTE:** Integration of this device typically increases enclosure size requirements.

See product pages for additional available options.

Current Monitoring

Custom Whips

Solar Combiner Boxes

Applications:

- Built to minimize system costs by providing maximum flexibility
- Available with 1-48 input circuits* and help save material costs, installation time and labor when joining the combiner box and disconnect within one enclosure (eliminating the need for a disconnect switch in a separate enclosure)

Features:

- Rated for 600 VDC, 1000 VDC or 1500 VDC† – continuous duty
- Optional integral disconnects available in 100A, 250A, 350A, 400A and 600A
- Touch-safe fuse holders
- Lexan shield covers all live components
- 90°C output terminals
- Configured for positive and negative grounded arrays**

Certifications and Compliances:

- cETLus 1741 Listed
- cETLus Listed to CSA Standards C22.2 No. 31 & No. 107.1
- NEMA 4X (fiberglass and stainless steel)
- NEMA 4 (powder coated steel)
- NEMA 3R (painted steel, for vertical mounting positions only)

Standard Materials and Finishes:

- NEMA 4X fiberglass (non-conductive, impact-resistant, UV-resistant, flame retardant) – natural
- NEMA 4X stainless steel – natural
- NEMA 4 steel – powder coated
- NEMA 3R steel (for vertical mounting applications only) – painted

Options:

- Fuses (shipped uninstalled)
- Surge protection
- Solar cable whips (pre-assembled and installed)
- Compression output lugs
- Factory installed breather vent or drain
- Bipolar construction (to 1000 VDC combined voltage)
- Smart combiners available (DC string monitoring)
- Factory drilled entrance holes
- Factory installed conduit fittings/cable glands
- Dual output lugs
- Lockable enclosures
- Integral power supply
- Terminal blocks
- Factory installed strut
- Custom options available – consult factory

Integral Disconnect Rating:

To determine the rating of the integral disconnect, simply multiply the number of input circuits by the max. current per string, and then round to the next (higher) disconnect size. In NO case can the maximum current exceed the amperage rating. Disconnect switches are rated for 100% continuous duty. Example: A 12-string combiner box with solar modules rated to 9.6A has a maximum current of 12A; 12A per string x 12 strings = 144A, which results in a 250A disconnect switch.

Catalog Number Matrix:

	DV = Drain vertical							
	DH = Drain horizontal							
	BLANK = No vent or drain							
	Orientation refers to position of the combiner, not the breather or drain							
Voltage								
	1000V = 1000V							
	BLANK = 600V							

*Combiners with 37-48 input circuits are not third party certified, but are constructed to UL1741 standards.
 **Negative fused configurations available for positive grounded arrays. Replace 'F15' with 'NF15' in the catalog number.
 †Consult factory for 1500 VDC version.

High Amperage Solar Combiner Boxes

Applications:

- Designed and built to minimize costs in grid-tied PV system applications designed with T-junction cable harness wiring
- T-connection harnesses allow for the combination of two strings in parallel prior to entry and termination in the combiner box
- The use of T-connection harnesses in conjunction with high amperage solar combiner boxes reduces cable, labor and overall installed PV system costs
- Boxes are available in models with up to 24 input circuits and a 30A max. fuse size, with durable (NEMA 4X, 4 and 3R) enclosures and flexible custom options to suit customer applications
- Robust design is engineered for greater heat dissipation and manufactured to perform in the harshest of environmental conditions

Features:

- Isc rating 19.2A at 50°C
- Rated for 600 VDC, 1000 VDC or 1500 VDC† – continuous duty
- Integral disconnects available in 100A, 250A, 325A, 400A and 600A
- Touch-safe spring pressure (screwless) fuse holders
- Reduce wire installation time by up to 75%
- Greatly reduce potential loosening from vibration
- Resist temperature cycling and corrosion
- Lexan shield covers all live components
- 90°C output terminals
- Configured for positive and negative grounded arrays*
- Heat dissipation bus bar design
- Spacers installed between fuse holders for improved heat dissipation

Certifications and Compliances:

- cETLus 1741 Listed
- cETLus Listed to CSA Standards C22.2 No. 31 & No. 107.1
- NEMA 4X (fiberglass and stainless steel)
- NEMA 4 (powder coated steel)
- NEMA 3R (painted steel, for vertical mounting applications only)

Integral Disconnect Rating:

To determine the required rating of integral disconnect, simply multiply the number of input circuits by the panel max. short circuit current, and then multiply that figure by 125%. Round the result to the next (higher) disconnect size. Disconnect switches are rated for 100% continuous duty. In NO case can the maximum output current exceed the disconnect amperage rating. Example: In a T-junction application where two strings are combined prior to entry into the combiner box, a 16-string combiner box with max. short circuit current of 19.2A per string: $(2 \times 9.6A) \times 16 \text{ strings} \times 1.25 = 384A$, which equates to a 400A disconnect switch. See technical information for combiner box maximum Isc, current and fuse size calculations.

Standard Materials and Finishes:

- NEMA 4X fiberglass (non-conductive, impact-resistant, UV-resistant, flame retardant) – natural
- NEMA 4X stainless steel – natural
- NEMA 4 steel – powder coated
- NEMA 3R steel (for vertical mounting applications only) – painted

Options:

- Fuses (shipped uninstalled)
- Surge protection
- Solar cable whips (pre-assembled and installed)
- Compression output lugs
- Factory installed breather vent
- Factory installed drain
- Factory drilled entrance holes
- Factory installed conduit fittings/cable glands
- Custom lugs available upon request
- Lockable enclosures
- Factory installed post-mount strut
- Custom options available – consult factory

Solar Combiner Whips

Applications:

- Solar Cable Whips are engineered, tested, third party certified and assembled with Crouse-Hinds Series Solar Combiner Boxes for use in utility and commercial PV systems to save on-site labor and lower installed costs

Features:

- Rated for use with 600 VDC or 1000 VDC combiner boxes (whips rated to meet or exceed combiner box voltage rating)
- Pre-configured by string count with selected solar combiner boxes
- 1' to 6' standard lengths (outside of combiner box)
- #10 AWG cable size standard on all configurations
- Includes positive and negative solar cord grips, cable and connectors
- Whips are labeled inside and outside combiner box with string number and polarity
- Whips are available in black, white, yellow and red for polarity designation
- 100% continuity tested to ensure dependable service
- IP67 or IP68 waterproof rated dependent on connector type
- Fully tested for continuity and hi-pot for dependable field performance
- Designed for exposed or concealed wet or dry locations
- UV-resistant
- Temperature range: -40°C to +90°C
- Custom configurations and ID labeling available; consult factory
- Whips are coiled, banded and protected during shipment

Certifications and Compliances:

- Combiner boxes with factory installed whips are cETLus Listed to UL1741
- Combiner boxes with factory installed whips are cETLus Listed to CSA Standards C22.2 No. 31 & No. 107.1
- Connectors UL certified to UL6703, TUV certified, IP67 or IP68 rated
- Cable UL certified to UL4703/UL854
- Flammability meets UL94 requirements

*Helios is a trademark of Amphenol.

Standard Material and Finish:

- Cable – cross linked polyethylene wire (XLPE)

Catalog Number Matrix:

Compact (SL Series) Solar Combiners

Applications:

- The ideal compact solution for commercial and residential rooftop installations with tight space and NEMA 4X requirements, offering maximum performance in a smaller physical footprint

Features:

- Available in either four or six input circuit models to match the most common customer requirements for a compact combiner
- Continuous duty rated at 600 VDC
- NEMA 4X fiberglass 08 x 08 x 06 enclosures with captive stainless steel screws and formed-in-place polyurethane seamless gasket provided as standard
- Third party certified to UL1741 and CSA Standard C22.2 No. 107.1
- Touch-safe fuse holders and power distribution blocks for safe operation
- 90°C output terminals
- Configured for positive and negative grounded arrays*
- Ground blocks included
- External mounting feet included for quick, easy installation
- Rated for continuous operation at 50°C
- 15A max. fuse size
- Eaton's Bussmann Series UL2579 fast-acting 600 VDC Midget Fuses provided as standard with fused models

Certifications and Compliances:

- cETLus 1741 Listed
- CSA Standard C22.2 No. 107.1
- NEMA 4X

Technical Specifications:

- 600 VDC
- 15A max. fuse size (A)
- 9.6A max. PV module short circuit current
- 50°C ambient
- #14 - #8 input conductors
- #2 AWG output conductors
- Dimensions (in.) – 08 x 08 x 06
- NEMA 4X
- Suitable for vertical or horizontal mounting

*Negative fused configurations available for positive grounded arrays. Replace 'F15' with 'NF15' in the catalog number.

Standard Materials and Finishes:

Fiberglass Enclosure:

- Hot compression molded fiberglass-reinforced thermoset polyester
- Non-conductive, impact-resistant, UV-resistant, flame retardant
- Poured polyurethane seamless gasket provides watertight, dusttight environmental seal
- Stainless steel used on all external hardware

Cat. #	No. of Strings	Max. Current (A)	Description
CCBF04SL	4	48	4 String Compact Combiner, N4X Fiberglass
CCBF04SL F15	4	48	4 String Compact Combiner, N4X Fiberglass, 15A Fuse
CCBF06SL	6	72	6 String Compact Combiner, N4X Fiberglass
CCBF06SL F15	6	72	6 String Compact Combiner, N4X Fiberglass, 15A Fuse

Solar Recombiners

Applications:

- In large photovoltaic (PV) systems, multiple combiner boxes are often necessary, and the outputs of these combiner boxes may need to be combined again—recombined—before reaching a central inverter
- Eaton's Crouse-Hinds Series Recombiner Boxes allow for ease of installation, saving time, labor and most importantly, system costs
- Recombiners range from two to 12 input circuits, with a durable non-metallic (NEMA 4X) or metallic (NEMA 4 and 3R) painted steel enclosure

Features:

- Rated for 600 VDC or 1000 VDC – continuous duty
- Two to 12 input circuits with configurations up to 1200A
- Factory installed fuses included
- Lexan shield covers all live components
- 90°C output terminals
- Configured for positive and negative grounded arrays
- Designed to ease installation of large cable inputs
- ETL Listed to UL1741 to provide peace of mind

Certifications and Compliances:

- cETLus 1741 Listed
- cETLus Listed to CSA Standards C22.2 No. 31 & No. 107.1
- NEMA 4X (fiberglass and stainless steel)
- NEMA 4 (powder coated steel)
- NEMA 3R (painted steel, for vertical mounting applications only)

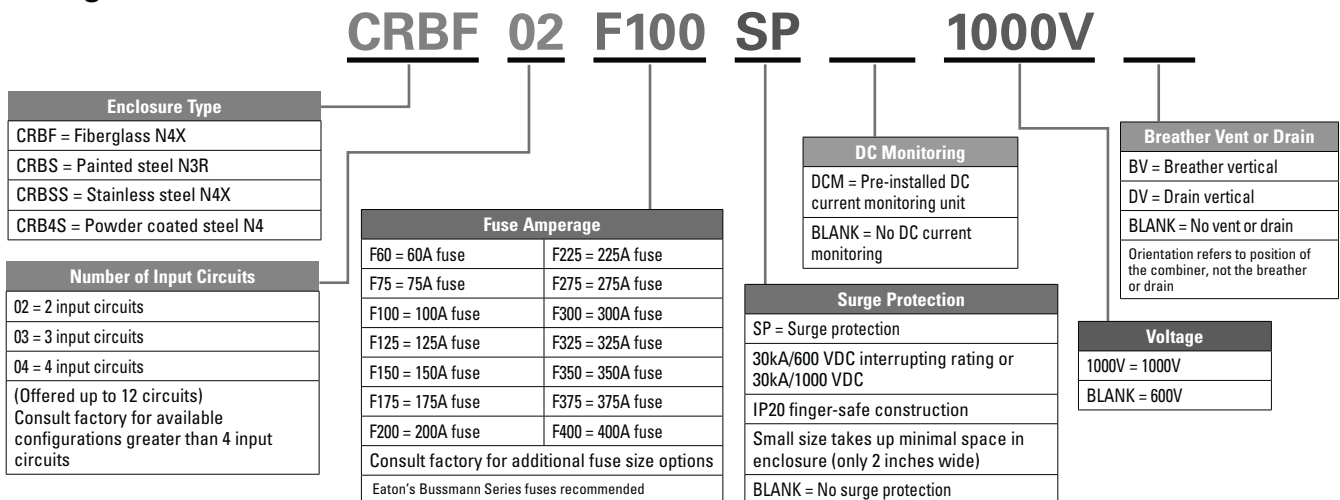

Standard Materials and Finishes:

- NEMA 4X fiberglass (non-conductive, impact-resistant, UV-resistant, flame retardant) – natural
- NEMA 4X stainless steel – natural
- NEMA 4 steel – powder coated
- NEMA 3R steel (for vertical mounting applications only) – painted

Options:

- Surge protection
- Smart recombiners available (DC string monitoring)
- Factory drilled entrance holes
- Factory installed conduit fittings
- Bipolar construction
- Factory installed breather, drain and desiccant
- Integral power supply, flex I/O, terminal blocks
- Integral disconnects available in 100A, 250A, 400A and 600A – consult factory
- Multiple disconnect options available – consult factory
- Custom options available – consult factory

Catalog Number Matrix:

DC Safety Disconnect Boxes

Applications:

- Intended to be used to make or break electrical connections and disconnect any modules from downstream components
- For use with 600 VDC or 1000 VDC PV applications
- Meets NEC code requirements for a means of disconnection before the inverter

Features:

- Rated for 600 VDC or 1000 VDC
- One to 12 inputs
- Rated for up to 3,200A
- Rated for 100% continuous duty
- Available in 100A to 600A disconnect switch ratings
- Configured for positive and negative grounded arrays
- 90°C output terminals that can support both aluminum and copper wire
- Protective shield covers all live parts
- Comes equipped with a NEMA 4X external handle which allows for lockout/tagout capabilities
- ETL listed to UL1741 to provide peace of mind and plenty of wiring room for ease of installation
- Designed to ease installation of large cable inputs

Certifications and Compliances:

- cETLus 1741 Listed
- cETLus Listed to CSA Standards C22.2 No. 31 & No. 107.1
- Rated for up to 3,200A
- Disconnect switch is UL98B Listed

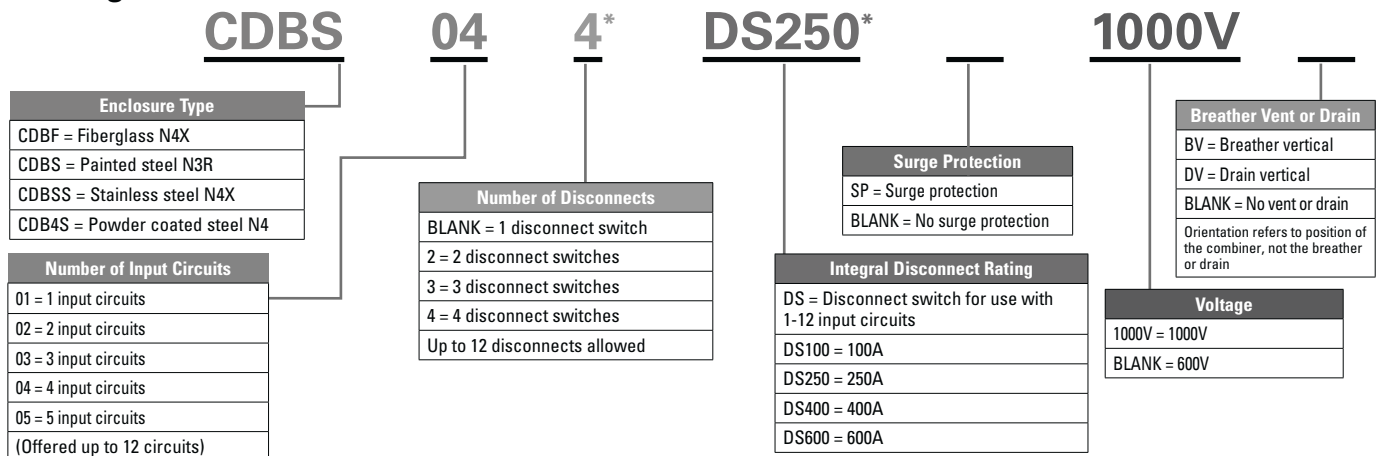

Standard Materials and Finishes:

- NEMA 4X fiberglass (non-conductive, impact-resistant, UV-resistant, flame retardant) – natural
- NEMA 4X stainless steel – natural
- NEMA 4 steel – powder coated
- NEMA 3R steel (for vertical mounting applications only) – painted

Options/Special Configurations:

- Positive incoming, and positive and negative incoming circuit configurations available
- Pad-mount or freestanding custom enclosures
- Mounting brackets
- Wiring pedestal available to allow more wiring room
- Custom labeling
- Factory drilled holes
- Factory installed fittings, conduit and cable
- Factory installed breather vent or drain
- Custom options available – consult factory

Catalog Number Matrix:

Solar Pass Through Boxes

Applications:

- Solar Pass Through Boxes (sometimes referred to as “transition boxes”) are used in residential applications to provide a low profile, cost-effective way to group input wires/circuits from several arrays and/or solar panels and transition from solar (PV) cable to regular building wire
- Designed for PV applications where overcurrent protection is not necessary due to the low power rating of the PV string

Features:

- Rated 600 VDC or 1000 VDC continuous duty
- Constructed in accordance with UL1741 standards, providing spacious wiring room for quick, easy wire termination
- Factory installed multi-hole solar cord grip provides dependable, secure wire termination to enclosure and saves field installation – eliminating the need for enclosure drilling, saving time and labor
- Fiberglass enclosures with captive stainless steel screws and formed-in-place polyurethane seamless gasket provided as standard
- Available in N3R sheet steel enclosures – consult factory
- Lightweight design offers easy mounting capabilities; optional mounting feet are available for increased customer flexibility
- Rated for continuous operation at 60°C ambient

Certifications and Compliances:

- cETLus 1741 Listed
- cETLus Listed to CSA Standards C22.2 No. 31 & No. 107.1
- NEMA 4X

Standard Materials and Finishes:

Fiberglass Enclosure:

- Hot compression molded fiberglass-reinforced thermoset polyester
- Non-conductive, impact-resistant, UV-resistant, flame retardant
- Poured polyurethane seamless gasket provides watertight, dusttight environmental seal
- Stainless steel used on all external hardware

Solar Accessories

Lay-in Grounding Lugs & Cable Clips

SOLAR LAY-IN GROUNDING LUGS

Applications:

- The ideal choice for the quick installation of one continuous grounding conductor or as a jumper to multiple locations
- Just unscrew the set screw, lay in the cable and re-tighten, making it easy to retrofit or repair

Features:

- Tin plated copper for additional corrosion resistance
- For use with #4-14 cable
- Stainless steel slotted screw
- Suitable for direct burial and outdoor use
- Ideal for continuous grounding of solar PV panels
- Suitable for use with copper conductors only, solid or stranded

Certifications and Compliances:

- cULus Listed
- UL File No. E-6225

Standard Materials and Finishes:

- Body – copper, tin plated
- Screw – stainless steel, natural

Cat. #	Description	Cable	Unit Qty.	Wt. Lbs. Per 100
SLL414T	Solar Grounding Lug	#4-14	100	5

CABLE CLIPS

Applications:

- Solar Cable Clips provide cable management options for bundling and harnessing PV solar wire anywhere between the panels to the inverter

Features - Steel Clip:

- Manufactured out of corrosion-resistant 304 stainless steel
- Double compression design which can accommodate one 12 gauge USE-2 wire or two 10 gauge PV-1000 wires
- Smooth clip edges which prevent damage to cable insulation
- Screwdriver designed slot which allows for easy removal or movement of the clip when necessary
- Dual cable clip to hold 0.413" to 0.472" in top slot and 0.300" in bottom slot
- 90° clip designed to mount at a 90° angle to the original clip (SCLP1)

Certifications and Compliances:

- UL Listed (see specific catalog numbers below)
- cUL Listed (see specific catalog numbers below)
- UL File No. E-364841

Standard Materials and Finishes:

- Steel clip – corrosion-resistant 304 stainless steel, natural
- 12 position clip – PPE and PS flame retardant "Noryl" material with 301 stainless steel mounting clip

Features - 12 Position Clip:

- Holds up to 12 cables with wire diameters ranging from 0.20" to 0.28"
- Internal locking tabs secure the cables in place to prevent any movement
- Maximum temperature rating of 203°F
- Flush mount design easily attaches to any flat surface with four mounting screws

Cat. #	Description	Panel Thickness Clamping Range		Wire Dia. Range	Height	Unit Qty.	Wt. Lbs. Per 100
		Min.	Max.				
SCLP1	Solar PV Cable Clip	0.06	0.13	0.20" (5.0mm) - 0.30" (7.6mm) Each Cable	0.39	100	1

*UL and cUL Listed.

Solar Accessories

Non-metallic Cord Grips

NON-METALLIC CORD GRIPS

Applications:

- Used in both commercial and residential grid-tied PV solar applications and are designed to accommodate the entry of multiple PV wires coming into a combiner or pass through box
- Provide mechanical strain relief as well as a liquidtight seal around the solar panel wires

Features:

- Multi-hole cord grip to allow for entry of multiple PV wires
- Solar cord grips offer customer flexibility by allowing the termination from one to 31 PV wires in a single connector
- Skinned over glands provide a durable, liquidtight seal around the wires
- No disassembly required for installation
- Wide range of cable acceptance sizes for customer flexibility
- Steel locknuts included
- Temperature rating: -22°F (-30°C) to 212°F (100°C) to meet the most demanding environmental conditions

Certifications and Compliances:

- UL/cUL recognized
- UL File No. E-23223
- IP68
- Flammability rating: 94-V2

Standard Materials and Finishes:

- 6/6 nylon with TPE/Buna N sealing glands, natural

Solar Accessories

Solar Cable Ties

SOLAR CABLE TIES

Applications:

- Provide cable management options for bundling and harnessing PV solar wire anywhere between the panels to the inverter

Features:

- Equipped with a UV protected vinyl jacket which prevents damage to installation cable insulation and ensures durability
- Tin plated with a copper crimp sleeve which allows for easy field installation
- Constructed from commercial aircraft grade stainless wire for long, dependable service

Standard Materials:

- Jacketing – UV-resistant vinyl
- Crimp sleeve – tin plated copper
- Wire – commercial aircraft grade stainless

Sunnector™ Whip & Jumper Assemblies

Applications:

- Sunnector™ Pre-fabricated Jumpers and Whips save time and money by providing various configurations that allow quick connections for a wide variety of solar applications
- Both whips and jumpers are manufactured under controlled conditions utilizing the highest quality materials; they are designed to work with rigid and flexible thin-film, monocrystalline and multicrystalline PV modules
- Whips are ideal for OEM applications, including: combiner boxes, mini-inverters, modules and adapters; they are also ideal for solar powered safety, hazard or signaling device assemblies
- In commercial and residential rooftop installations, the use of jumpers reduces the amount of on-site assembly and eliminates crimping, cutting and testing
- Jumpers are also optimal for off-grid self-contained solar power systems frequently found in rural or highly inaccessible locations
- All whips and jumpers are 100% continuity tested to ensure dependable service and are available in many standard lengths

SUPERIOR COMPONENTS MEANS HIGH QUALITY PERFORMANCE

Specially constructed to last years in the field and reduce overall installation times. Pre-marked assembly allows easy site layout.

Solar Whip Assemblies

Choose from the highest quality connector types like MC3, MC4 and SolarLok® or Eaton's Crouse-Hinds Series own top quality equivalents

Choose from different wire sizes capable of delivering 20A, 25A or 35A

Ends provided with your choice of hardware, including: ring terminals, fork terminals, fast-ons or as wire only, blunt cut or partially stripped

All whips and jumpers are 100% tested to ensure performance in the field

Solar Jumper Assembly

Eaton maintains excellent production standards, including those meeting IPC-620A

Choose from a variety of standard wire types, including: USE-2, RHW-2, PV 1KV/2KV, double insulated or halogen-free

Jumper configuration options include male to male, male to female, female to female and interseries connectivity

SolarLok is a registered trademark of Tyco Electronics.

Sunnector™ Whip & Jumper Assemblies

600V, 1000V and 2000V DC; 20A, 25A or 35A
IP67 or IP68

MALE & FEMALE ASSEMBLIES

Features:

- Compatible with rigid and flexible thin-film, monocrystalline and multicrystalline PV modules
- IP67 or IP68 waterproof rated dependent on connector type
- UV- and ozone-resistant
- Fully tested for continuity and hi-pot for dependable field performance
- Pre-built assemblies are designed specifically for grid-tied, off-grid and OEM applications
- Delivered pre-assembled, facilitating quicker installation
- Optional ID labeling available to communicate point-to-point connections in the field

Certifications and Compliances:

- Connectors UL certified to UL6703 and UL1703, TUV certified, IP67 or IP68 rated
- Wire/cable UL certified to UL4703/UL854

Material Characteristics:

- RoHS compliant
- Cross linked polyethylene wire (XLPE or XLP)
- Flammability meets UL94 requirements; V0 rated

Solar Whip Assemblies

Whip Assembly

#10 AWG wire – 35A current capacity*

#12 AWG wire – 25A current capacity*

#14 AWG wire – 20A current capacity*

- Designed for exposed or concealed wet or dry locations
- Sunlight-resistant
- Rated for direct burial
- Rodent-proof jacket
- Temperature range: -40°C to +90°C

Male MC4 Whip Assembly, Blunt Cut End

Female MC4 Whip Assembly, Partial Stripped End

*Recommended (not to exceed). Each system is unique and the design should consider all factors including current de-rating.

Solar Jumper Assembly

Jumper Assembly

#10 AWG wire – 35A current capacity*

#12 AWG wire – 25A current capacity*

#14 AWG wire – 20A current capacity*

- Designed for exposed or concealed wet or dry locations
- Sunlight-resistant
- Rated for direct burial
- Rodent-proof jacket
- Temperature range: -40°C to +90°C

Male MC4 to Female MC4 Jumper Assembly

Male MC3 to Female MC3 Jumper Assembly

*Recommended (not to exceed). Each system is unique and the design should consider all factors including current de-rating.

Sunconnector™ Whip & Jumper Assemblies

600V, 1000V and 2000V DC; 20A, 25A or 35A
IP67 or IP68

Connection Types:

†Assembly end 1 connectors are female only if assembly end 2 connector is also female.

Sunconnector™ Parallel Circuit Array & Home Run Harness Assemblies

Applications:

- Custom made Parallel Circuit Array and Home Run (Sub-array) Harnesses provide flexibility while delivering cost savings to any large solar installation
- Sunconnector™ Parallel Circuit Array Harness Assemblies feature a proprietary junction system that allows multiple arrays to be connected in parallel, providing labor savings and improving connection quality by eliminating multiple adapters and double terminations
- Parallel Circuit Harnesses are ideal for thin-film type modules, where low current can be electrically paralleled to optimize electrical output
- Sunconnector Home Run Harnesses are designed for high current connection and power delivery to combiner boxes, subcombiners or inverters used with monocrystalline and polycrystalline modules
- Fully tested Sunconnector Home Run Harnesses arrive terminated, bundled and spooled, replacing on-site long wire runs, bundling, attachment and connector termination
- Home Run Harnesses can also be manufactured with easy to read identification on each leg and on spools; spools can also be labeled for proper job site placement

ENGINEERED SOLUTIONS DESIGNED SPECIFICALLY FOR EACH INDIVIDUAL JOB

Intelligent cabling solutions provide the best overall value and design flexibility to get the job done right.

Custom Parallel Circuit Array Harness

Custom Solar Home Run Harness

Wires are processed with Swiss made precision equipment

In-line circuit protection is available with PV rated fuses and fuse holders

Assemblies are 100% fully factory tested and offer superior weatherproof sealing

Sunnector™ Parallel Circuit Array & Home Run Harness Assemblies

600V, 1000V and 2000V DC; 20A, 25A or 35A
IP67 or IP68

CUSTOM PARALLEL CIRCUIT ARRAY HARNESS ASSEMBLIES

Features:

- Unique solution that is specifically designed to optimize the electrical outputs of thin-film modules
- Provides a better solution by eliminating the need for costly adapters, double the connectors and failure points
- Proprietary molding and sealing process stems from years of research and performance in harsh environments
- Superior sealing performance of overmolded connectors/junctions
- Pre-assembled, delivered to job site
- Fully tested for continuity and hi-pot for dependable field performance
- Improved durability and strain relief over traditional wiring
- Custom T- or X-mold strapping points permit attachment of harnesses without clamps
- Proven high performance materials
- UV- and ozone-resistant
- All X-mold and T-mold harnesses are available with termination points in the connector of your choice
- Harnesses can reliably connect as many as 374† modules per harness (when utilizing #10 AWG PV wire)
- ID labeling available to communicate point-to-point connections in the field

Certifications and Compliances:

- Connectors UL certified to UL6703 and UL1703, TUV certified, IP67 or IP68 rated
- Wire/cable UL certified to UL4703/UL854

Material Characteristics:

- RoHS compliant
- Cross linked polyethylene wire (XLPE or XLP)
- Flammability meets UL94 requirements; V0 rated

Parallel Circuit Array Harness Assemblies

X-mold Parallel Circuit Array Harness Assembly

T-mold Parallel Circuit Array Harness Assembly

Custom Harness Assembly Ordering Information

Whether you need to create complex or simple systems, contact your local Eaton's Crouse-Hinds Series Sales Representative and we will help you develop the most efficient system possible. Order Sunnector™ Parallel Circuit Array Harness Assemblies by sending the following two items to EngineeringSunnector@Eaton.com:

1. A completed copy of our Solar Installation Questionnaire that can be downloaded from this web page: <http://www.crouse-hinds.com/solarassemblies>
2. A system diagram with electrical parameters and module locations

*Recommended (not to exceed). Each system is unique and the design should consider all factors including current de-rating.

†The number of modules listed is only for reference and is not meant to be an electrical guide.

Sunnector™ Solar Parallel Circuit Harness Assemblies

600V, 1000V and 2000V DC; 20A, 25A or 35A
IP67 or IP68

CUSTOM PARALLEL CIRCUIT ARRAY HARNESS ASSEMBLIES

Configurations:

- Ideal for installations where modules are electrically paralleled with multiple arrays integrating to one combiner box or inverter
- The X-mold junction conveniently merges module arrays while allowing multiple connection points on each leg
- Harnesses made with T-mold junctions provide a quick and easy way to connect module arrays to a combiner box
- Suitable for use for residential, commercial and utility scale projects, harnesses are available with an unlimited number of branches
- Module arrays with low current output are easily paralleled to optimize the maximum current output while providing design flexibility and cost and labor savings
- Custom designed Sunnector™ assemblies reduce the overall installed cost by 10% to 35%*

Combination X-mold & T-mold Junction Wiring Configuration

In this example, 98 modules can be connected using a Sunnector Custom Parallel X- and T-mold junction harness to provide a 3-string circuit to the combiner box. No need to run 24 discrete wires back to the combiner.

T-mold Junction Wiring Configuration

In this example, 72 modules can be connected using only two Sunnector parallel harnesses: simple, cost-effective and reliable.

*Based on labor and material savings versus traditional wiring.

Sunnector™ Solar Home Run Harness Assemblies

600V, 1000V and 2000V DC; 20A, 25A or 35A
IP67 or IP68

CUSTOM HOME RUN HARNESS ASSEMBLIES

Features:

- Designed for high current connection and power delivery to combiner boxes, sub-combiners or inverters used with monocrystalline and polycrystalline modules
- Pre-built assemblies are designed specifically for each job and application
- IP67 or IP68 waterproof rated dependent on connector type
- UV- and ozone-resistant
- Fully tested for continuity and hi-pot for dependable field performance
- Overmolded connectors/junctions deliver superior sealing performance
- Improved durability and strain relief over traditional wiring
- Save money and time by facilitating quicker installation
- Proven high performance TPE, PPO and PC materials
- All Home Run Harnesses are available with termination points in the connector of your choice
- Available with #14, #12 or #10 AWG wires
- ID labeling available to communicate point-to-point connections in the field
- Delivered pre-assembled; job site delivery is also available

Certifications and Compliances:

- Connectors UL certified to UL6703 and UL1703, TUV certified, IP67 or IP68 rated
- Wire/cable UL certified to UL4703/UL854

Material Characteristics:

- RoHS compliant
- Cross linked polyethylene wire (XLPE or XLP)
- Flammability meets UL94 requirements; V0 rated

Home Run Harness Assemblies

Home Run Harness
Assembly

#10 AWG wire – 35A current capacity*

#12 AWG wire – 25A current capacity*

#14 AWG wire – 20A current capacity*

- Designed for exposed or concealed wet or dry locations
- Sunlight-resistant
- Rated for direct burial
- Rodent-proof jacket
- Temperature range: -40°C to +90°C

Custom Labeling Options

Custom Harness Assembly Ordering Information

Whether you need to create complex or simple systems, contact your local Eaton's Crouse-Hinds Series Sales Representative and we will help you develop the most efficient system possible. Order Sunnector™ Home Run Harness Assemblies by sending the following two items to EngineeringSunnector@Eaton.com:

1. A completed copy of our Solar Installation Questionnaire that can be downloaded from this web page: <http://www.crouse-hinds.com/solarassemblies>
2. A system diagram with electrical parameters and module locations

*Recommended (not to exceed). Each system is unique and the design should consider all factors including current de-rating.

Sunconnector™ Solar Home Run Harness Assemblies

600V, 1000V and 2000V DC; 20A, 25A or 35A
IP67 or IP68

CUSTOM HOME RUN HARNESS ASSEMBLIES

Configurations:

- Home Run Harnesses are one of the most functional products for large utility scale or commercial systems
- Gathers individual strings from the module array and are bundled, labeled and conveniently coiled on a spool for quick and easy unreeling
- Eliminates the need for unreeling individual wires, cutting, stripping, terminating, labeling, tie-wrapping and assembling connectors
- Spools can be placed at the combiner box and unreeled in one fast and easy process
- Easy to read, long-lasting labels make connection to the modules and combiner box a snap
- Most commonly available from 2-8 strings (4 to 16 discrete wires), Eaton's Crouse-Hinds Division can provide any length and/or breakout you require
- Custom designed Sunconnector™ assemblies reduce the overall installed cost by 10% to 35%*

30 Solar Module Configuration

This example represents how 30 high current crystalline modules can be connected using only three Sunconnector Parallel Harnesses. This pre-spooled Home Run Harness was installed with only six connections.

60 Solar Module Configuration

This example shows how 60 crystalline modules can be connected using only three Sunconnector Parallel Harnesses: simple, cost-effective and reliable.

*Based on labor and material savings versus traditional wiring.

Commercial Products delivers quality, reliability, productivity improvements and lower installed cost, all from a single dependable source.

See the complete offering of Commercial Products at www.crouse-hinds.com.
